#2 NEW YORK TIMES BESTSELLER\* • “Rogen’s candid collection of sidesplitting essays . . . thrives at both explaining and encapsulating a generational comedic voice.”—The Washington Post A collection of funny personal essays from one of the writers of *Superbad* and *Pineapple Express* and one of the producers of *The Disaster Artist*, *Neighbors*, and *The Boys*. (All of these words have been added to help this book show up in people’s searches using the wonders of algorithmic technology. Thanks for bearing with us!) Hi! I’m Seth! I was asked to describe my book, *Yearbook*, for the inside flap (which is a gross phrase) and for websites and shit like that, so... here it goes!!! *Yearbook* is a collection of true stories that I desperately hope are just funny at worst, and life-changingly amazing at best. (I understand that it’s likely the former, which is a fancy “book” way of saying “the first one.”) I talk about my grandparents, doing stand-up comedy as a teenager, bar mitzvahs, and Jewish summer camp, and tell way more stories about doing drugs than my mother would like. I also talk about some of my adventures in Los Angeles, and surely say things about other famous people that will create a wildly awkward conversation for me at a party one day. I hope you enjoy the book should you buy it, and if you don’t enjoy it, I’m sorry. If you ever see me on the street and explain the situation, I’ll do my best to make it up to you. \*I was beaten by Bill O’Reilly, which really sucks.

Discover the original international diet sensation—used by Adele, heavyweight champion David Haye, and Pippa Middleton—that will help you lose seven pounds in seven days while experiencing lasting energy and eating all the foods you love. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body’s energy stores activate what is known as sirtuins, or the “skinny gene,” and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into “survival” mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created *The Sirtfood Diet* to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.

Videotext (DVDs in place of videotapes) and workbook designed to provide a way to review and practice what is learned in the classroom. Each of the units revolves around a major language function such as asking for and giving directions and talking about life events.

Every president has had a unique and complicated relationship with the intelligence community. While some have been coolly distant, even adversarial, others have found their intelligence agencies to be among the most valuable instruments of policy and power. Since John F. Kennedy’s presidency, this relationship has been distilled into a personalized daily report: a short summary of what the intelligence apparatus considers the most crucial information for the president to know that day about global threats and opportunities. This top-secret document is known as the President’s Daily Brief, or, within national security circles, simply “the Book.” Presidents have spent anywhere from a few moments (Richard Nixon) to a healthy part of their day (George W. Bush) consumed by its contents; some (Bill Clinton and George H. W. Bush) consider it far and away the most important document they saw on a regular basis while commander in chief. The details of most PDBs are highly classified, and will remain so for many years. But the process by which the intelligence community develops and presents the Book is a fascinating look into the operation of power at the highest levels. David Priess, a former intelligence officer and daily briefer, has interviewed every living president and vice president as well as more than one hundred others intimately involved with the production and delivery of the president’s book of secrets. He offers an unprecedented window into the decision making of every president from Kennedy to Obama, with many character-rich stories revealed here for the first time.
