"a provocative new book" -- The New York Times AI-centric organizations exhibit a new operating architecture, redefining how they create, capture, share, and deliver value. Marco Iansiti and Karim R. Lakhani show how reinventing the firm around data, analytics, and AI removes traditional constraints on scale, scope, and learning that have restricted business growth for hundreds of years. From Airbnb to Ant Financial, Microsoft to Amazon, research shows how AI-driven processes are vastly more scalable than traditional processes, allow massive scope increase, enabling companies to straddle industry boundaries, and create powerful opportunities for learning--to drive ever more accurate, complex, and sophisticated predictions. When traditional operating constraints are removed, strategy becomes a whole new game, one whose rules and likely outcomes this book will make clear. Iansiti and Lakhani: Present a framework for rethinking business and operating models Explain how "collisions" between AI-driven/digital and traditional/analog firms are reshaping competition, altering the structure of our economy, and forcing traditional companies to rearchitect their operating models Explain the opportunities and risks created by digital firms Describe the new challenges and responsibilities for the leaders of both digital and traditional firms Packed with examples--including many from the most powerful and innovative global, AI-driven competitors--and based on research in hundreds of firms across many sectors, this is your essential guide for rethinking how your firm competes and operates in the era of AI.

Historical Sociolinguistics: Language Change in Tudor and Stuart England is the seminal text in the field of historical sociolinguistics. Demonstrating the real-world application of sociolinguistic research methodologies, this book examines the social factors which promoted linguistic changes in English, laying the foundation for Modern Standard English. This revised edition of Nevalainen and Raumolin-Brunberg's ground-breaking work: discusses the grammatical developments that shaped English in the early modern period; presents the sociolinguistic factors affecting linguistic change in Tudor and Stuart English, including gender, social status, and regional variation; showcases the authors' research into personal letters from the people who were the driving force behind these changes; and demonstrates how historical linguists can make use of social and demographic history to analyse linguistic variation over an extended period of time. With brand new chapters on language change and the individual, and on newly developed sociolinguistic research methods, Historical Sociolinguistics is essential reading for all students and researchers in this area.

Written by authors who are themselves Deaf, this unique book illuminates the life and culture of Deaf people from the inside, through their everyday talk, their shared myths, their art and performances, and the lessons they teach one another. Padden and Humphries employ the capitalized "Deaf" to refer to deaf people who share a natural language--American Sign Language (ASL)--and a complex culture, historically created and actively transmitted across generations.

The international multi-topic conference IMTIC 2008 was held in Pakistan during April 11–12, 2008. It was a joint venture between Mehran University, Jamshoro, Sindh and Aalborg University, Esbjerg, Denmark. Apart from the two-day main event, two workshops were also held: the Workshop on Creating Social Semantic Web 2.0 Information Spaces and the Workshop on Wireless Sensor Networks. Two hundred participants registered for the main conference from 24 countries and 43 papers were presented; the two workshops had overwhelming support and over 400 delegates registered. IMTIC 2008 served as a platform for international scientists and the engineering community in general, and in particular for local scientists and the engineering community to share and cooperate in various fields of interest. The topics presented had a reasonable balance between theory and practice in multidisciplinary topics. The conference also had excellent topics covered by the keynote speeches keeping in view the local requirements, which served as a stimulus for students as well as experienced participants. The Program Committee and various other committees were experts in their areas and each paper went through a double-blind peer review process. The conference received 135 submissions of which only 46 papers were selected for presentation: an acceptance rate of 34%.

For more than thirty years, there has not been a project that consolidates international university-level scholarship on Sindh and Sindhis into a single forum. Interpreting the Sindhi World seeks to unite the wide community of scholars who work on Sindh and with Sindhis. The book's interdisciplinary focus is on history and society, and represents a 'snap shot' of contemporary research from different disciplines and locations. It combines interdisciplinary and multi-local approaches to describe the diversity of Sindh's 'voices'

and to raise questions about how they are historically and socio-culturally defined. Conventional studies of Sindh and Sindhis often bend the region and its people upon themselves to analyze society and history. This collection of essays treats Sindh and its people not as isolated regional entities, but rather entries in a wider socio-cultural and historical web. Sindhis are a global community and this collection generates new perspectives on them by integrating detailed studies on Pakistan with those from India and the diaspora. Such an approach contrasts with other writings by celebrating rather than erasing multi-cultural faces from Sindh's human tapestry. By rethreading unheard socio-cultural and historical voices into understanding Sindh and its people, this collection disputes the vision of Sindhis as a monolithic Muslim population in the Islamic Republic of Pakistan.

This invaluable textbook presents a comprehensive introduction to modern competitive programming. The text highlights how competitive programming has proven to be an excellent way to learn algorithms, by encouraging the design of algorithms that actually work, stimulating the improvement of programming and debugging skills, and reinforcing the type of thinking required to solve problems in a competitive setting. The book contains many "folklore" algorithm design tricks that are known by experienced competitive programmers, yet which have previously only been formally discussed in online forums and blog posts. Topics and features: reviews the features of the C++ programming language, and describes how to create efficient algorithms that can quickly process large data sets; discusses sorting algorithms and binary search, and examines a selection of data structures of the C++ standard library; introduces the algorithm design technique of dynamic programming, and investigates elementary graph algorithms; covers such advanced algorithm design topics as bit-parallelism and amortized analysis, and presents a focus on efficiently processing array range queries; surveys specialized algorithms for trees, and discusses the mathematical topics that are relevant in competitive programming; examines advanced graph techniques, geometric algorithms, and string techniques; describes a selection of more advanced topics, including square root algorithms and dynamic programming optimization. This easy-to-follow guide is an ideal reference for all students wishing to learn algorithms, and practice for programming contests. Knowledge of the basics of programming is assumed, but previous background in algorithm design or programming contests is not necessary. Due to the broad range of topics covered at various levels of difficulty, this book is suitable for both beginners and more experienced readers.

This dictionary contains over 1800 words which are the same or nearly the same in English and German. Such words are known as cognates. Just like human family, not all are twins. Some will be close, others only share a common etymology. It also contains a section of "fake friends" - words which one may think are cognates, but are not. Some of these will get you in trouble, for example: Gift does not mean something special for a friend, it means poison, Use das Geschenk instead. Vincent van Gogh's (1853-1890) idiosyncratic style grew out of a deep admiration for and connection to the 19th-century art world. This fresh look at Van Gogh's influences explores the artist's relationship to the Barbizon School painters Jean-François Millet and Georges Michel--Van Gogh's self-proclaimed mentors--as well as to Realists like Jean-François Raffaëlli and Léon Lhermitte. New scholarship offers insights into Van Gogh's emulation of Adolphe Monticelli, his absorption of the Hague School through Anton Mauve and Jozef Israëls, and his keen interest in the work of the Impressionists. This copiously illustrated volume also discusses Van Gogh's allegiance to the colorism of Eugène Delacroix, as well as his alliance with the Realist literature of Charles Dickens and George Eliot. Although Van Gogh has often been portrayed as an insular and tortured savant, *Through Vincent's Eyes* provides a fascinating deep dive into the artist's sources of inspiration that reveals his expansive interest in the artistic culture of his time.

"*The Song of the Cardinal*" is a fascinating story of the life of a redbird, or Kentucky cardinal, as it is popularly called, who is born in the valley of the Wabash. The author possesses the soul of an artist and a poet, which enables her to invest the story with the charm of a rich and vivid imagination; while her knowledge of the habits and peculiarities of the redbird and the love she feels for the cardinal family impart a living interest to her work that makes the reader enter into the joys and tribulations, the triumphs, failures, and final victory of the hero, with much the same personal interest one feels in the leading figures of a well-told romance of life. Into the web and woof of the story the author has also woven a beautiful picture of an old man and woman who through the song and the presence of the cardinal are brought again into the loving, sympathetic nearness to each other that marked the golden days of their early married life.
