section gives a full description of the Restorative Nursing position and definitions and criteria of a Restorative Nursing program. Helpful tools are provided to assure easy and comprehensive data collection, completion of MDS 3.0 information, analysis of data, and recording of vital information. Sections are included for thirteen different Restorative Nursing programs, and provide evaluations, assessments, and Restorative Nursing care plans. Restorative care plans and forms have been updated to ensure compliance with the change to MDS version 3.0 and with all of the federal regulations and guidelines updated during the past year.

Get the proven guidance you need to succeed in both nursing school and professional LPN/LVN practice with *Success in Practical/Vocational Nursing, From Student to Leader, 9th Edition*. Focusing on must-have leadership and problem-solving skills, this unique, market-leading text covers the soft skills that are essential for success in nursing school, in the job market, and in professional practice. Topics build on each other in a logical manner, beginning with tools you'll need for success in class, continuing to the skills needed in LPN/LVN practice, and culminating in the higher-level roles and responsibilities of the LPN/LVN as a leader. The newest feature box on empowerment introduces you to the concepts of self-reflection, self-growth, and power to enhance your student experience and accomplish positive outcomes in nursing school and in practice. Additionally, like in previous editions, Critical Thinking and Try This! boxes are incorporated throughout this ninth edition to challenge you in thinking

outside of the box to solve personal, academic, and professional situations. There are also practice review questions at the end of each chapter help you prepare for the NCLEX-PN® examination and chapters on Workforce Trends and Nurse State Practice Acts to help you easily move from the academic to the practice setting. With all its proven guidance and insight, this text is must-have for any LPN/LVN student wanting to find success in today's demanding healthcare environment.

This newly updated text covers concepts of normal and abnormal aging processes, with an emphasis on the normal aging process and a wellness lifestyle. With a strong clinical practice emphasis, it focuses on providing the specialized skills needed to meet the needs of elderly patients.

Barbara Acello, MS, RN This book is written specifically for RNAs. or nursing assistants, to help provide quality restorative care. Author Barbara Acello, MS, RN, offers detailed nursing procedures that do not fall under therapy treatment and must be provided by your nursing staff. Regardless of whether your facility has a staff dedicated to restorative care, this resource will serve as a much-needed source of critical information that is not taught during regular CNA in-services or educational training.

Comprehensive, yet highly readable, *Growing Older in Contemporary America* will appeal to students in both two-and-four-year colleges and universities. By

combining a sound academic approach with numerous applications, the text meets the needs of those who work with older people and also those who simply want to know more about growing older and its personal and social implications. The book is multi-disciplinary in its scope and appeal. It acquaints readers with the implications of an aging population; the theories of aging; the physical, social, psychological, and economic realities of growing older; the impact of housing options; the support systems available; and the public policy issues of aging that affect young and old alike. Each of the 22 relatively short chapters addresses the issues at hand, using extensive research in a simplified, applied manner.

Be prepared to meet the growing demand for licensed practical/vocational nurses with the knowledge and skills to provide quality care to older adults. Easy-to-understand writing and a positive outlook enliven every page of this popular resource. Step by step, you'll master the knowledge and skills you need, while also honing the leadership, management, and delegation abilities essential to your professional success. Feel confident in an important area as this text considers common myths about aging and includes applicable case studies to prepare you for a future career working with older adults.

The favorite in nursing assistant education, **NURSING ASSISTING: A NURSING**

PROCESS APPROACH, 11E prepares more nursing assistants for meaningful careers in acute care, long-term care, and home health than any other book of its kind! The step-by-step format walks you through more than 150 procedures, including key skills in patient handling and transfers, wound care, communication, safety, and record keeping, as well as special care procedures for patients with medical devices, catheters, and physical or mental impairments. Easy-to-understand chapters also take you through the essential background information nursing assistants need to know, such as basic human anatomy, career planning, and the latest health care trends. Updated throughout, this edition has numerous carefully chosen new full color photos and illustrations to bring the content to life. Designed to make learning fun and easy, NURSING ASSISTING: A NURSING PROCESS APPROACH, 11E is the perfect solution for nursing assisting education. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health,

comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-date data on gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly

emergency geriatrics, hospital geriatrics, international geriatric care, and rural geriatric care Information integrated with additional online resources Tables, drawings, and clinical algorithms made even more effective by a new two-color design 300 illustrations (including 64 in a full-color insert)

Focuses on developing the leadership skills needed to direct improvement in healthcare systems This unique text not only provides DNP students with practical guidance throughout their education, but also focuses on an often overlooked but vitally important DNP component: developing the leadership skills needed to effectively implement, sustain and spread change. Presenting improvement methods within the framework of leadership, the book helps students to understand the practical applications of their education. Beyond orienting students to the work of the DNP, the text helps them to understand the scope of practice and how it is related to larger issues and challenges within health care. A significant portion of the text is devoted entirely to leadership, particularly from a systems perspective. Using cases and examples, it addresses different ways DNPs can lead healthcare and elaborates on the types of improvement processes that are initiated by DNPs: translation of EBP and Research into Practice, Process Improvement, and Program Evaluation. The book discusses how improvement is measured and offers several chapters on the DNP project including its financial implications. PowerPoint slides accompany the text along with an Instructor's Guide, which provides tips on how instructors can help students to assimilate the large body of knowledge required in the DNP program. Key Features: Frames content within the context of leadership Prepares DNP graduates to lead innovative models in value-based health care systems Offers an innovative approach to understanding the DNP Leader and the DNP Project Delivers up-to-

date information about improvement work in health care systems that is specific to DNP students and graduates Includes cases and practical examples to illuminate information Distills “timeless” resources that faculty and students will return to again and again

This textbook for nursing assistants will prepare students not only to function in the traditional nursing assistant role in nursing homes, hospitals, and home health, but also will prepare students to advance their careers. A nursing assistant student who uses this text will have a firm foundation by which to transition to an LPN and ultimately an RN role. The text offers a compelling art program, a direct, conversational writing style, and an emphasis on professionalism and humanism. A back-of-book CD-ROM includes an audio glossary.

Restorative care nursing, currently referred to as function focused care, is a philosophy and method of care that enables caregivers to actively help older adults achieve and maintain their highest level of function. This is the only volume written to educate caregivers and administrators about the philosophy of restorative care and how to integrate this philosophy in all types of care settings. This updated second edition contains new content in each chapter along with several entirely new chapters on function-focused care for cognitively impaired adults, ethical issues, and patient-centered
