CFA Navigator - Level 1 Exam Navigator Study Guide

This is the first EU competition law treatise that fully integrates economic reasoning in its treatment of the decisional practice of the European Commission and the case-law of the European Court of Justice. Since the European Commission's move to a "more economic approach" to competition law reasoning and decisional practice, the use of economic argument in competition law cases has become a stricter requirement. Many national competition authorities are also increasingly moving away from a legalistic analysis of a firm's conduct to an effect-based analysis of such conduct, indeed most competition cases today involve teams composed of lawyers and industrial organisation economists. Competition law books tend to have either only cursory coverage of economics, have separate sections on economics, or indeed are far too technical in the level of economic understanding they

assume. Ensuring a genuinely integrated approach to legal and economic analysis, this major new work is written by a team combining the widely recognised expertise of two competition law practitioners and a prominent economic consultant. The book contains economic reasoning throughout in accessible form, and, more pertinently for practitioners, examines economics in the light of how it is used and put to effect in the courts and decision-making institutions of the EU. A general introductory section sets EU competition law in its historical context. The second chapter goes on to explore the economics foundations of EU competition law. What follows then is an integrated treatment of each of the core substantive areas of EU competition law, including Article 101 TFEU, Article 102 TFEU, mergers, cartels and other horizontal agreements and vertical restraints.

A Twenty-First Century Guide to Aldersonian Marketing Thought introduces readers to the life, the writings and the intellectual legacy of Wroe Alderson, the preeminent marketing thinker of the mid-twentieth century. Both Alderson's seminal contributions to marketing theory and his "best practices" articles in the areas of marketing management and ethics have been reproduced. Contributions by others about Wroe Alderson include a biography and a number of previously published articles that build on Alderson's theoretical contributions. Six original articles further explore Wroe Alderson's life, his work, his character and his intellectual impact. This book also contains two bibliographies: one of material written by Alderson over a forty year period and the other of publications that discuss his work. This single volume provides readers with an "in depth" understanding of the nature, the scope, and the magnitude of Alderson's highly original and lasting contributions to marketing theory and thought.
