"My heart wandered through the world constantly seeking after my cure, but the sweet and delicious water of life had to break through the granite of my heart." When the words of Rumi enter your heart, something softens, breaks, and is subtly reborn. That he wrote the words seven hundred years ago in a medieval Persian world that bears little resemblance to ours makes their uncanny resonance to us today just that much more remarkable. Here is a treasury of daily wisdom from this most beloved of all the Sufi masters—both his prose and his ecstatic poetry—that you can use to start every day for a year, or that you can dip into for inspiration any time you need to break through the granite of your heart.

This important book brings the ignored population of abused upper-income women to light, revealing for the first time the depth and severity of "upscale abuse" How is it possible for a highly educated woman with a career and resources of her own to stay in a marriage with an abusive husband? How can a man be considered a pillar of his community, run a successful business and regularly give his wife a black eye? That we can even ask these startling questions proves how convinced we are that domestic abuse is restricted to the lower classes. In "Not to People Like Us" psychotherapist Susan Weitzman dramatically challenges this assumption. It is the first book to explore a previously overlooked population of emotionally and physically battered wives-the upper-educated and upper-income women, who rarely report abuse and remain trapped by their own silence. Weitzman draws on an in-depth study to document the shocking nature and incidence of abuse among the wives of professors, physicians and CEOs-many of them professionals and executives themselves. With keen insight and profound sensitivity, she reveals the unique path taken by the upscale wife-the early warning signs, the dilemmas and decisions, the dangerous desire to cover up and maintain appearances. The first book to condemn the legal and social service system for failing to recognize domestic violence among upper-income families, "Not to People Like Us" offers crucial information to help women find their way out of abusive relationships and toward safety and independence.

Offers useful information on the tools and building materials commonly used for basic repairs and renovations, and includes step-by-step instructions for several rough carpentry projects.

What makes you passionate about working with SQL Server? What lessons have you learned, perhaps the hard way, on how to get the best performance and scalability out of your SQL Server databases? We challenged a group of talented, up-and-coming

'new voices' in SQL Server to share their passion and knowledge with the Community. A DBA's core responsibilities are constant. A DBA must maintain and enforce security mechanisms on the data, prepare effectively for disaster recovery, ensure the performance and availability of all the databases in their care. As such, we have chapters providing tips on how to get the most out of features such as data compression, backup verification, performance tuning with traces and extended events, auditing, SSIS, and more. Side by side with these, we have chapters on the importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, *Tribal SQL*, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

*Les Fleurs du mal*, Charles Baudelaire's masterpiece, takes pride of place in this new bilingual edition, with Francis Scarfe's elegant prose versions for support. Allegations against his father turn eleven-year-old Rodney's life upside down in a powerful and surprisingly funny novel about new beginnings, new friendships and a fresh new look at the way things really are, by critically acclaimed author Susan Juby. Eleven-year-old Rodney is starting sixth grade in a new school, in a new home in a new state. The new school is really old and smells like someone ate a couple of pounds of glue and then barfed it back up, and he's in a class with a bunch of kids who seem to sort of hate him. Even his best friend won't write him back. It's strange, because just a couple of months ago, Rodney was one of the most popular guys in his fifth-grade class. He lived in Las Vegas, with his mom, older sister and his dad, who was a successful professional poker player. Now his old life is over -- his mom even says they shouldn't tell anyone their real last name. Because of something his dad did. Or something people said that he did. His dad says it's all a big misunderstanding, but he's now staying in a center "for people who are having problems, like being addicted to drugs or gambling, or because other people don't understand that you are just funny and friendly and sometimes you give people hugs or put your arm around them and they accuse you of taking liberties and ruin everything." Rodney is confident that it won't be long until the misunderstanding is all cleared up and they can all go back to their old life. But he can only keep the truth at bay for so long . . .

*LabStudio: Design Research between Architecture and Biology* introduces the concept of the research design laboratory in which funded research and trans-disciplinary participants achieve radical advances in science, design, and applied architectural practice. The book demonstrates to natural scientists and architects alike new approaches to more traditional design studio and hypothesis-led research that are complementary, iterative, experimental, and reciprocal. These originate from 3-D spatial biology and generative design in architecture, creating philosophies and practices that are high-risk, non-linear, and design-driven for often surprising results. Authors Jenny E. Sabin, an architectural designer, and Peter Lloyd Jones, a spatial biologist, present case studies, prototypes, and exercises from their practice, *LabStudio*, illustrating in hundreds of color images a new model for seemingly unrelated, open-ended, data-

systems- and technology-driven methods that you can adopt for incredible results. The Bunny family has a busy and exciting day on a family outing in town, on a farm, and at the port.

Margaret Tuttle's story is one of love unsought, for she had been perfectly content with the well-ordered and conveniently predictable life she had arranged for herself. But something dark lurks beneath the surface of her placid and uncluttered being, something dusty with neglect, yet painful to the touch. Birdie Freeman is everything Margaret is not: homely, humble, and generous. It is Birdie who manages, through nothing but acts of love, to dredge up Margaret's memories of things better left buried. Then Margaret discovers that Birdie harbors secrets of her own. "This book reminds me of why I love to read."--Michelle Collings, Editor, Doubleday/Crossings Book Club This volume contains a series of essays which examines various regimes and working classes of such countries as Italy, France, Poland, the USA, the Soviet Union and Great Britain in the early 20th century.

A collection of film essays by the well-respected critic, Noël Carroll.

This new issue of Samuel Beckett Today / Aujourd'hui contains three sections: Beckett and Romanticism, the conference proceedings of Beckett at Reading 2006, and finally a collection of miscellaneous essays. In the past few decades there have been scattered efforts to address the topic of Beckett and Romanticism, but it remains difficult to fathom his ambiguous and somewhat paradoxical attitude toward this period in literature, music and art history. Although far from being a comprehensive examination, the dossier on "Beckett and Romanticism" represents the first sustained attempt to give an impetus to the study of this complex theme. Presented here are contributions on Beckett's attitudes toward Romantic aesthetics in general, including notions such as the sublime, irony, failure, ruins, fragments, fancy, imagination, epitaphs, translation, unreachable horizons, the infinite, the infinitesimal and the unfinished, but also on Beckett's reading about the Romantic period, his affinity with specific Romantic artists and their influence on works such as Murphy, the trilogy, Krapp's Last Tape and All Strange Away. The second part of the current issue presents a selection of papers given at the Beckett at Reading 2006 conference in Reading, organised by the Beckett International Foundation to honour the writer's centenary. Reflecting the importance of the Beckett Foundation's Archive to scholars, many of these essays present new empirical research in the field of manuscript studies. Further areas of research are illuminated by other contributions which, together with the essays contained in the 'Free Space' section, show the importance and benefits of scholarly dialogue and cross-fertilization between different approaches in current Beckett Studies.
