At its best, educational television can provide children with enormous opportunities and can serve as a window to new experiences, enrich academic knowledge, enhance attitudes and motivation, and nurture social skills. This volume documents the impact of educational television in a variety of subject areas and proposes mechanisms to explain its effects. Drawing from a wide variety of research spanning several disciplines, author Shalom M. Fisch analyzes the literature on the impact of educational resources. He focuses on television programs designed for children rather than for adults, although adult literature is included when it is particularly relevant. In addition, much of the discussion concerns the effects of unaided viewing by children, rather than viewing in the context of adult-led follow-up activities. The role of parent-child co-viewing and issues relevant to the use of television in school or child care also receives consideration. This volume is intended to make the disparate literature on educational television's impact more accessible, by bringing it together into a centralized resource. To that end, the volume draws together empirical data on the impact of educational television programs--both academic and prosocial--on children's knowledge, skills, attitudes, and behavior. In addition to its emphasis on positive effects, this volume addresses a gap in the existing research literature regarding children's learning from exposure to educational television. Acknowledging that little theoretical work has been done to explain why or how these effects occur, Fisch takes a step toward correcting this situation by proposing theoretical models to explore aspects of the mental processing that underlies children's learning from educational television. With its unique perspective on children's educational television and comprehensive approach to studying the topic, this volume is required reading for scholars, researchers, and students working in the area of children and television. It offers crucial insights to scholars in developmental psychology, family studies, educational psychology, and related areas.

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

Now in paperback, Paine's essential American writings in authoritative Library of America texts: After a life of obscurity and failure in England, Thomas Paine came to America in 1774 at age 37. Within fourteen months he published Common Sense, the most influential pamphlet of the American Revolution, and began a career that would see him hailed and reviled in the American nation he helped create. In Common Sense, Paine sets forth an inspiring vision of an independent America as an asylum for freedom and an example of popular self-government in a world oppressed by despotism and hereditary privilege. The American Crisis, begun during "the times that try men's souls" in 1776, is a masterpiece of popular pamphleteering in which Paine vividly reports current developments, taunts and ridicules British adversaries, and enjoins his readers to remember the immense stakes of their struggle. They are joined in this invaluable reader by a selection of Paine's other American pamphlets and his letters to George Washington, Thomas Jefferson, and others.

The first year of college can be challenging for many reasons. The classes are harder, the schedule is more demanding, and you will be expected to manage everything on your own, perhaps for the first time in your life. And the papers! You have to write so many papers! But there is help available for the papers, at least.
