Market\_Desc: Consultants, IS managers, and project team members for FI/CO systems. Also, end users who have been left to maintain a system after a project's conclusion. Special Features: " Only book on the market for SAP team members who need to configure and customize the FI/CO module. Covers configuration issues in far more depth than other books, which focus on the theory of FI/CO and functionality from only an end-user perspective." The book's approach is ideally suited to the needs of the audience. The emphasis is on teaching people how to configure the system to deliver functionality. The authors use case studies and detailed tables to explore the variations in setup depending on the environment the module is being used in." FI and CO are the most widely used of the SAP modules, both domestically and abroad. About The Book: SAP is the leading ERP (Enterprise Resource Planning) product in the market, with more than 30 percent market share. FI/CO, the Financial and Controlling modules, are the most popular modules in the package and are used by thousands of SAP customers in various industries. (20,000 companies have installed SAP; more than half have the financial package). Configuring and customizing the SAP modules is still one of the most expensive and time-consuming parts of the implementation, because consultants are expensive and support from SAP is slow. This book is valid for both versions 3.x and 4.x of R/3.

This book provides Finance professionals, Treasurers, and CFOs with a roadmap for making their SAP processes compliant with SOX requirements. Combining comprehensive coverage of the major applications (Electronic Banking, Positive Pay, Cash & Liquidity Management, In-House Cash) with discussion of relevant control structures, processes, and compliance matrices for each, this book lends guidance to those tasked with integrating SOX compliance into established or proposed SAP implementations. The authors focus first on processes (e.g., intercompany processing), then expand to specific applications (e.g., In-House Cash), followed by a summary of the associated controls (e.g., domestic vs. foreign processing). Functional-level finance professionals involved in the daily management of a Treasury implementation, particularly, will find many proven processes with which to build or enhance effective compliance strategies.

This book on 'Configuring SAP Accounts Receivable & Accounts Payable (SAP S/4HANA Finance)' covers: Case Study Accounts Receivable and Accounts Payable Customer Accounts Vendor Accounts Incoming Invoices / Credit Memos Release for Payment Outgoing Payments Outgoing Invoices / Credit Memos Incoming Payments Payments with Payment Cards Dunning Open Item Clearing Down Payment Received Down Payment Made Adjustment Posting / Reversal Interest Calculation Closing Information System Apps for FI-A/R & FI-A/P The book starts with a case study that forms the basis for further discussions across the various Chapters. The case study mirrors a real life business enterprise that wants to implement SAP Accounts Receivable and Accounts Payable components, as a part of configuring SAP FI. The book provides an overview of SAP Accounts Receivable (FI-A/R) and Accounts Payable (FI-A/P). It, then, goes on to discuss customer and vendor accounts, in detail. It outlines the structure of customer / vendor master records, and elaborates the preparations and the configuration settings that you may need to make in the system to create / change / delete the master records. It discusses the various business transactions of both FI-A/R and FI-A/P viz., incoming invoices / credit memos, release for payment, outgoing payments, outgoing invoices / credit memos, incoming payments, payments with payment cards, dunning, open item clearing, down payment received / made, adjustment posting / reversal, interest calculation, closing, information system and Apps for SAP FI-A/R and FI-A/P. It helps you to comprehend the configuration activities that you need to complete, in setting up these transactions in the system. For example, on configuring the settings for outgoing payments, it discusses (in detail) the global settings and the steps that are required for setting up the manual and the automatic payments. In dunning, it deals with basic settings, dunning procedure, printout, dunning process flow etc. In interest calculation, it starts with the fields (in customer / vendor master) that are relevant for item interest calculation and goes on to discuss the interest calculation process, global settings, actual interest calculation, interest posting and interest letters. In closing, it discusses the important closing operations like count (including balance confirmation), valuate and reclassify, in great detail. The book also discusses the FI-A/R and FI-A/P information system besides discussing the Apps for accounts receivable / accounts payable accountants, managers and credit controllers. As with my other books on SAP, this also follows a case-study approach to make your learning easy. Every effort has been taken to guide you, step-by-step, in configuring your SAP system in implementing SAP Accounts Receivable and Accounts Payable, in SAP S/4HANA (1909), to meet your exact business needs. Each configuration activity has been discussed with appropriate screen shots (from an SAP system) and illustrations to help you 'see' what is being discussed in that activity / step. You will see a lot of additional information, provided across the Chapters and the Sections, to help you understand better a topic or a setting or a concept. The entire content of the book, vide various Chapters, has been presented as in SAP IMG (Implementation Guide) for easy comprehension. You will come across with appropriate menu paths and Transactions, to help you to navigate the various configuration activities. In all, you can use this book as a desktop-reference for configuring SAP FI-A/R and FI-A/P.

SAP ABAP (Advanced Business Application Programming) offers a detailed tutorial on the numerous features of the core programming platform, used for development for the entire SAP software suite. SAP ABAP uses hands on business oriented use cases and a valuable dedicated e-resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the latest version (NetWeaver 7.3 and SAP application programming release 6.0) of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive, practical one stop solution, which demonstrates and conveys the language's commands and features through hands on examples. The accompanying e-resource is a take off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature/command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities.
