It is difficult to find the moment when the idea for a book is first born. For this book, the basic concept was probably born during conversations I had in Parma, Italy, with Dr. Riccardi of the University of Naples and Dr. Jenkins of the University of Toronto (Canada). Later, in a conference room at the University of Verona (Italy) School of Medicine, I had a day-long meeting with Drs. Bosello and Cominacini of the University of Verona, and Drs. Jenkins and Riccardi and their co-workers. After an intense working day, the general plan of this book was completed. The title Mediterranean diets rather than diet was appropriately chosen as there is more than one Mediterranean diet, a point discussed in chapter 1. This chapter focuses on the definition of a Mediterranean diet and no matter what the reader's interest may be, it is imperative that this first chapter be carefully read. We should always remember that there are-from a preventive medicine point of view-good and poor Mediterranean diets. The best example is probably the difference between the high olive oil, high carbohydrate, low meat diet of southern Italy and the high saturated fat, higher meat diets of the northern Italians. Prevalence of disease parallels these differences. Chapter 2 covers some ancient history in an easy-to-read manner that is instructional as well as fascinating even for the nonmedical scientist or the nonhistorian.

Errata, detected in Taylor's Logarithms. London: 4to, 1792. [sic] 14.18.3 6 Kk Co-sine of 3398 3298 - Nautical Almanac (1832) In the list of ERRATA detected in Taylor's Logarithms, for cos. $4^{\circ} 18'3''$, read cos. $14^{\circ} 18'2''$. - Nautical Almanac (1833) ERRATUM of the ERRATUM of the ERRATA of TAYLOR'S Logarithms. For cos. $4^{\circ} 18'3''$, read cos. $14^{\circ} 18' 3''$. - Nautical Almanac (1836) In the 1820s, an Englishman named Charles Babbage designed and partly built a calculating machine originally intended for use in deriving and printing logarithmic and other tables used in the shipping industry. At that time, such tables were often inaccurate, copied carelessly, and had been instrumental in causing a number of maritime disasters. Babbage's machine, called a 'Difference Engine' because it performed its calculations using the principle of partial differences, was intended to substantially reduce the number of errors made by humans calculating the tables. Babbage had also designed (but never built) a forerunner of the modern printer, which would also reduce the number of errors admitted during the transcription of the results. Nowadays, a system implemented to perform the function of Babbage's engine would be classed as safety-critical. That is, the failure of the system to produce correct results could result in the loss of human life, mass destruction of property (in the form of ships and cargo) as well as financial losses and loss of competitive advantage for the shipping firm.

The right to life is the cornerstone of human rights protection. This book explores the mechanisms and procedures through which at international level the attempt is made to safeguard human life against all structural threats, even in armed conflict.

This book introduces basic programming of ARM Cortex chips in assembly language and the fundamentals of embedded system

design. It presents data representations, assembly instruction syntax, implementing basic controls of C language at the assembly level, and instruction encoding and decoding. The book also covers many advanced components of embedded systems, such as software and hardware interrupts, general purpose I/O, LCD driver, keypad interaction, real-time clock, stepper motor control, PWM input and output, digital input capture, direct memory access (DMA), digital and analog conversion, and serial communication (USART, I2C, SPI, and USB).

The book records the essential discoveries of mathematical and computational scientists in chronological order, following the birth of ideas on the basis of prior ideas ad infinitum. The authors document the winding path of mathematical scholarship throughout history, and most importantly, the thought process of each individual that resulted in the mastery of their subject. The book implicitly addresses the nature and character of every scientist as one tries to understand their visible actions in both adverse and congenial environments. The authors hope that this will enable the reader to understand their mode of thinking, and perhaps even to emulate their virtues in life.

Brief, easy-to-follow instructions are given, free from all necessary complications and repetitions, yet containing all the required technical detail and information, and many diagrams and illustrations. Compiled and illustrated by experts, this manual provides a concise source of helpful information, all of which has been crosschecked for accuracy to the manufacturer's official service and repair procedures, but many instructions have derived from actual practice to facilitate your work.

Twenty-four letters, orations, and encomia by and to Renaissance women, translated from Latin. Quattrocento Italy produced a number of such learned women; though they were granted neither great status in the world of humanism nor recognition of intellectual parity with men, they surpassed their medieval forebears and most of their contemporaries in other parts of Europe, and they transmitted to following centuries the important notion that women could participate as creative intellectuals in the shaping of culture. A brilliant virtuoso of violence, Richard Marcinko rose through Navy ranks to create and command one of this country's most elite and classified counterterrorist units, SEAL TEAM SIX. Now this thirty-year veteran recounts the secret missions and Special Warfare madness of his worldwide military career -- and the riveting truth about the top-secret Navy SEALs. Marcinko was almost inhumanly tough, and proved it on hair-raising missions across Vietnam and a war-torn world: blowing up supply junks, charging through minefields, jumping at 19,000 feet with a chute that wouldn't open, fighting hand-to-hand in a hellhole jungle. For the Pentagon, he organized the Navy's first counterterrorist unit: the legendary SEAL TEAM SIX, which went on classified missions from Central America to the Middle East, the North Sea, Africa and beyond. Then Marcinko was tapped to create Red Cell, a dirty-dozen team of the military's most accomplished and decorated counterterrorists. Their unbelievable job was to test the defenses of the Navy's most secure facilities and installations. The result was predictable: all hell broke loose. Here is the hero who saw beyond the blood to ultimate justice -- and the decorated warrior who became such a maverick that the Navy brass wanted his head on a pole, and for a time, got it. Richard Marcinko -- ROGUE WARRIOR.

You know what happens when bad boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster *Playing Doctor Attitude* makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly,

Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .
