The first in a series of piloted head-up display (HUD) flight symbology studies (TRISTAR) measuring pilot task performance was conducted at the NASA Ames Research Center by the Tri-Service Flight Symbology Working Group (FSWG). Sponsored by the U.S. Army Aeroflightdynamics Directorate, this study served as a focal point for the FSWG to examine HUD test methodology and flight symbology presentations. HUD climb-dive marker dynamics and climb-dive ladder presentations were examined as pilots performed air-to-air (A/A), air-to-ground (A/G), instrument landing system (ILS), and unusual attitude (UA) recover tasks. Symbolic presentations resembled pitch ladder variations used by the U.S. Air Force (USAF), U.S. Navy (USN), and Royal Air Force (RAF). The study was initiated by the FSWG to address HUD flight symbology deficiencies, standardization, issue identification, and test methodologies. It provided the mechanism by which the USAF, USN, RAF, and USA could integrate organizational ideas and reduce differences for comparisons. Specifically it examined flight symbology issues collectively identified by each organization and the use of objective and subjective text methodology and flight tasking proposed by the FSWG. New England was knocked to its knees on February 6th and 7th, 1978, by the incredible snow and wind referred to locally as the worst storm of the century, and this history combines stunning photographs with riveting text to reawaken memories of the "Blizzard of '78." Chronicling the period before the storm, the book then follows it through its progression, as it caused commuter nightmares and wreaked devastation. From Cape Cod to Connecticut, from Rhode island to Route 128, it explains how people survived the storm by spending more than 48 hours in their cars, and how coastal homes were torn from their foundations and smashed to smithereens by the vicious surf. The book records the brighter sides of the blizzard too, including neighborhood parties, cross-country skiing down abandoned highways, and the many ways that people pitched in to help total strangers. Intriguing analysis also compares the Blizzard of '78 with the Great Blizzard of 1888. This book will be cherished by anyone who survived the Blizzard of '78, as well as those spellbound by its legend.

Chance Molloy pursues a crooked senator's daughter aboard an airplane, but their flight is turbulent in more ways than one In the 1940s, air travel is still in its infancy. Seats turn into private sleepers, passengers smoke in flight, and it's no sweat to carry weapons aboard. Chance Molloy, a self-made airline owner, is dealt a blow when his plans to establish a passenger airline in South America are thwarted by a corrupt US senator. At the news, Molloy's brother, a partner in the venture, kills himself. Seeking some kind of justice, Molloy boards Flight 14 from New York to New Mexico with one goal in mind: to get acquainted with the senator's daughter, Janet Lord, a passenger on the plane. But her charms are greater than he anticipates, and Molloy's simple plan quickly becomes complicated. Also on board are three of the senator's henchmen, a corpse disguised as a passenger, and Molloy's stewardess ex-girlfriend. Soon Molloy realizes that this flight will reach a destination he hadn't anticipated.

Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and/or themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in generating key processes and events in world history. A discussion of the common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates the many ways in which societies have influenced

each other through history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unified authorial voice and offering a narrative from the ancient to the present, this is the go-to textbook for World History courses and students.
