“Creativity and innovation are to events, what the heart and soul are to the living.” The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees’ creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

Are political activists connected to the global justice movement simplistically opposed to neoliberal globalization? Is their political vision 'incoherent' and their policy proposals 'naïve' and 'superficial' as is often claimed by the mainstream media? Drawing on dozens of interviews and rich textual analyses involving nearly fifty global justice organizations linked to the World Social Forum, the authors of this pioneering study challenge this prevailing view. They present a compelling case that the global justice movement has actually fashioned a new political ideology with global reach: 'justice globalism'. Far from being incoherent, justice globalism possesses a rich and nuanced set of core concepts and powerful ideological claims. The book investigates how justice globalists respond to global financial crises, to escalating climate change, and to the global food crisis. It finds justice globalism generating new political agendas and campaigns to address these pressing problems. Justice globalism, the book concludes, has much to contribute to solving the serious global challenges of the 21st century. Justice Globalism will prove a stimulating read for undergraduate and graduate students in the social sciences and humanities who are taking courses on globalization, global studies and global justice.

Uniform Evidence Law: Principles and Practice was previously published by CCH Australia. This second edition of Uniform Evidence Law: Principles and Practice is an invaluable reference for students of evidence law and litigation practitioners. It provides a succinct, clear and comprehensive statement and analysis of the Uniform Evidence Law as at November 2014. The book provides an overarching and detailed analysis of the law of evidence applicable in those jurisdictions that have adopted the model Uniform Evidence Law: the Commonwealth, New South Wales, Tasmania, Victoria, Australian Capital Territory and now, since 2012, the Northern Territory. Students will gain invaluable insight from the authors who analyse the Uniform Evidence Law by reference to its history, its underlying policy and its operation in practice. Explanations and evaluations of the principles on which the law is based, identification of its often-conflicting rationales, and suggestions for how it might be made more principled and coherent will prove extremely helpful for students. New to this edition This second edition reflects significant updates, given the continued evolution of the Uniform Evidence Act. Changes to the Act reflected in this edition include: its introduction in the Northern Territory; the modification of the right to silence in the New South Wales Act; the addition of a journalists' privilege in New South Wales and Victoria, and the emergence of some further differences in the interpretation and application of tendency and coincidence evidence between the states.

Explains some traits common to all frogs, and other traits that are common to most, or just some frogs.

Cultural psychology, cross-cultural psychology, and indigenous psychology are the major psychological approaches to studying the relationship between culture and psychology. The three approaches have developed in relative isolation from each other, and each has accumulated a substantial corpus of theoretical and empirical work. This new book compares the similarities and differences of the three approaches, and it assesses their strengths and weaknesses.

This text highlights aspects of criminal processes and investigative procedures that are now extant in the Victorian and Commonwealth jurisdictions in particular: the hierarchy of courts in Victoria, commencement of criminal proceedings, bail, search and seizure, forensic procedures, police questioning and more.

This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing. Despite the standardising pressure of cultural and language-related factors, academic communication remains in many ways a highly personal affair, with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional, institutional, social and individual identities of its members. The first section of the volume deals with tensions involving individual/collective values and the analysis of collective vs. individual discursive features in academic discourse. The second section comprises longitudinal investigations of the academic output of single scholars, so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community. The third part deals with genres that are meant to impose commonality on the members of an academic community, not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication.

This book provides a comprehensive treatment of both judicial and non-judicial remedies at common law and equity. Updated to reflect major developments since the third edition.

This textbook is intended to give an introduction to neuroscience for students and researchers with no biomedical background. Primarily written for psychologists, this volume is a digest giving

a rapid but solid overview for people who want to inform themselves about the core fields and core concepts in neuroscience but don't need so many anatomical or biochemical details given in "classical" textbooks for future doctors or biologists. It does not require any previous knowledge in basic science, such as physics or chemistry. On the other hand, it contains chapters that do go beyond the issues dealt with in most neuroscience textbooks: One chapter about mathematical modelling in neuroscience and another about "tools of neuroscience" explaining important methods. The book is divided in two parts. The first part presents core concepts in neuroscience: Electrical Signals in the Nervous System Basics of Neuropharmacology Neurotransmitters The second part presents an overview of the neuroscience fields of special interest for psychology: Clinical Neuropharmacology Inputs, Outputs and Multisensory Processing Neural Plasticity in Humans Mathematical Modeling in Neuroscience Subjective Experience and its Neural Basis The last chapter, "Tools of Neuroscience" presents important methodological approaches in neuroscience with a special focus on brain imaging. Neuroscience for Psychologists aims to fill a gap in the teaching literature by providing an introductory text for psychology students that can also be used in other social sciences courses, as well as a complement in courses of neurophysiology, neuropharmacology or similar in careers outside as well as inside biological or medical fields. Students of data sciences, chemistry and physics as well as engineering interested in neuroscience will also profit from the text.

Essential reading for students and professionals in the fields of business, law and management, Effective Negotiation offers a realistic and practical understanding of negotiation and the skills required in order to reach an agreement. In this book Ray Fells draws on his extensive experience as a teacher and researcher to examine key issues such as trust, power and information exchange, ethics and strategy. Recognising the complexity of the negotiation process, he gives advice on how to improve as a negotiator by turning the research on negotiation into practical recommendations. It covers: • How to negotiate strategically • Negotiating on behalf of others • Cultural differences in negotiation The principles and skills outlined here focus on the business context but also apply to interpersonal and sales-based negotiations, and when resolving legal, environmental and social issues. Effective Negotiation also features a companion website with lecturer resources.

What are the challenges and opportunities of managing people in creative industries? How are the tensions between creative and commercial pressures mediated? The creative industries are an area of increasing economic importance. Yet creative industries and creative-based organizations are rife with problems such as whether and how control of the creative process should be exercised; the extent to which knowledge of creative production may be made explicit; and how the 'connection' between producer and consumer should be mediated. In Managing Creativity a team of experts from a diverse range of fields - including management, fine art, music, the internet, design, theatre and publishing - discuss these and other problems concerning the relationship between management and creativity. Developing an appreciation of these problems is theoretically productive, not only because it throws light onto our understanding of creative-based organizations, but also because it can be revelatory about organizations more generally.

It is 1939 and although Australia is about to go to war, it doesn't quite realise yet that the situation is serious. Deep in the working-class Melbourne suburb of Richmond it is business—your own and everyone else's—as usual. And young Kip Westaway, failed scholar and stablehand, is living the most important day of his life.

The second volume of the Wiley series, Environmentally Conscious Manufacturing focuses on environmentally preferable approaches to manufacturing. Contributors present and discuss the technologies engineers need to specify and employ to make manufacturing operations environmentally friendly and conform to environmental regulations. Chapters cover Hazardous Waste Minimization and Management; Cost-Effective Manufacturing; Real-time Process Monitoring and Control; Ethics in ECM; Governmental Regulations and Policies, and Total Quality Management. In each chapter case studies are provided to guide readers in areas outside their expertise.

This book examines the question of what makes one design environmentally preferable to another. Graedel discusses data and analyzes the streamlined life-cycle assessment process in the context of the goals of a particular process or product. FEATURES Discusses environmental objectives as the basis of life-cycle assessment. Focuses on streamlined LCAs, a technique common in industry today. Includes unique coverage of the assessment of societal infrastructures (Ch. 12). Ends with a hypothetical discussion of what an environmentally perfect product might look like. Includes useful checklists for performing SLCA.
