"Each chapter's activities are hands-on and should make the book a useful and enjoyable experience. It will appeal to students and teachers as a one-stop shop for portfolio advice and support." Nursing Standard "This text is much needed. Clearly written and engaging, this has the potential to become a gold standard portfolio text." Roger Watson, Editor of Journal of Clinical Nursing and Professor of Nursing, School of Nursing and Midwifery, The University of Sheffield "Having read this book, I feel that it is not only useful for nursing students, but could be useful for qualified nurses who are working on their continuing professional development folder... As students progress through their course, how they manage their time, their attitude to learning and the goals they set for themselves may change. It is fitting therefore that the first chapter looks at learning in the context of portfolios and includes a time management, desire for learning and self control questionnaire - which although gives no definition to how the student manages their time, could prove to be an interesting activity particularly if completed at the start of a year and then at the completion of the year." Joanne Starkes,

Nursing Student "Fiona Timmins has made the topic of nursing portfolios easy to understand with simple terms and many helpful activities throughout while still being easy to read. While covering everything from the purpose of portfolios, content and structure to portfolios in operation this is a book that will greatly help anyone trying to produce a portfolio whether just starting or nearing the end of one...I will definitely be referring to this book throughout my 3 years as a student nurse making my portfolio and would recommend others to do so as well." Laura Franklin, Nursing Student "Fiona Timmins has written a book which is not just useful for student nurses but it also makes the topic easier to understand. Throughout the text there are many activities for the reader to partake in. It covers key topics such as "portfolio content" and "portfolio structure". As a 2nd year nursing student I believe that this text is a valuable asset to any nursing student's bookshelf as it is clear, concise and makes what can be a very confusing subject appear much easier." Vicky Bain, Nursing Student "Fiona Timmins has produced a book that is not only simple and easy to read but provides activities that enable the reader to think deeper about the information they include within their portfolio. Remember points dotted through each chapter provide quick and easy hints and tips to look back on while completing a portfolio ... This is one book, which I wish I had the chance to read in my first year, but it will be a handy companion while I complete my portfolio. I will recommend this book to my fellow classmates and also students in the years below, as they will defiantly benefit from this book." Leanne Haigh, Nursing Student This accessible book provides a guide to the context of portfolio development and its importance not just to assessment but to the patient experience. The Student Nurse Guide believes in inspiring future nurses through a different approach in training. We believe doing a degree in nursing doesn't have to be unnecessarily hard/stressful/exhausting or financially ruin you! We believe anyone can be a nurse no matter what challenges you have to overcome. Reflective practice is one of the very first things you will learn about when you start uni & it is incredibly boring! At first it seems a very daunting & complex process with theories and models and something you have to get right if you want to qualify - no pressure! You also may have to write one of your first assignments about reflection and include something from practice to reflect on. Just deciding what to reflect on can seem to take forever, let alone writing the actual reflective account. Why writing reflective accounts are important: \*It helps you to remember key learning experiences. \*You have recorded examples to draw on when writing assignments. \*It helps develop your self-awareness. \*Showcases your development journey & achievements. \*Builds your critical analysis & problem solving skills. \*Helps you to develop your reflection in action vs reflection on action. \*It's part of the NMC code to be a reflective practitioner through continuous reflection. If you haven't already started keeping a reflective journal you will need to soon. Most universities recommend students start one at the beginning of their degree, to help them develop their reflection skills, and as a way of keeping all their reflective accounts in one place. The Student Nurse Guide Reflective Journal was designed specifically for nursing students. It includes an example of a student nurses reflective account to draw from if you get stuck. Each page includes space to record the date, location, key learning point to help you quickly recall & find the subject, & read around to help develop your knowledge of key nursing skills as a result of your reflection. A reflective writing outline is also included on every reflective account page to help guide your writing and keep you on track. Featuring a modern contemporary design in A5 size, it is easy to keep at hand ready to record any learning opportunity as it happens, with approx 180 lined pages. The one thing to remember when reflecting is there is no right or wrong way of doing it. The aim is not be perfect, but to just record an event or experience which you feel contributed to your learning in some way. Remember this can be both positive and negative; you don't have to be too critical of yourself. Once you have at least described what happened, you can always come back and reflect on it at a later time. Always be honest with yourself when reflecting even if it makes you feel uncomfortable at times. Writing reflective accounts is a skill you will develop the more you practice it. Once you have learnt about the different theories and modules on reflection, you will find a style you prefer and apply it to guide your own reflective account writing.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. **\*\* By the authors of the acclaimed Introduction to Rubrics \*\*** Major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool **\*\*** Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In

professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

"This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going." - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop
