A Grammar of Modern Indo-European is a complete reference guide to a modern, revived Indo-European language. It contains a comprehensive description of Proto-Indo-European grammar and offers an analysis of the complexities of the prehistoric language and its reconstruction. Written in a fresh and accessible style, this book focuses on the real patterns of use in a modern Europe's Indo-European language. The book is well organized and is filled with full, clear explanations of areas of confusion and difficulty. It also includes an extensive bilingual dictionary, etymological notes, and numbered paragraphs designed to provide readers easy access to the information they require. An essential reference source for the learner and user of Indo-European, this book will be the standard work for years to come.

This Treatment Improvement Protocol (TIP) reviews the use of the three Food and Drug Administration (FDA)-approved medications used to treat opioid use disorder (OUD)—methadone, naltrexone, and buprenorphine—and provides guidance for healthcare professionals and addiction treatment providers on appropriate prescribing practices for these medications and effective strategies for supporting the patients utilizing medication for the treatment of OUD. The goal of treatment for opioid addiction or OUD is remission of the disorder leading to lasting recovery. Recovery is a process of change through which individuals improve their health and wellness, live self-directed lives, and strive to reach their full potential. This TIP also educates patients, families, and the general public about how OUD medications work and the benefits they offer. Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and cross-linguistic perspective.

The book 'Delhi Riots 2020: The Untold Story' is published from ground research material on the Delhi Riots that occurred in February 2020. This material was collected by the authors and their team during their many visits to the riot-affected areas of North East Delhi. The research team met both Hindu and Muslim victims of the violence and religious leaders of both communities who attempted to de-escalate the situation. The book contains eight chapters which narrate the fact and evidence-based story of the dharna-to-danga model, planned and executed by Urban Naxal and Jihadi elements in Delhi.

This document is a brief summary of the Institute of Medicine report entitled When Children Die: Improving Palliative and End-of-Life Care for Children. Better care is possible now, but current methods of organizing and financing palliative, end-of-life, and bereavement care complicate the provision and coordination of services to help children and families and sometimes require families to choose between curative or life-prolonging care and palliative services, in particular, hospice care. Inadequate data and scientific knowledge impede efforts to deliver effective care, educate professionals to provide such care, and design supportive public policies. Integrating effective palliative care from the time a child's life-threatening medical problem is diagnosed will improve care for children who survive as well as children who die-and will help the families of all these children. The report recognizes that while much can be done now to support children and families, much more needs to be learned. The analysis and recommendations reflect current knowledge and judgments, but new research and insights will undoubtedly suggest modifications and shifts in emphasis in future years.

The Alchemy Key

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of

January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This major new study offers a broad historical and theoretical reassessment of the science fiction film genre. The book explores the development of science fiction in cinema from its beginnings in early film through to recent examples of the genre. Each chapter sets analyses of chosen films within a wider historical/cultural context, while concentrating on a specific thematic issue. The book therefore presents vital and unique perspectives in its approach to the genre, which include discussion of the relevance of psychedelic imagery, the 'new woman of science', generic performance and the prevalence of 'techno-orientalism' in recent films. While American films will be one of the principle areas covered, the author also engages with a range of pertinent examples from other nations, as well as discussing the centrality of science fiction as a transnational film genre. Films discussed include *The Day the Earth Stood Still*, *The Body Snatchers*, *Forbidden Planet*, *The Quatermass Experiment*, *2001: A Space Odyssey*, *Demon Seed*, *Star Trek: The Motion Picture*, *Star Wars*, *Altered States*, *Alien*, *Blade Runner*, *The Brother from Another Planet*, *Back to the Future*, *The Terminator*, *Predator*, *The One*, *Dark City*, *The Matrix*, *Fifth Element* and *eXistenZ*. Key Features\*Thematically organised for use as a course text.\*Introduces current and past theories and practices, and provides an overview of the main themes, approaches and areas of study.\*Covers new and burgeoning approaches such as generic performance and aspects of postmodern identity.\*Includes new interviews with some of the main practitioners in the field: Roland Emmerich, Paul Verhoeven, Ken Russell, Stan Winston, William Gibson, Brian Aldiss, Joe Morton, Dean Norris and Billy Gray.

Examines womens constructions of selfhood through film and literature in interwar Britain

*Off to the Pictures: Cinemagoing, Womens Writing and Movie Culture in Interwar Britain* offers a rich new exploration of interwar womens fictions and their complex intersections with cinema. Interrogating a range of writings, from newspapers and magazines to middlebrow and modernist fictions, the book takes the reader through the diverse print and storytelling media that women constructed around interwar film-going, arguing that literary forms came to constitute an intermedial gendered cinema culture at this time. Using detailed case studies, this innovative book draws upon new archival research, industrial analysis and close textual readings to consider cinemas place in the fictions and critical writings of major literary figures such as Winifred Holtby, Stella Gibbons, Elizabeth Bowen, Jean Rhys, Elinor Glyn, C. A. Lejeune and Iris Barry. Through the lens of feminist film historiography, *Off to the Pictures* presents a bold new view of interwar cinema culture, read through the creative reflections of the women who experienced it.

*A Grammar of Modern Indo-European* is a complete reference guide to a living Indo-European language. It contains a comprehensive description of Proto-Indo-European grammar, and offers an analysis of the complexities of the prehistoric language and its reconstruction from its descendant languages. Written in a fresh and accessible style, and illustrated with maps, figures and tables, this book focusses on the real patterns of use of Late Indo-European. The book is well organised and is filled with full, clear explanations of areas of confusion and difficulty. It also contains an extensive English - Indo-European, Indo-European - English vocabulary, as well as detailed etymological notes, designed to provide readers with an easy access to the information they require. An essential reference source for the student of Indo-European as a learned and living language, this work will appeal to students of languages, classics, and the ancient world, as well as to general readers interested in the history of language, and in speaking the direct ancestor of the world's largest language family.

A gripping tale of guilty secrets, betrayal, and racial tension, of isolation and revenge in modern-day South Africa, from the Man Booker Prize—shortlisted author of *The Good Doctor* When Adam moves into the abandoned house on the dusty edge of town, he is hoping to recover from the loss of his job and his home in the city. But when he meets Canning — a shadowy figure from his childhood — and Canning's enigmatic and beautiful wife, a sinister new chapter in his life begins. Canning has inherited a vast fortune and a giant folly in the veld, a magical place of fantasy and dreams that seduces Adam and transforms him absolutely, violently — and perhaps forever. *The Impostor* evokes a hot and cruel and claustrophobic world, in which sex and death are never far from the surface. Skilfully interweaving the story of one man's struggle to regain his moral centre with the disorienting, often tragic effects of massive social and political change, it is Galgut's most powerful and unforgettable novel yet.

town. Cassandra could not be more pleased with her newfound popularity and impressive list of eligible suitors. Will Richard take notice and come charging up on a white horse? Or will she find love where she least expects it with someone who has been around all along? The Promise is a poignant tale that will take you on a journey into the lives of childhood friends, as they experience young love, broken promises and dreams, and discover the true meaning of love everlasting.

A key decade in world cinema, the 1960s was also a crucial era of change in Spain. A Cinema of Contradiction, the first book to focus in depth on this period in Spain, analyses six films that reflect and interpret these transformations. The coexistence of traditional and modern values and the timid acceptance of limited change by Franco's authoritarian regime are symptoms of the uneven modernity that characterises the period. Contradiction--the unavoidable effect of that unevenness--is the conceptual terrain explored by these six filmmakers. One of the most significant movements of Spanish film history, the 'New Spanish Cinema' art films explore contradictions in their subject matter, yet are themselves the contradictory products of the state's protection and promotion of films that were ideologically opposed to it. A Cinema of Contradiction argues for a new reading of the movement as a compromised yet nonetheless effective cinema of critique. It also demonstrates the possible contestatory value of popular films of the era, suggesting that they may similarly explore contradictions. This book therefore reveals the overlaps between art and popular film in the period, and argues that we should see these as complementary rather than opposing areas of cinematic activity in Spain.

Examines the complexity and the humanity of the opioid epidemic America's opioid epidemic continues to ravage families and communities, despite intense media coverage, federal legislation, criminal prosecutions, and harm reduction efforts to prevent overdose deaths. More than 450,000 Americans have died from opioid overdoses since the late 1990s. In Opioid Reckoning, Amy C. Sullivan explores the complexity of the crisis through firsthand accounts of people grappling with the reverberating effects of stigma, treatment, and recovery. Nearly everyone in the United States has been touched in some way by the opioid epidemic, including the author and her family. Sullivan uses her own story as a launching point to learn how the opioid epidemic challenged longstanding recovery protocols in Minnesota, a state internationally recognized for pioneering addiction treatment. By centering the voices of many people who have experienced opioid use, treatment, recovery, and loss, Sullivan exposes the devastating effects of a one-size-fits-all approach toward treatment of opioid dependency. Taking a clear-eyed, nonjudgmental perspective of every aspect of these issues—drug use, parenting, harm reduction, medication, abstinence, and stigma—Opioid Reckoning questions current treatment models, healthcare inequities, and the criminal justice system. Sullivan also imagines a future where anyone suffering an opioid-use disorder has access to the individualized care, without judgment, available to those with other health problems. Opioid Reckoning presents a captivating look at how the state that invented “rehab” addresses the challenges of the opioid epidemic and its overdose deaths while also taking readers into the intimate lives of families, medical and social work professionals, grassroots activists, and many others impacted by the crisis who contribute their insights and potential solutions. In sharing these stories and chronicling their lessons, Sullivan offers a path forward that cultivates empathy, love, and hope for anyone affected by chaotic drug use and its harms.

Between 1925 and 1945 thousands of ordinary Germans of both sexes and all ages wrote letters to Hitler. Lost for decades, a large cache of these letters was recently discovered in the KGB Special Archive in Moscow, having been carted off to Russia by the Soviet Secret Police at the end of the war. The letters range from gushing love letters - 'I love you so much. Write to me, please,' this from a seven-year old girl named Gina - to letters from teachers, students, priests, businessmen and others expressing gratitude for alleviating poverty or restoring dignity to the German people. There are a few protest letters and the occasional desperate plea to release a loved one from a concentration camp, but the overwhelming majority are positive and even rapturous, shedding fresh light on the nature of the Hitler cult in Nazi Germany. This volume is the first publication of these letters in English. It comprises a selection of the letters and includes a contextualizing commentary that explains the situation of each writer, how the letter was dealt with and what it tells us about Nazi Germany. The commentary also describes the bureaucratic procedures that evolved to deal with the correspondence (Hitler never read any of it), which ranged from warm thanks to referral to the Gestapo.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

The deep wounds that exist from long-standing conflicts between Turks, Kurds, and Armenians have not yet been sufficiently addressed and healed. Nermin Soyalp explains the collective traumas and their significant psychosocial impacts in terms of the potential for reconciliation among these politically conflicted groups. Discussion centers on the transgenerational implications of the Balkan wars of 1912-1913, the Armenian genocide of 1915-1917, the Greco-Turco war of 1920-1922, the formation of the Republic of Turkey in 1923, the population exchange with the Balkans in 1924, the conflict between the Turkish government and Kurdish identity since the formation of the Republic, as well as the impacts of assimilation policies on minorities. Drawing on the complexities of history, psychology, and identity, this book elucidates how collectively and historically shared traumas become inherently more complex, and more difficult to address, generation by generation. Epistemologies of ignorance in Turkey have suppressed the transgenerational experiences of trauma and prevented healing modalities. The Turkish state and society have consciously and unconsciously denied historical realities
