"The Traffic Engineering Handbook is a comprehensive practice-oriented reference that presents the fundamental concepts of traffic engineering, commensurate with the state of the practice"--

A timely intervention as higher education in India begins to pay equal importance to Quality, alongside Access and Equity. Indian higher education is the third largest in the world. It is undergoing unprecedented expansion and reforms. Yet, no Indian university figures among the World's Top 100! The problem lies primarily with the quality of higher education. This book serves as a quality management guide for the heads of colleges and universities, focusing on issues, techniques and improvement at the institutional level. In building up a sound framework, it effectively combines generic methods and techniques with specific mechanisms of quality assurance for in-campus activities such as curriculum planning, teaching learning processes, human resource management, infrastructure management and information and communication technologies. The author's expertise as a management scientist, trainer of heads of higher education institutes and experience of institution building gives the book an extra edge.

seventeen papers that deal with productivity measurement, productivity growth, dynamics of productivity change, measures of labor productivity, measures of technical efficiency in different sectors, frontier analysis, measures of performance, industry instability and spillover effects. These papers are relevant to academia, but also to public and private sectors in terms of the challenges firms, financial institutions, governments and individuals may face when dealing with economic and education related activities that lead to increase or decrease of productivity. The North American Productivity Workshop brings together academic scholars and practitioners in the field of productivity and efficiency analysis from all over the world. It is a four day conference exploring topics related to productivity, production theory and efficiency measurement in economics, management science, operations research, public administration, and related fields. The papers in this volume also address general topics as health, energy, finance, agriculture, utilities, and economic development, among others. The editors are comprised of the 2014 local organizers, program committee members, and celebrated guest conference speakers.

This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27–29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the

need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

“This book gives a voice to English language teachers faced with the challenges posed by English language curriculum change. As a core component of national state system curricula in virtually every country in the world, there has nevertheless been little research exploring how the millions of English teachers worldwide navigate the challenges posed by such curriculum changes. This volume includes eleven stories from teachers based across every continent, providing a global glimpse of how national English curriculum change projects have been experienced by classroom teachers who are commonly (if erroneously) viewed as mostly responsible for its implementation

This book comprises the proceedings of the International Conference on Transformations in Engineering Education conducted jointly by BVB College of Engineering & Technology, Hubli, India and Indo US Collaboration for Engineering Education (IUCEE). This event is done in collaboration with International Federation of Engineering Education Societies (IFEES), American Society for Engineering Education (ASEE) and Global Engineering Deans' Council (GEDC). The conference is about showcasing the transformational practices in Engineering Education space.

The book, packed in 22 chapters, provides in-depth and detailed information on different aspects of urban development. Issues, such as education, health, power, transport, stray animals, tourism, water, greenery, pollution, waste and sanitation management, disaster management, adulteration, crimes, social life, civic infrastructure, encroachment, unauthorized construction and illegal colonies, which the people in Delhi have been confronting for long, have been covered under the book. As Delhi is the national capital and the mirror of the country, the author has attempted to focus on the development of it as a role model of the urban India, to be replicated by others in respect of issues that affect the day-to-

day life of a common man, people of all age groups, sex, religion, region, poor and rich, students, public and private sectors, bureaucrats, businessmen, industrialists and politicians. The book will be of immense value to policymakers, programme planners, public and private sectors, NGOs, social workers, environmental workers, educationists, developmental practitioners and the Delhiites who dream to see Delhi as "a world-class city".

This textbook on Costing Methods is designed as per the requirements of latest CBCS syllabus of Bangalore University. It aims to lay a strong foundation on the subject with its well explained theoretical concepts and ample number of examples. This book presents all the topics in a systematic and meticulous manner, with equal emphasis on theory and application part.

'Financial Accounting' has been written by three highly experienced teachers for T.Y.B.Com students of University of Mumbai. It has been designed as a textbook to provide comprehensive coverage of the syllabus prescribed by the University of Mumbai. This book covers all the topics mentioned in the syllabus in a simple and lucid style. Due consideration has been given to practical questions. A variety of problems on each topic has also been included. This book is divided into two parts: the first part covers the theory and the problems on each topic and the second part covers University problems with solutions for every chapter.

Key Features

- For each topic, practical illustrations have been divided into different types to understand the topic easily.
- In each chapter, theoretical questions are given along with answers.
- A large number of problems have been solved.
- Numerous solved problems are given from previous university examinations.
- Students will easily know the trend and pattern of examinations by using this book.
