A guide on how to design and make your own shoes from home.

“An eye-opening look into the story of Knight before his multibillion dollar company.” —School Library Journal “A great story about how an ambition turned into a business...serves as a guide for accomplishing great things.” —VOYA In this young reader’s edition of the New York Times bestseller, Nike founder and board chairman Phil Knight “offers a rare and revealing look at the notoriously media-shy man behind the swoosh” (Booklist, starred review), opening up about how he went from being a track star at an Oregon high school to the founder of a brand and company that changed everything. You must forget your limits. It was only when Nike founder Phil Knight got cut from the baseball team as a high school freshman that his mother suggested he try out for track instead. Knight made the track team and found that not only could he run fast but also, more importantly, he liked it. Ten years later, young and searching, Knight borrowed fifty dollars from his father and launched a company with one simple mission: import high quality running shoes from Japan. Selling the shoes from the trunk of his car to start, he and his gang of friends and runners built one of the most successful brands ever. Phil Knight encountered risks and setbacks along the way, but always followed his own advice. Just keep going. Don’t stop. Whatever comes up, don’t stop. Filled with wisdom, humanity, humor, and heart, the young readers edition of the bestselling Shoe Dog is a story of determination that inspires all who read it. The Young Readers Edition is an abridged version of the internationally bestselling adult book and it features original front matter and back matter, including a new introduction and “A Letter to the Young Reader” containing advice from Phil Knight for budding entrepreneurs.

In this exciting volume, Salvatore Ferragamo traces his life's adventures from his origins as a village shoemaker to founding what would become a major global fashion brand. “Ladies and gentlemen, the least important part of this book is the life story of an Italian shoemaker. We can all write our autobiography, and if I dwell on the details of my career it is only because it makes it easier to explain my calling: the work that became my life's fundamental vocation. Life has taught me that Nature gives us perfect feet. If they get damaged, it is because our shoes are defective. However, it is not necessary to undergo such torture, not even in the name of vanity. We can all walk happily wearing comfortable, refined, splendid shoes. This is my whole life's work: learning to make perfect shoes, refusing to put my name on those that aren't.” —Salvatore Ferragamo This is a new, completely updated edition of the autobiography of a man who made Italian fashion great throughout the world. Among the many vicissitudes of his adventurous life, the book features a magnificent series of encounters with and anecdotes about the most extraordinary Hollywood stars, such as Rudolph Valentino, Mary and Lottie Pickford, Pola Negri, Joan Crawford, and Greta Garbo. His loyal customers also included Marilyn Monroe, Douglas Fairbanks, Sophia Loren, Anna Magnani, Audrey Hepburn, and Paulette Goddard.

But Jeremy's grandma tells him they don't have room for "want," just "need," and what Jeremy needs are new boots for winter. When Jeremy's shoes fall apart at school, and the guidance counselor gives him a hand-me-down pair, the boy is more determined than ever to have those shoes, even a thrift-shop pair that are much too small. But sore feet aren't much fun, and Jeremy comes to realize that the things he has -- warm boots, a loving grandma, and the chance to help a friend -- are worth more than the things he wants.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us

to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
