Over the past two decades ultrasound has undergone numerous advances in technology such as gray-scale imaging, real-time sonography, high resolution 7.5-10 MHz transducers, and color-flow Doppler. This makes ultrasound unsurpassed in its ability to provide very accurate images of the thyroid gland quickly, inexpensively, and safely. However, in spite of these advances, ultrasound remains drastically underutilized by endocrinologists. In part, this is due to a lack of understanding of the ways in which ultrasound can aid in the diagnosis of various thyroid conditions and to a lack of experience in the ultrasound technique by the clinician. Thyroid Ultrasound and Ultrasound-Guided FNA Biopsy presents a `hands-on' approach to

using ultrasound in the clinical evaluation and management of thyroid disease. It is written specifically for the clinician and discusses the subtleties one needs to be aware of in using this technique. Particular attention is paid to using ultrasound in conjunction with FNA biopsy. New technology such as three-dimensional ultrasound, color-flow Doppler, and percutaneous injection of cysts and nodules are discussed and demonstrated. Numerous ultrasound examples are used to show the interactions between ultrasound and tissue characteristics and explain their clinical significance. Also presented is the work of several groups of investigators worldwide who have explored new applications of ultrasound, that has led to novel techniques that are proving clinically useful.

Nordic Journal of Music Therapy Group music therapy has been widely practised for many years, especially within institutional settings, and features substantially in training, yet there has been no publication devoted to the discussion of this area of therapy. Music Therapy and Group Work fills this gap by bringing together the experiences of group music therapy practitioners who work with diverse client groups in various settings. Whilst acknowledging that the practice of group music therapy incorporates many theoretical and practical issues in common with those of mainstream group work, the editors emphasize that this field needs to develop some further theoretical discourse of its own, primarily because its main contrast from regular group work is that it draws on a non-verbal medium alongside the ordinary verbal exchange. The book combines clinical examples with theory to provide a comprehensive introduction to group music therapy. Practitioners not only of music therapy, but also those working in related disciplines, will find this to be an informative and stimulating read.
