back. Badly. Lee Stone has written thrillers with best seller James Patterson. He started writing this book while reporting for the BBC in Afghanistan.

During their thirteenth and fourteenth century, a band of warriors rose to prominence in Europe and Palestine. The land of the Middle East was known as Outremer, the men who dominated these lands were a group of warriors known as the Knights Templar, poor fellow soldiers of Christ. These knights gave up all wealth and nobility to follow the covenants of Christ. The house of the Templar's based in Paris, became a powerful economic force amassing great wealth by donations of money and property. They were the most skilled fighting units of the crusades in the Holy land while also becoming financiers, bankers, merchants and seaman with their own fleet of merchant ships. When the Holy land fell under the control of the Ottoman empire, support for the order faded, King Philip IV of France was deeply in debt to the Templar order, a debt he could never repay. With the aid of Pope Clement V, they denounced the Templar's as Heretics, killed many while burning the leaders at the stake. A dedicated order of Knights stole away in the night, taking a vast amount of treasure with them, a treasure that was searched for yet has not been found to this day. Though, the myth of the hidden treasure remains. Meanwhile, in the present day, a New York lawyer, hired to locate millions of dollars supposedly brought to Casablanca, Morocco from Florida by Scott Rothstein. A perpetrator of the fourth largest Ponzi scheme in history, a scheme that bilked innocent people of \$1.4 billion dollars. Mark Radin, aside from being prominent criminal attorney, was also a decorated Navy Seal with extensive combat experience in many clandestine and covert missions around the world. While in Casablanca, he becomes involved in a murder of a ruthless criminal who was attempting to steal an ancient document from a young

messenger who was in the process of delivering this manuscript to a Rabbi for translation. The writing was in an old dialect making it difficult to understand. With the young boy, in possession of the portfolio containing the manuscript the pair must run for their lives, being pursued by the police and members of the criminal gang. Their journey takes them from Morocco to Egypt then Israel in search of someone with the knowledge to understand then translate the papers in the leather case the young courier possesses. The search to discover the contents of this archaic script sends Mark on a dangerous journey to determine the validity of the information in the documents following the trail of loyal band of Templar's who traveled this way eight hundred years ago. That is if the myth, the rumors of the hidden treasure were true! Only time would tell where the trail led.

Most people think that money is the crucial factor of life on this planet. Unfortunately, it--like religion--can't guarantee happiness, prevent bad choices, or ensure good personal relationships. Each merely provides some comfort...useless in moments fraught with danger. While conducting research in Europe for an article on cults, American journalist Jack Snyder stumbles across English heiress Claire Delacroix. They discover that she is target of a scam and flee the dubious religious group, unaware of its true nature. Starting with the unusual circumstances of their first meeting and continuing through the many trials they face, their time together--like chemical acting on exposed photographic plate--reveals each other's true character and ability to fulfill the other's needs. And, they learn that cults do change lives. Far out in the desert, a superhuman assassin known only as Cain is using blood money to finance the excavation of an artifact as old as the earth itself. CIA operative Gabrielle "Gabe" Lincoln has a very short time to learn the secret of Cain's power--or soon the earth and everyone in it will be

Entertainment Weekly Must List Pick In the new novel featuring war veteran Peter Ash, “an action hero of the likes of Jack Reacher or Jason Bourne” (Lincoln Journal-Star), Ash has a woman's life in his hands—and her mystery is stranger than he could ever imagine. War veteran Peter Ash sought peace and quiet among the towering redwoods of northern California, but the trip isn't quite the balm he'd

hoped for. The dense forest and close fog cause his claustrophobia to buzz and spark, and then he stumbles upon a grizzly, long thought to have vanished from this part of the country. In a fight of man against bear, Peter doesn't favor his odds, so he makes a strategic retreat up a nearby sapling.

There, he finds something strange: a climbing rope, affixed to a distant branch above. It leads to another, and another, up through the giant tree canopy, and ending at a hanging platform. On the platform is a woman on the run. From below them come the sounds of men and gunshots. Just days ago, investigative journalist June Cassidy escaped a kidnapping by the men who are still on her trail. She

The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

In three months of savage fighting, the U.S. Seventh Army did what no army in the history of modern warfare had ever done before—conquer an enemy defending the Vosges Mountains. With the toughest terrain on the Western Front, the Vosges mountain range was seemingly an impregnable fortress, manned by German troops determined to hold the last barrier between the Allies and the Rhine. Yet despite nearly constant rain, snow, ice, and mud, soldiers of the U.S. Seventh Army tore through thousands of pillboxes, acres of barbed wire, hundreds of roadblocks, and miles of other enemy obstacles, ripping the tenacious German defenders out of their fortifications in fierce fighting—and then held on to their gains by crushing Operation Nordwind, the German offensive launched in a hail of steel at an hour before midnight on the last New Year's Eve of the war. Keith Bonn's fascinating study of this little-known World War II campaign offers a rare opportunity to compare German and American fighting formations in a situation where both sides were fairly evenly matched in numbers of troops, weapons, supplies, and support. This gripping battle-by-battle account shatters the myth that German formations were, division for division, superior to their American counterparts.
