A VAMPIRE IN ZOMBIELAND You wouldn't like Coburn. People don't, as a rule. And that's okay, because he doesn't like people much either. People are food. Five years ago, Coburn went to sleep – wasn't exactly planned – and he's just woken up to find most everybody in the world dead. Not dead like him; he looks human, drinks blood. He's smart. They're... none of those things. They outnumber him by about a million to one, and their clotted blood cannot sustain him. Now he's starving, and on the run. He has to find blood, soon, and – like it or not – he's gonna have to keep an eye on the frail flesh-bags he finds it in. Time for the wolf to turn shepherd. No, Coburn doesn't like people. But he'll have to learn to.

The M16 rifle is one of the world's most famous firearms, iconic as the American weapon of the Vietnam War—and, indeed, as the U.S. military's standard service rifle until only a few years ago. But the story of the M16 in Vietnam is anything but a success story. In the early years of the war, the U.S. military had a problem: its primary infantry rifle, the M14, couldn't stand up to the enemy's AK-47s. The search was on for a replacement that was lighter weight, more durable, and more lethal than the M14. After tests (some of which the new rifle had failed) and debates (more than a few rooted in the army brass's resistance to change), Secretary of Defense Robert McNamara ordered the adoption of the M16, which was rushed through production and rushed to Vietnam, reaching troops' hands in early 1965. Problems appeared immediately. Soldiers were often not adequately trained to maintain the new rifle (in fact some were told the new rifle was "self-cleaning"), nor were they always given cleaning supplies or instructions. The harsh jungle climate corroded the rifle's chamber, exacerbated by the manufacturer's decision against chrome-plating the chamber. The ammunition that accompanied the rifles sent to Vietnam was incompatible with the M16 and was the principal cause of the failure to extract malfunctions. The result was the M16 often jammed, making the rifle "about as effective as a

muzzleloader,” in the words of one officer. Men were killed in combat because they couldn’t return fire until the malfunction was cleared. Congress investigated and the rifle and its ammunition were incrementally modified, greatly improving its reliability over the next few years. Troop training was also improved. But the damage to the M16’s reputation could not be undone, and many soldiers remained deeply skeptical of their rifle through the war’s end. Misfire combines insider knowledge of U.S. Army weapons development with firsthand combat experience in Vietnam to tell the story of the M16 in Vietnam. Even as it details the behind-the-scenes development, tests, and debates that brought this rifle into service, the book also describes men and M16s in action on the battlefield, never losing sight of the soldiers who carried M16s in the jungles of Vietnam and all too often suffered the consequences of decisions they had nothing to do with.

The full examination of the incident and aftermath in the story of a man who built a tank out of a bulldozer and sought revenge against his perceived enemies in the small town of Granby, Colorado. He wreaked havoc and destroyed numerous buildings with his monstrous machine before taking his own life in a stand-off with law enforcement. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

When the battle to protect the ancient trees heats up, sides are chosen and lines are crossed. When difficulties disrupt plans, some people are willing to do just about anything to prove their points, even if exploiting the legendary Bigfoot

compromises their beliefs and ideals. Indicator species like the spotted owl and the marbled murrelet have proven to be an exceptional tool in regulating timber harvest along California's North Coast. But for an elite group of environmental activists, it just wasn't enough. While a group of Bigfoot researchers probe the wilderness to prove the creature existence, others use the legend to protect thousands of privately owned forests'. Backed by media attention and public support, things run smoothly until something goes terribly wrong. The outcome takes the issues into the wilderness, one of the largest remaining continuous groves of ancient trees, and into a place where neither party ever expected to go.

A new edition of a classic: the first complete picture of the public-health approach to gun violence

From their founding in the 1820s up to the modern age, the Texas Rangers have shown the ability to adapt and survive. Part of that survival depended on their use of firearms. The evolving technology of these weapons often determined the effectiveness of these early day Rangers. John Coffee "Jack" Hays and Samuel Walker would leave their mark on the Rangers by incorporating new technology which allowed them to alter tactics when confronting their adversaries. The Frontier Battalion was created at about the same time as the Colt Peacemaker and the Winchester 73—these were the guns that "won the West." Firearms of the Texas Rangers, with more than 180 photographs, tells the history of the Texas Rangers primarily through the use of their firearms. Author Doug Dukes narrates famous episodes in Ranger history, including Jack Hays and the Paterson, the Walker Colt, the McCulloch Colt Revolver (smuggled through the Union blockade during the Civil War), and the Frontier Battalion and their use of the Colt Peacemaker and Winchester and Sharps carbines. Readers will delight in learning of Frank Hamer's marksmanship with his Colt Single Action Army and his Remington, along with Captain J.W. McCormick and his two .45 Colt pistols, complete with photos. Whether it was a Ranger in 1844 with his Paterson on patrol for Indians north of San Antonio, or a Ranger in 2016 with his LaRue 7.62 rifle working the Rio Grande looking for smugglers and terrorists, the technology may have changed, but the gritty job of the Rangers has not.

Excerpt: The Mini-14, Mini Thirty, and Mini-6.8 are small, lightweight semi-automatic carbines manufactured by the U.S. firearms company Sturm, Ruger. The Mini-14 non-target versions can fire both the .223 Remington cartridge and the similar military 5.56x45mm cartridge. The target model Mini-14 rifles are chambered only for the .223 Remington cartridge. The Mini Thirty uses the 7.62x39mm and the Mini-6.8 fires 6.8 mm Remington SPC. Ruger offered a selective fire variant of the Mini-14, the AC-556, to police and military customers. AC-556 models have a slightly longer receiver

(shared with early production "series 180" models) to allow for full automatic operation. These models are available with features such as short barrels and bayonet lugs. The Mini-14GB model is a semi-automatic variant for police and military sale with the additional factory options of a short barrel, folding paratrooper stock, flash suppressor and a bayonet lug. Designed by L. James Sullivan and William B. Ruger, the rifle employs an investment cast, heat-treated receiver and a version of the M1 rifle locking mechanism with a self-cleaning, fixed-piston gas system. The Mini-14 product page describes it as a "simple, rugged Garand-style breechbolt locking system, with a fixed-piston gas system and self-cleaning, moving gas cylinder...".

"An eye-opening and riveting account of how guns make it into the black market and into the hands of criminals and drug lords."

—Adam Winkler The gun control debate is revived with every mass shooting. But far more people die from gun deaths on the street corners of inner city America and across the border as Mexico's powerful cartels battle to control the drug trade. Guns and drugs aren't often connected in our heated discussions of gun control-but they should be. In Ioan Grillo's groundbreaking new work of investigative journalism, he shows us this connection by following the market for guns in the Americas and how it has made the continent the most murderous on earth. Grillo travels to gun manufacturers, strolls the aisles of gun shows and gun shops, talks to FBI agents who have infiltrated biker gangs, hangs out on Baltimore street corners, and visits the ATF gun tracing center in West Virginia. Along the way, he details the many ways that legal guns can cross over into the black market and into the hands of criminals, fueling violence here and south of the border. Simple legislative measures would help close these loopholes, but America's powerful gun lobby is uncompromising in its defense of the hallowed Second Amendment. Perhaps, however, if guns were seen not as symbols of freedom, but as key accessories in our epidemics of addiction, the conversation would shift. Blood Gun Money is that conversation shifter.

The world has grown complacent. Secretly lulled into a dangerous state of contentment. Only a unique few, the "specials", are immune to the hypnotic effects of the insidious gaming technology addicting all of mankind. The world's most secret A.I. platform has it's own agenda. World domination and immortality. Two important Army Rangers have gone AWOL and are being hunted. Three young adults, "specials", are on a quest to find the reasons they were sent to C.A.M.P. All have a date with destiny that will change the world.

This textbook instructs patrol officers in their roles and responsibilities as first responders, with attention to new and evolving threats and responses to incidents that have broadened the scope of responsibility of the patrol officer. The first of the five parts of the book contains four chapters on patrol officer's preparation and conditioning. These chapters focus on the importance and features of mental and physical fitness

and preparing for various police encounters, some of which may involve a fight for survival. The four chapters of Part 2 address training and equipment. The chapters discuss the principles of combat shooting, the specifications of intermediate rifles for use in patrol work, specialty impact systems that can be used as less-lethal force options, and first responders' recognition of explosives. Part 3 consists of three chapters on various types of patrol procedures: the use of police dogs in patrol operations, vehicle stops, and building searches. The four chapters of Part 4 consider patrol responses to critical incidents. One chapter instructs patrol officers in the responsibilities of first responders at the scene of a hostage/barricade/suicide incident. A second chapter describes the tactic of "immediate action/rapid deployment," which is recommended for patrol officers who are the first responders to a violent attack in progress that involves multiple actual and potential victims. A third chapter describes the planning and implementation of procedures for a unified command when multiple agencies are responding to a mass disaster. A fourth chapter focuses on knowledge and procedures used by first responders in their handling of disasters caused by terrorists' weapons of mass destruction. The three chapters of Part 5 instruct patrol officers in preparing for civil litigation that alleges violations of constitutional rights due to officer actions.

Join veteran crime-fighter Stephen Smith on a journey through the dark and dangerous world of the Metropolitan Police specialist firearms command from its inception in 1966, when the cold-blooded murder of three police officers sparked a revolution in the training of armed officers, to the present day. This unique police unit battled against the IRA in the 1970s, experienced its first operational shootings in the 1980s and underwent massive expansion in the 1990s. In the new millenium it fought against Dome raiders, kidnappers, and al-Qaeda terrorists, then worked to provide London with a secure environment in which to host the 2012 Olympic Games. From a gunman ordering cannabis smuggled in fried chicken during a siege to a deranged killer holding toddlers hostage, London's armed police have seen it all. With his wealth of first-hand experience, Stephen Smith has woven together historic and up-to date accounts of perilous and often famously controversial firearms operations across England's capital. Using hundreds of photographs, illustrations and drawings from several archived sources, this fascinating volume spans five decades of the Metropolitan Police's fight against crime and many of its photographs and illustrations have never been published before. Packed with detail and intrigue, 'Stop! Armed Police!' is a must-have for those with an interest in police firearms matters and is a captivating behind-the-scenes look at the dangerous business of policing London's streets.

Whether you are a first-time rifle-owner or a longtime rifle enthusiast, Gun Trader's Guide to Rifles is an invaluable tool to read before stepping foot in that dealer's store or attending a gun show.

Food, water, and shelter are very important to survival. But you must also be ready to protect what is yours, because if somebody stronger, better prepared, and better equipped takes it all away, you will die. Your family will die. The only way to protect them is with firearms. Written with the law-abiding civilian in mind, Prepper Guns covers the firearms and tools needed to survive, not only for defense, but also for foraging. It is a comprehensive look at the realities of the firearms a prepper should have. Written by Bryce M. Towsley, a firearms expert and a full-time gun writer with thirty years of experience, it steps away from the "conventional wisdom" that is often spouted by prepper publishing and takes a hard, honest, look at the reality of the firearms, ammo, tools and training needed to survive at home and on the road. Prepper Guns takes a careful look at each category of firearms, ammo, sights, and accessories. Other topics include gun care and maintenance, as well as some simple gunsmithing and reloading to keep firearms repaired and ammo on hand. Finally, Prepper Guns has training suggestions and drills, plus a look at the psychology of survival, using the expertise of some of the top people in the world in these fields. If you are worried that bad things are coming

Wyoming game warden Joe Pickett's hunt for a fugitive reveals a conspiracy in this taut thriller in the #1 New York Times bestselling series. Joe Pickett always liked Butch Roberson—a hardworking local business-owner whose daughter is friends with his own. Little does he know that when Butch says he is heading into the mountains to scout elk, he is actually going on the run. Two EPA employees have been murdered, and all signs point to Butch as the killer. Soon, Joe hears of the land Butch and his wife had bought to retire on—until they are told the EPA declared it a wetland—and the penalties they charged Butch until the family was torn apart by debt. Finally, it seems, the man just cracked. It's an awful story. But is it the whole story? The more Joe investigates, the more he begins to wonder—and the more he finds himself in the middle of a war in which he must choose sides. Sonny Graham is a hotshot businessman on his way up the corporate ladder. He has a beautiful wife, two terrific children, a big house and a booming career. On the surface everything is perfect in his upscale life. But danger is lurking nearby as someone from Sonny's past is stalking his family with the intent of settling old scores. In an instant Sonny's world is turned upside down and his family is in great peril, fleeing for their lives. The situation intensifies as the lunatic gets bolder and grows closer. It is just a matter of time before there is a confrontation and everyone knows that the outcome could be very ugly.

We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.
