"A complex and chilling tale of friends, family and the often murderous secrets that hide in the dark" from the award-winning author of Bone White (Robert McCammon, New York Times–bestselling author). The Piper has come to take the children away . . . In the fall of 1993, fifteen-year-old Angelo Mazzone sees his first dead body. The murder is linked to the Piper, the possible abductor of three other children—who haven't been found—over the past few months. Some people in town say the woods are haunted, but Angelo and his friends head in anyway, to search the darkness for a monster. What they find there will change who they are—and everything they once believed in . . . "A frightening, thoroughly engaging read with a deeply moving series of narrative motifs running throughout, ones that needle the mind and tug at the heart in the best way . . . A triumph of suspense, an affectionate ode to adolescence and by far Ronald Malfi's strongest effort to date." —Horror Novel Reviews "Malfi is a man of many voices, a sort of literary version of Mel Blanc (the 'man of a thousand voices'), but all of his voices are captivating, though none of them quite the same. Horror and crime fans will find much to like here." —Booklist

these tools support their teaching goals. This comprehensive resource contains an array of useful tools that address problems of organization such as a time management calendar, aids for scheduling meetings, and mind-mapping or graphic organizers. Walking to Hollywood is a dazzling triptych - obsessive, satirical, elegiac - in which Will Self burrows down through the intersections of time, place and psyche to explore some of our deepest fears and anxieties with characteristic fearlessness and jagged humour. 'Very Little' is ostensibly the account of a curative journey to Canada and the USA, but in fact the record of a nematode's progress, as the worm of obsession - with scale and packing and the 'stuff' of our lives - bores through a mind in extremis. 'Walking to Hollywood' is an extreme satire on celebrity, in which the narrator believes that everyone he meets is

played by a famous actor, and that only he can solve the mystery of who murdered the movies. 'Spurn Head' leads Self to a tormented sojourn with a madman whose house is sliding over the edge of a cliff, to a game of checkers with Death, and finally to an encounter with one of Swift's immortal Struldbruggs and a march through a tear in time itself. In *Walking to Hollywood Will Self* pushes memoir to the limits of invention.

In the wake of the global financial crisis that began in 2007, faith in the rationality of markets has lost ground to a new faith in their irrationality. The problem, Roman Frydman and Michael Goldberg argue, is that both the rational and behavioral theories of the market rest on the same fatal assumption--that markets act mechanically and economic change is fully predictable. In *Beyond Mechanical Markets*, Frydman and Goldberg show how the failure to abandon this assumption hinders our understanding of how markets work, why price swings help allocate capital to worthy companies, and what role government can and can't play. The financial crisis, Frydman and Goldberg argue, was made more likely, if not inevitable, by contemporary economic theory, yet its core tenets remain unchanged today. In response, the authors show how imperfect knowledge economics, an approach they pioneered, provides a better understanding of markets and the financial crisis. Frydman and Goldberg deliver a withering critique of the widely accepted view that the boom in equity prices that ended in 2007 was a bubble fueled by herd psychology. They argue, instead, that price swings are driven by individuals' ever-imperfect interpretations of the significance of economic fundamentals for future prices and risk. Because swings are at the heart of a dynamic economy, reforms should aim only to curb their excesses. Showing why we are being dangerously led astray by thinking of markets as predictably rational or irrational, *Beyond Mechanical Markets*

presents a powerful challenge to conventional economic wisdom that we can't afford to ignore.

When she was twenty-three years old, Courtney Angela Brkic joined a UN-contracted forensic team in eastern Bosnia. Unlike many aid workers, Brkic was drawn there by her family history, and although fluent in the language, she was advised to avoid letting local workers discover her ethnicity. Her passionate narrative of establishing a morgue in a small town and excavating graves at Srebrenica is braided with her family's remarkable history in what was once Yugoslavia. *The Stone Fields*, deeply personal and wise, asks what it takes to prevent the violent loss of life, and what we are willing to risk in the process.

William III and Mary II, England's only ever 'joint monarchs', changed the course of the country's history, coming to power through a coup, re-establishing parliament on a new footing and initiating a long period of expansion that transformed England into a world power. Jonathan Keates' account of their dramatic reign makes both monarchs vivid: the shrewd 'Dutch' military champion William of Orange, and the vulnerable, shortlived Mary, whose life as a 'celebrity' royal and untimely death at thirty-four inspired Purcell to write some of his greatest music. As Keates makes clear, William and Mary's reign was crucial to the evolution of the modern nation, from the 'Glorious Revolution' that began it, to the creation of the Bank of England, the modern British armed forces and, most crucially, a realm in which royal power required popular consent.

"Laurie Wilkie is making an important statement about the culture of fraternities, saving them from uncritical celebration on the one hand and the "Animal House" image on the other. She has given us a fascinating case study in the value and importance of the archaeology of the recent past."--Matthew Johnson, author of "Ideas of Landscape" "A fresh look at fraternity life, offering a nuanced view of its social benefits and shortcomings. "LaSalle's [stories] transcend their particulars to show people with dreams, dilemmas, and disappointments that will move any reader." —Jhumpa Lahiri, Harvard Review "Haunting and evocative. . . . LaSalle's prose is lyrical, at times rhapsodic, and his characters memorable." —Kirkus Reviews (starred review) The twelve stories of *Sleeping Mask*, written in propulsive, fluid prose, introduce readers to remarkable characters. They include a child soldier sent to raid a girls' boarding school, a Virginia Woolf scholar surviving cancer, a desperate writer living under fascism in a futuristic Latin America, the spirits of recently deceased college students on a tour of the Musée d'Orsay in Paris, and a middle-aged man transported back to his childhood, where he is led out to sea by his mother's ghost. LaSalle's tantalizing "fictions" are evocative of many of the great innovators of postmodern literature, from Borges to Nabokov, while charting a path entirely their own. Through all of their stylistic pyrotechnics these stories never forsake rich characterization and plotting to probe the deepest parts of the contemporary human condition, such as the nature of erotic desire, the legacy of art and artistry, the power of grief and fear, and the horror of war and violence. Peter LaSalle is the author of several books of fiction, including the story collections *Tell Borges If You See Him*, recipient of the Flannery O'Connor Award, and *What I Found Out About Her*, winner of the Richard Sullivan Prize in Short Fiction. He lives in Austin, Texas, where he is a member of the creative writing faculty at the University of Texas, and Narragansett, in his native Rhode Island.

How can we create and sustain professional learning programs that actually lead to improved student achievement? In this thoughtful and informative guide for teachers, administrators, and policymakers, Douglas B. Reeves provides answers. First he casts a critical eye on professional learning that is inconsistent, unfocused, and ultimately ineffective, and explains why elaborate planning documents and "brand-name" programs are not enough to achieve desired outcomes. Then he outlines how educators at all levels can improve this situation by * Taking specific steps to move from vision to implementation; * Focusing on four essentials: teaching, curriculum, assessment, and leadership; * Making action research work; * Moving beyond the "train the trainer" model; and * Using performance assessment systems for

teachers and administrators. If you're tired of professional development that takes up too much time and delivers too little, read *Transforming Professional Development into Student Results* and discover how to move toward a system that gives educators the learning experiences they need to make a measurable difference for their schools and their students.
