Ogden Dunes, incorporated in 1925, is the largest and most residential of the three Porter County lake-front communities established in the 1920s. Although it began as a highly restricted resort community with the largest man-made ski jump in North America, it became a middle-class residential community after 1945. Because of its proximity to Gary and Chicago, Ogden Dunes was also a battleground between the forces that wished to conserve the dunes and those that pushed for industrializing them. Alice Gray, Diana of the Dunes; Dorothy Buell, who led the fight to create a national park; and Dale Messick, the creator of comic strip Brenda Starr: Girl Reporter were important members of the community. Over the years, Ogden Dunes has provided a creative and supportive environment for children and adults, especially those with artistic talents and interests.

A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Today's culture and others' views, even those of other Christians, can present a distorted view of God. Some suggest God exudes qualities He does not possess such as being unloving or apathetic toward His creation. In a world where we

find people creating God in their own image, studying God's names can remind us that we are created in His. In fact, one of the best ways to know God's true character and grow closer to Him is to study His names. In *The Names of God*, Melissa Spoelstra leads women on an exploration of the many names of our triune God—from El and Elohim to Yahweh and its many combinations to names such as Abba, Jesus, and Holy Spirit...and many others. As women study the names of God, their ideas about God will become more grounded in what His names tell them, and thus more personal, allowing a greater trust in Him to share the details of their lives. Whether having walked with God for many years or just starting out in a relationship with Him, by the end of this study women will not only know more about God but will know Him better—because through the discovery of God's names, they will discover Him! Components for this six-week Bible study, each available separately, include a Participant Workbook, a Leader Guide, DVD with six 25-minute segments (with closed captioning), and a boxed Leader Kit containing one of each component.

The idea of *The Fingerprint Sourcebook* originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

"Increasingly, across the country, school, district, and postsecondary educators are exploring new avenues for incorporating the visual and performing arts into the core curriculum through interdisciplinary learning called arts integration. Arts Integration is a pedagogy whereby students engage in learning subject matter in and through the arts. The Kennedy Center in Washington D.C., a nationally recognized leader for professional artists and arts education defines arts integration as "an approach to teaching in which students construct and demonstrate understanding through an art form. "Teachers engaged in an arts integrated pedagogy may design lessons through which students act out the lifecycle of a butterfly, dance the structure of DNA, illustrate main ideas in storybooks or rap mathematical formulas and concepts"--

Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre--kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.
