The book that sparked a marketing revolution. "This is a subversive book. It says that the marketer is not--and ought not to be--at the center of successful marketing. The customer should be. Are you ready for that?" --From the Foreword by Malcolm Gladwell, author of The Tipping Point. Counter to traditional marketing wisdom, which tries to count, measure, and manipulate the spread of information, Seth Godin argues that the information can spread most effectively from customer to customer, rather than from business to customer. Godin calls this powerful customer-to- customer dialogue the ideavirus, and cheerfully eggs marketers on to create an environment where their ideas can replicate and spread. In lively detail, Godin looks

at the ways companies such as PayPal, Hotmail, GeoCities, even Volkswagen have successfully launched ideaviruses. He offers a "recipe" for creating your own ideavirus, identifies the key factors in the successful spread of an ideavirus (powerful sneezers, hives, a clear vector, a smooth, friction-free transmission), and shows how any business, large or small, can use ideavirus marketing to succeed in a world that just doesn't want to hear it anymore from the traditional marketers.

This is a must for art therapists - at last a book that places art at the centre of our evidence in a convincingly argued, accessible and rewarding read' - Professor Joy Schaverien PhD Art Therapy around the world is under increasing pressure to become more "evidence-based". As a result, practitioners now need to get to grips with what constitutes "evidence", how to apply research in appropriate ways and also how to contribute to the body of evidence through their own research and other related activities. Written specifically for art therapy practitioners and students, Art Therapy, Research & Evidence Based Practice: " traces the background to EBP " critically reviews the existing art therapy research " explains the research process " links research with the development of clinical guidelines, and " describes the knowledge and skills needed to demonstrate efficacy. Drawing on her own experience as a researcher, practitioner and lecturer, Andrea Gilroy looks at the implications of EBP for art therapy and examines common concerns about the threat it may pose to the future provision of art therapy within public services. Art Therapy, Research Evidence-Based Practice addresses issues which are critical to the future development and even the survival of art therapy. Phrases such as 'corporate culture', 'market culture' and the 'knowledge economy', have now become familiar clarion calls in the world of work. They are calls that have echoed through organizations and markets. Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution. In particular, the once clean divide that placed the economy, dealt with mainly by economists, on one side, and culture, addressed chiefly by those in anthropology, sociology and the other 'cultural sciences', on the other, can no longer hold. This volume presents the work of an international group of academics from a range of disciplines including sociology, media and cultural studies, social anthropology and geography, all of whom are involved not only in thinking 'culture' into the economy but thinking culture and economy together. By adopting a new approach to helping students understand how management accounting contributes to decisions in a variety of organizational contexts, this textbook sets out clear explanations of practical management accounting techniques - in the context of the application of these techniques to decisions. It is supported by case studies of varying complexity that will allow students to work at their own level and also includes summaries.
