Leadership within educational settings is widely regarded as essential for organizational effectiveness and the improvement of learning outcomes. Through an extensive review of theory and practice, Helen Gunter explores the contested field of leadership studies. She describes and critiques the different contributions made by · education management · school effectiveness · school improvement · critical studies. Leadership is examined as function, as behaviour and as leadership relationship, from students as leaders, through to headteachers. The author provides an up-to-date review of current thinking about leadership, which challenges the reader to engage wit

This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project, which explored a framework for understanding the nature of these skills. The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. The outcomes presented include evidence to support the validity of assessment of 21st century skills and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems. The sections of the volume are connected through a focus on the degree to which innovative assessment tasks measure the constructs of interest. This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer-based assessment. How understanding of the nature of the skills, as derived from these assessments, can guide approaches to the integration of 21st century skills in the classroom, is informed by initiatives adopted by participating countries. The guiding questions in this volume are: "Do the assessment tasks measure the constructs?" and "What are the implications for assessment and teaching in the classroom?" It is the third volume of papers from this project published by Springer.

In the second edition of this text, the authors critically examine the intellectual foundations of special education and consider the consequences on their influence for professional and popular thinking about learning difficulties.

“Best Intentions is that rare novel that grows more gripping and emotionally rich with every turn of the page.” —Carla Buckley Marti Traylor—social worker on hold, mother of three, wife of a successful obstetrician, daughter of a Congressman—is ready to go back to work. She’s thrilled when the perfect opportunity falls in her lap. The catch? The job is at her husband's hospital and he seems not to share her enthusiasm. Undeterred, she takes the position counseling vulnerable young women as they prepare to give birth. Marti quickly begins to feel like she is making a difference in the lives of her clients. Soon, though, she finds herself caught up in the dark side of the medical center—with its long hours, overworked

doctors and entrenched practices. When she witnesses something she can't unsee, Marti, who has always done her best to keep a low-profile, finds herself thrust under a dangerous spotlight with all of Richmond, Virginia watching. In her captivating domestic suspense novel *Best Intentions*, Erika Raskin weaves together high stakes hospital politics, the pressures of family life, and the consequences of trying to do the right thing, particularly in a city with a history as fraught as Richmond's.

Gigi merupakan anugerah Tuhan kepada semua makhluk yang memerlukannya termasuklah haiwan dan manusia. Manusia mempunyai dua set gigi asli, iaitu gigi susu dan gigi kekal dengan masing-masing berjumlah 20 dan 32. Gigi susu mula tumbuh apabila kita berusia sekitar enam bulan dan berakhir pada usia sekitar dua tahun. Gigi kekal pula akan mula tumbuh pada usia kita sekitar enam tahun dan berakhir sekitar usia kita 18 hingga 20 tahun. Fungsi utama gigi ialah mengunyah makanan, membantu penghadaman, pertuturan, kecantikan dan penampilan. Hasil penyelidikan mendapati bahawa ketiadaan gigi akan memberi kesan negatif kepada manusia dan boleh menjejaskan kualiti hidup. Namun begitu, ramai orang yang akan dan telah pun mengalami fenomena ketiadaan gigi atau gigi hilang. Antara faktor yang menyumbang kepada ketiadaan gigi atau gigi hilang ialah keturunan atau genetik, cabutan, karies, penyakit gusi, kemalangan, kecederaan, ketumbuhan, kanser oral, sindrom dan budaya setempat. Ketidadaan gigi akan menyebabkan fungsi-fungsi utama serta kualiti hidup terjejas walaupun ada juga mereka yang tidak mempunyai masalah dengan isu tersebut. Bagi menggantikan gigi yang hilang, pelbagai kaedah boleh dilakukan bergantung kepada jumlah kehilangan seperti dentur (gigi palsu), jambatan dan implan (gigi tanam). Namun begitu, kesemua rawatan yang ada pada hari ini adalah bersifat sintetik. Oleh yang demikian, ia tidak sama dengan yang asli. Disebabkan perkara tersebut, penyelidik di seluruh dunia termasuk di Pusat Pengajian Sains Pergigian, Universiti Sains Malaysia telah terlibat dengan penyelidikan sel stem. Antara matlamat jangka panjang ialah menumbuhkan semula gigi untuk menggantikan gigi yang hilang. Pada masa yang sama, sel stem juga berpotensi untuk pelbagai rawatan yang berkaitan. Hingga hari ini, projek ini telah memberikan hasil yang memberangsangkan apabila sel-sel yang berkaitan dengan gigi seperti odontoblas dan sementoblas telah berjaya dihasilkan daripada sel stem gigi susu dan gigi kekal. Namun, perjalanan masih jauh untuk menumbuhkan semula gigi dengan cabaran-cabaran yang bakal dihadapi, iaitu bagaimana untuk memulakan, mengawal dan menghentikannya.

Oleh yang demikian, penyelidikan dalam bidang ini akan diteruskan dengan matlamat utama untuk menumbuhkan gigi-gigi baharu bagi menggantikan gigi yang hilang.

As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are merging to create a new kind of classroom: CrossActionSpaces. Grounding its exploration of these co-located communication spaces in global empirical research, Digital Didactical Designs facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The Digital Didactical Design model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents critical views of contemporary education, theories of socio-technical systems and behavior patterns, and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.

“Kakak, nanti apabila adik dah pergi, adik nak minta tolong kakak boleh?” Pertanyaanku yang rawak mengejutkan kakakku yang tadi diam membisu. “Tolong kak. Tolong jaga INFINITI. Jangan biar INFINTI lenyap.” Tangisan kakakku semakin kuat. Air mata semakin laju di pipiku juga. “Adik...” Cerpen-cerpen di dalam antologi ini merupakan 29 cerpen terbaik dalam Sayembara Penulisan Cerpen Sains anjuran bersama Sekolah Seri Puteri, Cyberjaya dengan kerjasama Sekolah Berasrama Penuh dan Dewan Bahasa dan Pustaka. development research. Rich with examples and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research. Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of information and data often gathered in studies, and unique procedures for collecting these data; examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It is intended for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field.
