Every day we share encounters with others as we inhabit the space around us. In offering insights and knowledge on this increasingly important topic, this book introduces a range of empirical and theoretical approaches to the study of shared encounters. It highlights the multifaceted nature of collective experience and provides a deeper understanding of the nature and value of shared encounters in everyday life. Divided into four sections, each section comprises a set of chapters on a different topic and is introduced by a key author in the field who provides an overview of the content. The book itself is introduced by Paul Dourish, who sets the theme of shared encounters in the context of technological and social change over the last fifteen years. The four sections that follow consider the characteristics of shared encounters and describe how they can be supported in different settings: the first section, introduced by Barry Brown, looks at shared experiences. George Roussos, in the second section, presents playful encounters. Malcolm McCulloch introduces the section on spatial settings and – last but not least – Elizabeth Churchill previews the topic of social glue. The individual chapters that accompany each part offer particular perspectives on the main topic

and provide detailed insights from the author's own research background. A valuable reference for anyone designing ubiquitous media, mobile social software and LBS applications, this volume will also be useful to researchers, students and practitioners in fields ranging from computer science to urban studies.

The Gilded Age (1865-1918) saw the sudden rise of America's first High Society, including such prominent families as the Astors, Whitneys, and Vanderbilts. As an aristocracy based on fortunes recently acquired, these families endeavored to live like Europe's blue-blooded nobility, shedding Puritan restraint as they joyously flaunted their new wealth--especially where their homes were concerned. They erected French chateaus and Italian palazzos on New York's Fifth Avenue, at Newport, and elsewhere, often taking inspiration from Parisian styles of the Second Empire. They rejected more modest American styles just as they rejected middle-class society, and for interior decoration they turned to such artisans as Tiffany, Herter Brothers, and Allard's of Paris. Immensely readable and illuminated with 250 stunning color and black-and-white illustrations, this is the fascinating story of America's first millionaire society, the way they lived and partied, and the lush artistic and cultural legacy they established.

Atomic Ranch is an in-depth exploration of post-World War II residential architecture in America. Mid-century ranches (1946-1970) range from the decidedly modern gable-roofed Joseph Eichler tracts in the San Francisco Bay area and butterfly wing houses in Palm Springs, Florida, to the unassuming brick or stucco L-shaped ranches and split-levels so common throughout the United States. Authors Michelle Gringeri-Brown and Jim Brown, founders and publishers of the popular quarterly Atomic Ranch magazine, extol the virtues of the tract, split-level, rambler home and its many unique qualities: private front facades, open floor plans, secluded bedroom wings, walls of glass, and an easy-living lifestyle. From updated homes with high-end Italian kitchens, terrazzo floors, and modern furniture to affordable homeowner renovations with eclectic thrift-store furnishings, Atomic Ranch presents twenty-five homes showcasing inspiring examples of stylish living through beautiful color photographs, including before and after shots, design-tip sidebars, and a thorough resource index.
