'A significant and timely book ... Holmes has produced a laceratingly powerful story' Frances Wilson, Literary Review In 1810 the slave turned showgirl Sarah Baartman, London's most famous curiosity, became its legal cause célèbre. Famed for her exquisite physique – in particular her shapely bottom – she was stared at, stripped, pinched, painted, worshipped and ridiculed. This talented, tragic young South African woman became a symbol of exploitation, colonialism – and defiance. In this scintillating and vividly written book Rachel Holmes traces the full arc of Baartman's extraordinary life for the first time.

Child Abuse and Neglect: Mandated Reporting and Working with Child Survivors provides pre-service teachers with an overview of child maltreatment and their legal duty to report suspected offenses. The text identifies various types of child abuse, reveals common signs of mistreatment, provides instruction for reporting abuse, and offers advice for working with survivors of abuse. The first chapter of the book explores the history of the child protection movement in America, common risk factors in youth, types of maltreatment, child abuse statistics, and more. The second chapter explains the role of the mandated reporters and explains why it is a legal requirement for teachers to report suspected abuse to state authorities. Additionally, the chapter provides tips for handling disclosure of abuse and supporting children with a history of abuse. These foundational chapters are followed by carefully selected readings that further illuminate the challenges and effects of child abuse. Child Abuse and Neglect is a supplementary text that can be used to support programs in education, social work, psychology, counseling, healthcare, and law enforcement. Sérgio Buarque de Holanda's Roots of Brazil is one of the iconic books on Brazilian history, society, and culture. Originally

published in 1936, it appears here for the first time in an English language translation with a foreword, "Why Read Roots of Brazil Today?" by Pedro Meira Monteiro, one of the world's leading experts on Buarque de Holanda. Roots of Brazil focuses on the multiple cultural influences that forged twentieth-century Brazil, especially those of the Portuguese, the Spanish, other European colonists, Native Americans, and Africans. Buarque de Holanda argues that all of these originary influences were transformed into a unique Brazilian culture and society—a "transition zone." The book presents an understanding of why and how European culture flourished in a large, tropical environment that was totally foreign to its traditions, and the manner and consequences of this development. Buarque de Holanda uses Max Weber's typological criteria to establish pairs of "ideal types" as a means of stressing particular characteristics of Brazilians, while also trying to understand and explain the local historical process. Along with other early twentieth-century works such as *The Masters and the Slaves* by Gilberto Freyre and *The Colonial Background of Modern Brazil* by Caio Prado Júnior, *Roots of Brazil* set the parameters of Brazilian historiography for a generation and continues to offer keys to understanding the complex history of Brazil. *Roots of Brazil* has been published in Italian, Spanish, Japanese, Chinese, German, and French. This long-awaited English translation will interest students and scholars of Portuguese, Brazilian, and Latin American history, culture, literature, and postcolonial studies.

A proposta deste guia é, primeiramente, abordar os assuntos com maior incidência de serem utilizados para a formulação de questões e da redação do Enem. Em segundo lugar, mas não menos importante, é chamar a atenção para o acompanhamento de fatos relevantes para participar do exame. Essa disciplina conhecida por "Atualidades", mesmo sendo determinante na aprovação dos candidatos, ainda não conquistou a preferência deles na hora dos estudos. Muita gente não se conscientizou da necessidade de conhecer os temas mais importantes para a coletividade.

When Pedro Álvares Cabral sailed west of the doldrums on his way to India, he discovered Brazil. The year was 1500. Travelling with him on his flagship was one Pero Vaz de Caminha, a Portuguese civil servant on his way to run a business in Calcutta. His famous letter to the King of Portugal, describing in great detail their brief stay on the Brazilian coastline, was the first report sent back to Europe from the Lusitanian New World. It is thus the living testimony of a remarkable moment in a truly remarkable age ... the Age of Discovery.

The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (???????) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality. From New York Times bestselling author Sam Kean comes incredible stories of science, history, language, and music, as told by our own DNA. In *The Disappearing Spoon*, bestselling author Sam Kean unlocked the mysteries of the periodic table. In *THE VIOLINIST'S THUMB*, he explores the wonders of the magical building block of life: DNA. There are genes to explain crazy cat ladies, why other people have no fingerprints, and why some people survive nuclear bombs. Genes illuminate everything from JFK's bronze skin (it wasn't a tan) to Einstein's genius. They prove that Neanderthals and humans bred thousands of years more recently than any of us would feel comfortable thinking. They can even allow some people, because of the exceptional flexibility of their thumbs and fingers, to become truly singular violinists. Kean's vibrant storytelling once again makes science entertaining, explaining human history and whimsy while showing how DNA will influence our species' future.

“Conhece a máxima “Quanto mais loucos os pais mais caretas serão os filhos”? Acho que ela se aplica a mim. Quem diria que a junção de uma artista plástica hippie com um fã de Frank Zappa e rock progressivo daria em mim: uma nerd devoradora de livros com Transtorno Obsessivo-Compulsivo e uma timidez patológica? Meus pais me criaram de uma maneira que se alguém me chamar de doida eu sou capaz de responder “Muito obrigada!” pois doideira não é defeito, é uma benção.” Lana escreve diários desde os 10 anos de idade e um dia decide relê-los. Mais madura e já na faculdade, ela relembra as dificuldades financeiras dos pais, as brigas, os momentos felizes, o bullying que sofreu, as paixões platônicas e o florescer de duas grandes companheiras de sua vida: o Transtorno Obsessivo-Compulsivo e a Síndrome do Pânico. Ela vê novamente os momentos de sua vida com nostalgia, carinho e boas doses de ironia e humor.

Imagine making poems the way an architect designs buildings or an engineer builds bridges. Such was the ambition of João Cabral de Melo Neto. Though a great admirer of the thing-rich poetries of Francis Ponge and of Marianne Moore, what interested him even more, as he

remarked in his acceptance speech for the 1992 Neustadt International Prize for Literature, was "the exploration of the materiality of words," the "rigorous construction of (. . .) lucid objects of language." His poetry, hard as stone and light as air, is like no other.

Sua metodologia de estudo apresenta sugestões viáveis, criteriosas e produtivas ao estudante que realmente pretende ingressar no Ensino Superior." Isabel Cristina Tremarin da Silva SOE Colégio Anchieta Porto Alegre/RS "Fábio é um jovem inquieto, observador, criativo e persistente. Ele conta neste livro, um pouco da experiência que viveu para se tornar um universitário. Transforma a sua vivência e as suas observações num ousado conjunto de ações e atitudes sistematizadas que quer compartilhar com os milhares de estudantes que, como ele, também buscam chegar a uma instituição de ensino superior grande, qualificada e pública. After failing to learn a new language on five separate occasions, I taught myself to speak Spanish like a native in just six months by watching movies and TV shows, listening to music, and reading books and comics like Harry Potter and Garfield. This simple, easy-to-learn technique, that even the most linguistically-challenged can master literally overnight, is used by many of the most respected and skilled polyglots and language teachers in the world, and it's never really been laid out, explained, and demonstrated in full, point-by-point, step-by-step detail until now. When characters in a movie or TV show are speaking the dialogue, unless it's set in a previous period like the 1800s or something, they speak normal, everyday language. So if you wanted to learn Spanish, the type of normal everyday Spanish that native speakers use every day, aka "conversational Spanish"... Don't you think that Spanish-language TV shows, movies, music, and books might be a good source to learn from...if only you knew how? Not only that, but it would be fun, wouldn't it? Far better than learning the language from some boring, dry textbook or workbook that, even worse, is teaching outdated, formal, "non-conversational" Spanish (look at the dialogue in one sometime: do people actually talk like that? No). The basic technique is obvious: consume popular Spanish-language media and try to learn what they're saying by looking up what you don't understand. Sure. But the issue is twofold: 1) The problems you will inevitably run into (how do I apply what I've learned? how do I ensure I'm not misunderstanding the meaning and thereby learning something incorrect? where do I look things up? what if it's not in the dictionary and Google Translate isn't cutting it? etc.), and... 2) How do we do things as efficiently as possible? If you're a beginner you're going to have to sort out how to do this all on your own, how to solve any problems you might run into on your own, while probably doing many things less effectively and slower than is necessary. I've already learned all this stuff the hard way, I've made many of the mistakes you would if you went this alone, let me just save you a ton of time, trouble, and possibly money by teaching you what I already know from experience. Has this basic technique been used for centuries by language students and teachers alike? Yes, there are records dating back to the 18th century of language teachers using popular media in the language they're teaching to help their students learn it. I'm not claiming to have invented it. What I've done here is, after having used and refined the technique myself for several years, distilled it down to a system that's easy to learn, and which is taught in a format that's organized, easy to understand, and which takes advantage of all the latest technology, such as the all the various resources available on the internet now.

Essays on Latinx and Caribbean identity and on globalization by renowned women writers, including Julia Alvarez, Edwidge Danticat, and Jamaica Kincaid *Women Writing Resistance: Essays on Latin America and the Caribbean* gathers the voices of sixteen acclaimed writer-activists for a one-of-a-kind collection. Through poetry and essays, writers from the Anglophone, Hispanic, and Francophone Caribbean, including Puertorriqueñas and Cubanas, grapple with their hybrid American political identities. Gloria Anzaldúa, the founder of Chicana queer theory; Rigoberta Menchú, the first Indigenous person to win a Nobel Peace Prize; and Michelle Cliff, a searing and poignant chronicler of colonialism and racism, among many others, highlight how women can collaborate across class, race, and nationality to lead a new wave of resistance against neoliberalism, patriarchy, state terrorism, and white supremacy.

Every once in a while, a new poet appears who makes us feel that the contours of contemporary poetry have been significantly changed. Fred D'aguiar is such a poet. Although still in his early twenties, he already has a wholly independent voice, and a powerful grasp of original and strange subjects. Many of these arise from his childhood in Guyana: the first section of *Mama Dot* comprises a series in which these early years are recalled with a passionately lyrical evocation of landscapes, incidents and family relations. They are sensuous celebrations, but are nevertheless touched with melancholy and nostalgia – qualities which are more fully evident elsewhere in the book, in poems which address the life D'Aguiar now leads in England, and which concentrate on themes of exile. In the final section, 'Guyanese Days', he returns once again to the scenes and memories of his childhood. *Mama Dot* is one of the most exciting first collections to have been published for many years: exhilarating, haunting and restlessly inventive.

You're Golden, Charlie Brown is a book to treasure.

Through a series of vivid case studies, *Music and Creativity in Healthcare Settings: Does Music Matter?* documents the ways in which music brings humanity to sterile healthcare spaces, and its significance for people dealing with major illness. It also considers the notion of the arts as a vessel to explore humanitarian questions surrounding serious illness, namely what it is to be human. Overarching themes include: taking control; security and safety; listening; the normalization of the environment; being an individual; expressing emotion; transcendence and hope and expressing the inexpressible. With an emphasis on service user narratives, chapters are enriched with examples of good practice using music in healthcare. Furthermore, a focus on aesthetic deprivation contributes to debates on the intrinsic and instrumental value of music and the arts in modern society. This concise study will be a valuable source of inspiration for care givers and service users in the health sector; it will also appeal to scholars and researchers in the areas of Music medicine and music Therapy, and the Medical Humanities.

Introducing a major new voice in Brazilian letters. Set among a Lebanese immigrant community in the Brazilian port of Manaus, *The Brothers* is the story of identical twins, Yaqub and Omar, whose mutual jealousy is offset only by their love for their mother. But it is Omar who is the object of Zana's Jocasta-like passion, while her husband, Halim, feels her slipping away from him, as their beautiful daughter, RGNia, makes a tragic claim on her brothers' affection. Vivid, exotic, and lushly atmospheric, *The Brothers* is the story of a family's disintegration, of a changing city and the culture clash between the native-born inhabitants and a new immigrant group, and of the future the next generation will make from the ruins.

Only once we understand the long history of human efforts to draw sustenance from the land can we grasp the nature of the crisis that faces humankind today, as hundreds of millions of people are faced with famine or flight from the land. From Neolithic times through the earliest civilizations of the ancient Near East, in savannahs, river valleys and the terraces created by the Incas in the Andean mountains, an increasing range of agricultural techniques have developed in response to very different conditions. These developments are recounted in this book, with detailed attention to the ways in which plants, animals, soil, climate, and society have interacted. Mazoyer and Roudart's *A History of World Agriculture* is a path-breaking and panoramic work, beginning with the emergence of agriculture after thousands of years in which human societies had depended on hunting and gathering, showing how agricultural techniques developed in the different regions of the world, and how this extraordinary wealth of knowledge, tradition and natural variety is endangered today by global capitalism, as it forces the unequal agrarian heritages of the world to conform to the norms of profit. During the twentieth century, mechanization, motorization and specialization have brought to a halt the pattern of cultural and environmental responses that characterized the global history of agriculture until then. Today a small number of corporations have the capacity to impose the farming methods on the planet that they find most profitable. Mazoyer and Roudart propose an alternative global strategy that can safeguard the economies of the poor countries, reinvigorate the global economy, and create a livable future for mankind.

Originally published as *O Ateneu* in 1888, *The Athenaeum* is a classic of Brazilian literature, here translated into English in its entirety for the first time. The first-person narrator, Sergio, looks back to his time at the eponymous boarding school, with its autocratic principal and terrifying student body. Sergio's account of his humiliating experiences as a student, with its frank discussion of corruption and homoerotic bullying, makes it clear that his school is structured and administered so as to reproduce the class divisions and power structure of the larger Brazilian society. In its muckraking mode, the novel is in the spirit of Naturalism, imported from France and well-acclimated to Brazil, where it blossomed. At the same time, *Pompéia* maintains the novel's credibility as a bildungsroman by portraying the narrator's psychological development. The novel's conclusion suggests both a doomed society and its possible redemption, indicative of a moment of upheaval and transition in Brazilian history.

This volume presents an integrated epidemiologic, social, and economic analysis of the global epidemics of HIV among sex workers in low- and middle-income countries. The book provides a comprehensive review and synthesis of the available public health and social science data to characterize the nature, scope, and complexities of these epidemics. A community empowerment-based approach to HIV prevention, treatment, and care is outlined and demonstrated to be cost-effective across multiple settings, with a significant projected impact on HIV incidence among sex workers and transmission dynamics overall. The Global HIV Epidemics among Sex Workers seeks to assist governments, public health implementing agencies, donors, and sex worker communities to better understand and respond to the epidemics among a population facing heightened social and structural vulnerabilities to HIV. The book combines a systematic review of the global epidemiology of HIV among sex workers and in-depth case studies of the epidemiology, policy and programmatic responses and surrounding social contexts for HIV prevention, care and treatment in eight countries. The authors employ mathematical modeling and cost-effectiveness analysis to assess the potential country-level impact of a community empowerment-based approach to HIV prevention, treatment, and care among sex workers when taken to scale in four countries representing diverse sociopolitical contexts and HIV epidemics: Brazil, Kenya, Thailand, and Ukraine. In each setting, greater investment in prevention, treatment, and care for sex workers is shown to significantly reduce HIV. Together these findings underline the urgency of further global investment in comprehensive, human rights-based responses to HIV among sex workers.

On a singular March day in 1914, Fernando Pessoa felt his master appear inside him, Alberto Caeiro, the heteronym that stands over his epiphanic collection, composed that day *The Keeper of Sheep* -- the pivotal work in the career of Portugal's great modern poet. Of the poet's persona Octavio Paz declares, his words strike us as truths from another age, that age in which everything was the same. *The Keeper of Sheep* is appears here in its original Portuguese beside its first English translation.

*West-Running Brook* is Robert Frost's poetry book containing woodcuts. On account of this volume Frost is called "Home Spun Philosopher". The title of this volume is very significant. In New England only one small river flows to west while all the other rivers flow to east. In the same way, the poet trusts himself to go by contrary ways...
