Papandrea's treatment of the early Church fathers is unique in that he situates his discussion against the social and cultural context of the Roman Empire and its relationship to the Church, especially with regard to the effect of the persecutions on the Church. Instead of providing actual excerpts of the works under discussion; 'Reading the Early Church Fathers directs the reader to the primary sources available on the Internet, resources that will be updated regularly. Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however, veterans who served on deep sea vessels in Vietnam are not included. These "Blue Water Navy" veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. Blue Water Navy Vietnam Veterans and Agent Orange Exposure comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue. practices can be linked to policy changes which foster innovation, but can equally result in stagnation if the policy/practice mix is wrong. These case studies -- from Brazil, Chinese Taipei, India and Korea -- demonstrate that where industrial habits tend to reduce competitiveness, policies can make a difference. The book opens a fresh debate on the industrial policies developing countries need to adopt to compete and grow in a globalized economic environment.

In 1976 a young German girl named Anneliese Michel underwent a series of exorcisms. The rites were administered by two priests of the Catholic Church to free Anneliese of the six demons they believed possessed her. Seemingly as a result of the exorcisms the girl died. Worldwide publicity followed when the girl's parents and the two exorcists were brought to trial and convicted of negligent homicide. Here a noted anthropologist offers her own interpretation of the exorcisms of Anneliese Michel. Drawing on interviews with the two exorcists, the girl's parents and friends, transcripts of the trial, and tape recordings made during the exorcisms - as well as studies of religious experience in various cultures - Felicitas Goodman has written a fascinating, compelling book, one that finally tells what happened in this strange case as it delves into the age-old mystery of demonic possession.
