This text integrates the theory and practice of learner-based assessment. Written in response to two recent movements in language teaching--learner-centered teaching and a renewed interest in authenticity in language testing--it examines the relationship between the language learner and language assessment processes, and promotes approaches to assessment that involve the learner in the testing process. Particular attention is given to issues of reliability and validity. Grounded in current pedagogical applications of authentic assessment measures, this volume is intended for and eminently accessible to classroom teachers and program directors looking for ways to include their students in the evaluation process, graduate students, and professional language testers seeking authenticity in assessment and desiring to create more interactive evaluation tools.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

P.F. Strawson has been a major and influential spokesman for ordinary language philosophy throughout the late twentieth century, studying the relationship between common language and the language of formal logic. This reissue of his collection of early

essays, *Logico-Linguistic Papers*, is published with a brand new introduction by Professor Strawson but, apart from minor corrections to the text, these classic essays remain original and intact. *Logico-Linguistic Papers* contains Strawson's major essay, 'On Referring', in which he disputed Bertrand Russell's theory of definite descriptions, distinguishing between referring to an entity and asserting its existence. The book contains twelve essays in all, grouped by subject matter. The first five are concerned with the topic of singular reference and predication and the last three are all responses to J.L. Austin's treatment of the topic of truth. Strawson disputes the correspondence theory of truth, maintaining that facts are what statements (when true) state. The remaining papers deal with meaning, speech acts, logical truth and Chomsky's views on syntax.

Death is often encountered in English courses—Hamlet's death, celebrity death, death from the terrorist attacks on 9/11—but students rarely have the opportunity to write about their own experiences with death. In *Death Education in the Writing Classroom*, Jeffrey Berman shows how college students can write safely about dying, death, and bereavement. The book is based on an undergraduate course on love and loss that Berman taught at the University at Albany in 2008. Part 1, "Diaries," is organized around Berman's diary entries written immediately after each class. These entries provide a week-by-week glimpse of class discussions, highlighting his students' writings and their developing bonds with classmates and teacher. Part 2, "Breakthroughs," focuses on several students' important educational and psychological discoveries in their understanding of love and loss. The student writings touch on many aspects of death education, including disenfranchised grief. The book explores how students write about not only mourning and loss but also depression, cutting, and abortion—topics that occupy the ambiguous border of death-in-life. *Death Education in the Writing Classroom* is the first book to demonstrate how love and loss can be taught in a college writing class—and the first to describe the week-by-week changes in students' cognitive and affective responses to death. This interdisciplinary book will be of interest to writing teachers, students, clinicians, and bereavement counselors.

All strategies explained in this text are based on sound theories of teaching writing and on the patterns of successful writers. "A SHOCKING INDICTMENT OF OUR SYSTEM OF HIGHER EDUCATION AND THE POLITICS THAT PERMEATE IT." -Raymond Shaffer, Nevada State Senator Lee Miller was a popular young professor in Las Vegas who thought he was on the fast-track to tenure. He had created an innovative study abroad program with the help of a distinguished U.S. senator, and had found funding for needy students wishing to participate. It was just his first year at the college, and the newspapers already had reported on his work. Little did he know that someone had other plans for the money earmarked for the needy students ... someone who would stop at nothing to crush Miller's plans. This true story reads like a novel. Miller weaves an amusing tale of teaching at a community college in "Sin City" with the unpredictable twists and turns of a scandal involving some of the most powerful figures in the state ... a scandal that threatens to end the careers of several administrators at the college. "This book is extremely entertaining and very accurate. It is a very good read." Steve Sisolak, Regent, University and Community College System of Nevada "THIS IS AN IMPORTANT BOOK. IT SHOULD SERVE TO PREVENT SUCH MADNESS FROM OCCURRING AT OTHER COLLEGES." These accessible and appealing tales and anecdotes are also a perfect and painless introduction to modern Buddhist belief and practice.

A startling and profound exploration of how Jewish history is exploited to comfort the living. Renowned and beloved as a prizewinning

novelist, Dara Horn has also been publishing penetrating essays since she was a teenager. Often asked by major publications to write on subjects related to Jewish culture—and increasingly in response to a recent wave of deadly antisemitic attacks—Horn was troubled to realize what all of these assignments had in common: she was being asked to write about dead Jews, never about living ones. In these essays, Horn reflects on subjects as far-flung as the international veneration of Anne Frank, the mythology that Jewish family names were changed at Ellis Island, the blockbuster traveling exhibition Auschwitz, the marketing of the Jewish history of Harbin, China, and the little-known life of the "righteous Gentile" Varian Fry. Throughout, she challenges us to confront the reasons why there might be so much fascination with Jewish deaths, and so little respect for Jewish lives unfolding in the present. Horn draws upon her travels, her research, and also her own family life—trying to explain Shakespeare's Shylock to a curious ten-year-old, her anger when swastikas are drawn on desks in her children's school, the profound perspective offered by traditional religious practice and study—to assert the vitality, complexity, and depth of Jewish life against an antisemitism that, far from being disarmed by the mantra of "Never forget," is on the rise. As Horn explores the (not so) shocking attacks on the American Jewish community in recent years, she reveals the subtler dehumanization built into the public piety that surrounds the Jewish past—making the radical argument that the benign reverence we give to past horrors is itself a profound affront to human dignity. George Orwell's celebrated novella, *Animal Farm*, is a biting, allegorical, political satire on totalitarianism in general and Stalinism in particular. One of the most famous works in modern English literature, it is a telling comment on Soviet Russia under Stalin's brutal dictatorship based on a cult of personality which was enforced through a reign of terror. The book tells a seemingly simple story of farm animals who rebel against their master in the hope of stopping their exploitation at the hand of humans and creating a society where animals would be equal, free and happy. Ultimately, however, the rebellion is betrayed and the farm ends up in a state as bad as it was before. The novel thus demonstrates how easily good intentions can be subverted into tyranny. Orwell has himself said that it was the first book in which he had tried, with full consciousness of what he was doing, 'to fuse political purpose and artistic purpose into one whole.' The book was first published in England in 1945, and has since then remained a favourite with readers all over the world, and has consistently been included in all prestigious bestseller lists for the past many years.

In most conditions, what you experience in life will mold and shape how you view your world and yourself. If in your world your experience is negative, you could become molded and shaped with negative thoughts, feelings and beliefs, leading to a trap of destruction. Not everybody overcomes them like we see in the movies. Not everyone escapes from a bad environment (thats more of Hollywood). The opposite is also very possible, on the hindsight. This fictional story discusses the importance of self identity and how easy it is to fall into playing your untrue role of who you are, and even if you think you are happy and successful youre still far from knowing your true identity and role of who you are: living and departing in a lie. This story covers many personal, opinionated philosophy, as well as objective, researched and so-called professional philosophy. A philosophy discussed on conspiracy, social and psychological behavior, religious and political; furthermore, discussion, on what is truth.
