A houseful of pets has declared their independence--but now they're fighting like cats and dogs! In Peter Hannan's delightfully absurd, illustrated chapter book PETLANDIA, a family of pets has kicked their snoring, sniveling humans to the curb, and declared the house an independent nation. But who will lead the new country of Petlandia? Tricky feline (and dictator-wannabe) Mrs. Wigglesworth is expecting to be waited on like a queen. It's all foot rubs and ice cream sundaes from here on out! But doofy dog Grub and his lovesick sidekick Honeybaked Hamster want equal representation, and they have the masses on their side. It's a dog-eat-dog world, and soon Petlandia has descended into all-out civil war!

Proposes that virtues are skills that we can work on improving, using psychological research on self-regulation and expertise.

Tim Coates tells the story of the English sea-side fishermen's town that became the home of Benjamin Britten's Music festival.

On August 25, 1974, along the Rio Grande River near the Texas border town of Presidio, a thunderous explosion in the sky shattered the stillness of the warm summer night. An unidentified flying disc traveling at 2,000 miles per hour collided with a small airplane heading south from El Paso, Texas. The flaming wreckage of both aircraft fell to the Mexican desert below, igniting a desperate race by two governments to recover technology from beyond the stars. This book was the basis for an episode of the History Channel's "UFO Hunters" television series. **REVIEWS:** "Amazing! This story is wilder than the U.S. Roswell. This book is an amazing piece of work." - George Noory, Coast to

Coast AM. "A very nice and thorough job." Jim Marrs, Bestselling Author. "Noe and Ruben are to be commended." - Stanton T. Friedman, UFO Researcher.

Rethinking Readiness offers a new set of competencies to replace the narrow learning goals of No Child Left Behind and, in chapters written by some of the nation's most well-respected education scholars, explores their implications for schools. Today's students must cultivate the full range of intellectual, interpersonal, and intrapersonal capacities that have been grouped together under the banner of "deeper learning." Rethinking Readiness focuses on how educators and policy makers should move forward to provide the educational experiences that students need to become truly well prepared for college, careers, and civic life, including changes in curriculum, teacher evaluation, and student assessment. As state leaders chart a new course for K-12 education in the Every Student Succeeds Act era, Rethinking Readiness offers a succinct and compelling vision for a new agenda for school reform so future

generations can prosper in a rapidly changing world. An introduction to linear time playing. The first section contains basic exercises for linear playing skills: voice coordination, dynamic balance, accenting, and more. The second section deals with the development of time feels in the linear style, including 4/4, half-time, shuffle, and odd meter feels. Selected from the two volumes of Bartók's For Children, these 42 works were written without octaves to fit the hands of younger players. Each piece has a descriptive title, with half including the words "song" or "dance". Like much of the composer's writing, the pieces directly reflect the use of folk idioms.

(Schirmer Performance Editions). The engaging yet simple Viennese sonatinas have been part of standard piano literature since soon after Mozart's death. This new edition provides helpful, practical direction for playing in the Classical style and an excellent recording by the editor. Intermediate Level.

Young Adult Resources Today: Connecting Teens with Books, Music, Games, Movies, and More is the first comprehensive young adult library services textbook specifically written for today's multidimensional information landscape. The authors integrate a research-focused information behavior approach with a literature-focused resources approach, and bring together in one volume key issues related to research, theory, and practice in the provision of information services to young adults. Currently, no single book addresses both YA information behaviors and information resources in any detail; instead, books tend to focus on one and give only cursory attention to the other. Key features of this revolutionary book include its success in: Integrating theory, research, and practice Integrating implications for practice throughout the book Integrating knowledge of resources with professional practice as informed by

research Integrating both print and electronic formats throughout—within the resource chapters (including websites and social media) Latham and Gross accomplish all this while, paying particular attention to the socially constructed nature of young adulthood, diversity, YA development, and multiple literacies. Their coverage of information landscapes covers literature (with detailed coverage of both genres and subgenres), movies, magazines, web sites, social media, and gaming. The final chapter cover navigating information landscapes, focusing on real and virtual YA spaces, readers' advisory, programming, and collaboration. Special attention is paid to program planning and evaluation.

A diverse group of scholars redefine constructionism--introduced by Seymour Papert in 1980--in light of new technologies and theories. Constructionism, first introduced by Seymour Papert in 1980, is a framework for learning to understand something by making an artifact for and with other people. A core goal of constructionists is to respect learners as creators, to enable them to engage in making meaning for themselves through construction, and to do this by democratizing access to the world's most creative and powerful tools. In this volume, an international and diverse group of scholars examine, reconstruct, and evolve the constructionist paradigm in light of new technologies and theories.

A beautiful collection of the legendary thinker's short stories *The Storyteller* gathers for the first time the fiction of the legendary critic and philosopher Walter Benjamin, best known for his groundbreaking studies of culture and literature, including *Illuminations*, *One-Way Street* and *The Arcades Project*. His stories revel in the erotic tensions of city life, cross the threshold between rational and hallucinatory realms, celebrate the importance of games, and delve into the peculiar relationship between gambling and fortune-telling, and explore the themes that defined Benjamin. The novellas, fables, histories, aphorisms, parables and riddles in this collection are brought to life by the playful imagery of the modernist artist and Bauhaus figure Paul Klee.

Not an autobiography in the customary sense,

Benjamin's recollection of his childhood in an upper-middle-class Jewish home in Berlin's West End at the turn of the century is translated into English for the first time in book form.

Reviews English grammar and offers practice tests with answer keys.

A new collection of essays on literature and sexuality by one of the wittiest and most iconoclastic critics writing today.

Rheinhardt, a disk jockey and failed musician, rolls into New Orleans looking for work and another chance in life. What he finds is a woman physically and psychically damaged by the men in her past and a job that entangles him in a right-wing political movement. Peopled with civil rights activists, fanatical Christians, corrupt politicians, and demented Hollywood stars, *A Hall of Mirrors* vividly depicts the dark side of America that erupted in the sixties. To quote Wallace Stegner, "Stone writes like a bird, like an angel, like a circus barker, like a con man, like someone so high on pot that he is scraping his shoes on the stars."

The thrilling new novel, inspired the events at Jonestown in the 1970s.

A new translation of philosopher Walter Benjamin's work as it pertains to his famous essay, "The Storyteller," this collection includes short stories, book reviews, parables, and as a selection of writings by other authors who had an influence on Benjamin's work. "The Storyteller" is one of Walter Benjamin's most important essays, a beautiful and suggestive meditation on the relation between narrative form, social life, and individual existence—and the product of at least a decade's work. What might be called the story of *The Storyteller Essays* starts in 1926, with a piece Benjamin wrote about the German romantic Johann Peter Hebel. It continues in a series of short essays, book reviews, short stories,

parables, and even radio shows for children. This collection brings them all together to give readers a new appreciation of how Benjamin's thinking changed and ripened over time, while including several key readings of his own—texts by his contemporaries Ernst Bloch and Georg Lukács; by Paul Valéry; and by Herodotus and Montaigne. Finally, to bring things around, there are three short stories by “the incomparable Hebel” with whom the whole intellectual adventure began.

Considered by many to be Lithuania's most important work of modernist fiction, this novel tells the story of Antanas Garsva, an emigre poet working as an elevator operator in a large New York hotel in the 1950s.

This picture book tells the story of the Savior's journey from Palm Sunday to Easter in poetry and art. This Easter book focuses on the Savior's love as He gives His life for the sins of all, and continues with scenes from the resurrection and Jesus' appearance to the women and His disciples. (Luke 23?24) The language is simple, but poetic, retelling the account of the resurrection while remaining true to the biblical text. The focus is on the mercy and love of God, poured out through the sacrifice of Jesus, and brought to us by Word and Sacrament.

Broadband technology is changing our lives, our economy, and our culture. By making it possible to access, use, and share information, news, and entertainment with ever increasing speed, broadband knits geographically-distant individuals and businesses more closely together, increases our productivity, and enriches our quality of life. In so doing, it fuels economic growth and job creation that, in turn, provide unparalleled new opportunities for

our nation's citizens. The procompetition telecommunications policies underpinning the administration's broadband strategy is examined in this book. Among other things, it stabilised the market for planning and investment, provided needed spectrum resources to expand existing services and support new innovations, and spurred the development and deployment of technologies and infrastructure necessary to deliver them. The same technology that enables governments, banks, corporations and other institutions to manage affairs of state and international finance and trade now makes critical contributions to health care, education, public safety, and the productivity of individuals and small businesses, as well as a host of other activities. The swift growth in broadband technologies and services that has occurred over the last several years are also discussed in this book. Though published during his lifetime, Walter Benjamin's dream notes and theoretical reflections on dreams are collected here for the first time in a single volume. Dreams highlights a dimension of Benjamin's thinking that was invaluable for his writing and thought but which has thus far received little attention. The first section, "Dream Notes," is a comprehensive and chronological collection of Benjamin's transcriptions of his own dreams and includes unpublished manuscript materials. The second section, "On Perception of Dreams:

Awakening and Dream," features his theoretical reflections on dreams, ranging from short aphorisms and longer analyses of dream literature and the history of dreams to the political conception of a "dreaming collective" and its awakening. Editor Burkhardt Lindner describes Benjamin's literary approach to his own dreams in the epilogue and gives a sketch of Benjamin's own definition of the dream sphere, independent of and in contrast to Surrealism and Freud's interpretation of dreams. This handsome, pocket-sized reader presents Benjamin as both a great dreamer and an important theorist of dreams. Walter Benjamin (1892-1940) is one of the 20th century's most influential theorists and critics. A member of the Frankfurt school alongside Theodor Adorno, Ernst Bloch and Max Horkheimer, he also maintained close friendships with thinkers such as Marxist theorist Georg Lukács, playwright Bertolt Brecht and Kabbalah scholar Gershom Scholem. Among Benjamin's best-known works are the essays "The Task of the Translator" (1923), "The Work of Art in the Age of Mechanical Reproduction" (1936) and "Theses on the Philosophy of History" (1940). His major work as a literary critic included essays on Baudelaire, Goethe, Kafka, Kraus, Leskov, Proust, Walser and Scheerbart. In 1940, at the age of 48, Benjamin committed suicide in Portbou at the French-Spanish border while attempting to escape from invading

Nazi forces.

The sinister powers who ruled Silver Rock thought ex-marshal Rowan Emmett had secretly cached a fortune in silver bullion and they demanded a slice of the loot.
