to do when children suffer different kinds of accidents and illnesses.

Arien Mack and Irvin Rock make the radical claim that there is no conscious perception of the visual world without attention to it. Many people believe that merely by opening their eyes, they see everything in their field of view; in fact, a line of psychological research has been taken as evidence of the existence of so-called preattentive perception. In *Inattention Blindness*, Arien Mack and Irvin Rock make the radical claim that there is no such thing -- that there is no conscious perception of the visual world without attention to it. The authors present a narrative chronicle of their research. Thus, the reader follows the trail that led to the final conclusions, learning why initial hypotheses and explanations were discarded or revised, and how new questions arose along the way. The phenomenon of inattention blindness has theoretical importance for cognitive psychologists studying perception, attention, and consciousness, as well as for philosophers and neuroscientists interested in the problem of consciousness.

As the number of community pools and waterparks grows nationwide, participation in aquatic activities is also growing. Lifeguards must receive proper and effective training, and maintain their skills to ensure their ability to work effectively with others as a part of a lifeguard team. This manual will supplement your in-service training to keep your knowledge and skills sharp.

New Mexico's Pajarito Plateau encompasses the Bandelier National Monument and the atomic city of Los Alamos. On Rims and Ridges throws into stark relief what happens when native cultures and Euro-American commercial interests interact in such a remote area with limited resources. The demands of citizens and institutions have created a form of environmental gridlock more often associated with Manhattan Island than with the semiurban West, writes Hal K. Rothman.

This practice test includes 140 multiple choice test questions about American Red Cross Lifeguard Exam. The test has been carefully developed to assist you to pass your actual test. It will help you prepare for and pass your exam on the first attempt but it does not include any study guide. The book focuses only on carefully selected practice questions. "Far too many people around the world know the pain of losing a loved one to drowning. Each year almost 360,000 people die from drowning--over 90% of them in low- and middle income countries. More than half of these deaths are among those younger than 25, with children aged under 5 facing the greatest risk. Drowning is the third leading cause of death worldwide for those aged from 5 to 14. Despite these tragic facts, drowning prevention gets relatively little attention

and few resources. There is far more we can do to prevent drowning. Global commitments made as part of the Sustainable Development Goals, for example, cannot be met as long as this preventable cause of death is left largely unchecked. All of us--policymakers, parents, non-profit organizations, businesses and concerned citizens--can help prevent drowning. Explaining how is the goal of this guide. Building on the World Health Organization's 2014 Global report on drowning, the following pages provide practical, step-by-step guidance on how to implement 10 effective measures to prevent drowning. They range from community-based solutions, such as day care for children and barriers controlling access to water, to effective national policies and legislation around water safety, including setting and enforcing boating, shipping and ferry regulations. Data show that all of these solutions can help save lives. The more we work together to implement the measures outlined in this guide, the more lives can be saved. We urge all concerned to adopt as many of the interventions and strategies as their resources will allow, and to protect those most vulnerable without delay."--Page iv.

Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006.

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival

from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives. The WHO Global report on drowning: preventing a leading killer highlights that 372,000 people drown worldwide each year. Drowning is among the ten leading causes of death for children and young people in every region of the world. The report sets out the evidence showing a range of effective drowning prevention strategies, and makes a number of recommendations for concrete measures to be taken by national and local governments. With the release of this report, WHO aims to galvanize attention and action to this issue by highlighting how collaboration across sectors can save lives.--Publisher description.

This book, which has been prepared by an international group of experts, provides comprehensive guidance for the design, planning and implementation of assessments and monitoring programmes for water bodies used for recreation. It addresses the wide range of hazards which
