This document is a summary and evaluation of methodological procedures and results for the field test of the Beginning Postsecondary Student Longitudinal Study Second Followup, 1990-94 (BPS:90/94). The BPS study is a departure from previous studies in that it starts with a cohort of individuals as they enter their postsecondary studies regardless of when they completed high school. As a result, information is becoming available about nontraditional students who have delayed the completion of their education. All types of postsecondary students (academic, vocational/occupational, and technical) are included and can be represented in known proportions. An introduction considers the background, purposes, and scheduled products of the BPS study. Chapter 2 describes study design and method. Operating control systems implemented for the study are described in chapter 3. Details and descriptions of data locating and collection activities and outcomes are given in chapter 4, and data quality is examined in chapter 5. Supporting documentation is presented in four appendixes. Eight figures and 42 tables contain information about conducting the study. (SLD)

The sixth edition of this successful textbook discusses elements of the welfare system, including cash benefits, the health service and education. The text argues that the welfare state does not exist just to help the underprivileged, but also offers efficiencies in areas where the private markets would be inefficient or would not exist at all. Suitable for both economics students and students on related disciplines, this book places the content within a theoretical framework, and uses learning features to engage students with the discussion. Each chapter is concluded with a summary of the key points and an appendix, which provides a non-technical summary for students with no previous exposure to economics. Worked examples from around the world facilitate the comparison of global welfare issues, while diagrams allow readers to visualize concepts. The author ends each chapter with 'questions for further discussion' which could be prepared to structure seminars or to independently test understanding, while an annotated list of further reading suggestions guides additional research. This book is accompanied by the following online resources. For students: - Web links - Further reading For lecturers: - PowerPoint slides
