Should I go to graduate school? How do I choose where to apply? Are my grades and accomplishments good enough to get in? Who should I ask to write recommendation letters for me, and how should I approach these people? How do I write my "personal statement?" When will I hear my fate, and how should I make my final decision? These are just a few of the many questions to which this well-researched, thorough, and extremely user-friendly book offers answers. Students who are contemplating graduate training in psychology, counseling, and related fields are often apprehensive and confused about applying to graduate school, but this book takes the guesswork and anxiety out of the process. The tone and features (such as the Q&A format, timeline for application-related tasks and activities, and special advice for special populations) that made the first edition so successful, eliciting hundreds of thank-you notes and e-mail messages to the author, are just as evident in this new edition. The book has been thoroughly updated to include coverage of new topics such as use of the internet and e-mail, as well as changing trends in the professions. The most obvious difference is that the book is now significantly shorter as a result of meticulous rewriting, making it even easier to use. There have been attempts since the publication of the first edition to copy the format of this book, but none of the others have successfully duplicated the depth of research-based advice and the supportive style that make this book the guide of choice for thousands of graduate-school bound students and their advisors.

Based on these, he has knitted a splendid tapestry of theoretical and empirical information. This collection must be a standard for the theory of the firm. Yuji Aruka, Chuo University, Japan Organisations, networks and firms are three of the most dynamic areas of economic research. This timely book synthesises these areas in order to analyse emergent phenomena such as spatial clustering, outsourcing, relational complexity and radical technological innovation. A combination of authoritative literature reviews, novel theoretical developments and interesting case study applications makes this book essential reading for both new and established scholars in the field. Mark Casson, University of Reading, UK In recent years, applied studies have shown widespread, profound and increasing heterogeneity across firms in terms of their strategy, organization arrangement and performance. This book investigates the diversity of business firms, offering a picture of the different organizational settings they adopt in their endeavour to cope with increasing competitive pressure. The book addresses critical theoretical issues surrounding corporate governance, organizational design and cooperative relations among firms. Moreover, it provides new evidence on the various forms of outsourcing that are playing an increasingly important role as a consequence of globalization. The contributions collected in this book stress the emergence of a trend towards a reorganization of production that can enhance the transmission, development and maintenance of knowledge in order to sustain long-run competitive advantage. Providing original and pertinent empirical evidence, this book will attract interest from scholars and postgraduate students studying the economics and organization of the firm. It will also be of value to managers who wish to understand new developments in the organizational settings of business firms with particular reference to corporate governance, organizational design, cooperative relations, outsourcing and de-localization.
