This volume in the American Antiquarian Cookbook Collection, published in New York in 1830, is a new version of a famous recipe collection previously published in London by William Kitchiner, adapted specifically for use by the American public. Dr. William Kitchiner's *The Cook's Oracle* was an enormous best-seller upon publication in

London in 1824, and the author developed an international reputation based on his eccentricities and the extravagance of his writing. Unlike most food writers of the day, he cooked the food himself, washed up afterward, and performed all the household tasks he wrote about. He traveled around with a “portable cabinet of taste,” a folding box containing all of his unique mustards and sauces, and he was well known for his invention of the popular Wow-Wow sauce. No wonder that an anonymous American “medical gentleman” (as asserted on the title page of this edition) chose to adapt Kitchiner’s English cookbook for American kitchens. In addition to over 600 recipes that run the full gamut of nineteenth century cookery, the book includes information about etiquette, dinner invitations, weights and measures (one of the first attempts to standardize cookbook measurements), carving, marketing advice, and techniques of boiling, baking, roasting, frying, and broiling. This edition of *The Cook’s Oracle* was reproduced by permission from the volume in the collection of the American Antiquarian Society, Worcester, Massachusetts. Founded in 1812 by Isaiah Thomas, a Revolutionary War patriot and successful printer and publisher, the society is a research library documenting the lives of Americans from the colonial era through 1876. The society collects, preserves, and makes available as complete a record as possible of the printed materials from the early American experience. The cookbook collection comprises approximately 1,100 volumes.

The Nurse Staffing Agency: Business Formation and Operation Manual was created by Resource Nurse Staffing-Research and Development Company (RNS-RD). RNS-RD is comprised of a team of nurses with over thirty years experience in vastly different specialty areas in health care: business, research, clinical and managed care, to name a few. RNS-RD seeks to empower clinicians from all areas of health care to dominate and take charge of their career through collaboration and entrepreneurship. RNS-RD is not a consulting firm. We do not offer courses or seminars. RNS-RD offers easy-to-read, easy-to-comprehend step-by-step DIY (do it yourself) guidelines on how to start and operate a profitable, manageable nurse staffing agency. Why DIY? DIY guidelines are economical and drive the business owners to learn the process. According to data

from the US Bureau of Labor Statistics, about 20 percent of US small businesses fail within the first year. By the end of their fifth year, roughly 50 percent have faltered. This is partly because new business owners are not studying and taking the time to truly learn their market. If you are thinking about becoming a nurse staff agency owner, let RNS-RD help you jump- start your plan!

The Symposium on Vertical Reference Systems (VeReS) was initiated on the occasion of the XXII General Assembly of the International Union of Geodesy and Geophysics (IUGG), Birmingham 1999, by Professor Dr. Wolfgang Torge, Past President of the International Association of Geodesy (IAG) and representative of IAG to the Pan-American Institute of Geography and History (PAIGH). The idea was to organise another joint symposium of IAG and PAIGH like the previous one held during the XX IUGG General Assembly at Vienna, Austria, in 1991. Good reasons for such a joint symposium were the great success and the ongoing activities of the Project on the South American Geocentric Reference System (Sistema de Referencia Geocentrico para America del Sur, SIRGAS) being sponsored by IAG and PAIGH since 1993. The SIR GAS Project (Working Group I) had presented a continental South American reference

frame of 58 stations during the IAG Scientific Assembly at Rio de Janeiro, in 1997. This reference frame was already adopted by several South American countries as the basis for their new national horizontal geodetic datums (SIRGAS Working Group II). To overcome the problems of the heterogeneous vertical (height) datums between the individual countries, SIRGAS had installed its Working Group III "Vertical Datum" in 1997. As the discussion on the unification of vertical reference systems is also going on in IAG and other bodies of science and practice, it was decided to dedicate the symposium to this topic.
