Volkswagen's GTI, Golf, and Jetta are long-time favorites among sport-compact performance enthusiasts. With engines ranging from the 2.0 liter naturally-aspirated four-cylinder to the 1.8 liter turbo 4 to the VR6, the Mk III and Mk IV generations (1993-2004) offer tuners a wealth of opportunities. This book turns these opportunities into realities, from deciding which vehicle to buy, to keeping it running in tip-top condition, to enhancing the performance and appearance of your VW. Focusing on the engine, wheels and tires, suspension, body kits, interiors, and more, each project includes straightforward instruction along with details about the necessary parts, cost, time, and skill. If you want to get the biggest bang for your VW buck, this book is your road map.

Nobody thought Rory O'Connor would make it – written off as 'thick' at school, he struggled to find a career he felt he could succeed in. When a hot tip led to a win on the horses it was the beginning of a dangerous spiral into a gambling addiction that gnawed away at his self-esteem even further. How did the man who thought he had nothing to live for go on to become a stand-up comedian selling out venues around Ireland and reaching 800,000 people through his social media platforms? This is Rory's Story. Told with his trademark humour, this straight-talking memoir is a book for anyone who wants to be inspired by an ordinary man's mental health journey.

An exuberant, hands-on fly-on-the-wall account that combines the thrill of canyoneering and rock climbing with the intellectual sleuthing of archaeology to explore the Anasazi. David Roberts describes the culture of the Anasazi—the name means “enemy ancestors” in Navajo—who once inhabited the Colorado Plateau and whose modern descendants are the Hopi Indians of Arizona. Archaeologists, Roberts writes, have been puzzling over the Anasazi for more than a century, trying to determine the environmental and cultural stresses that caused their society to collapse 700 years ago. He guides us through controversies in the historical record, among them the haunting question of whether the Anasazi committed acts of cannibalism. Roberts’s book is full of up-to-date thinking on the culture of the ancient people who lived in the harsh desert country of the Southwest.

The book presents – based on the most recent research and development results worldwide - the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells, and furthermore plug in hybrids with conventional and alternative fuels. The propulsion concepts are evaluated based on specific power, torque characteristic, acceleration behaviour, specific fuel consumption and pollutant emissions. The alternative fuels are discussed in terms of availability, production, technical complexity of the storage on board, costs, safety and infrastructure. The book presents summarized data about vehicles with electric and hybrid propulsion. The propulsion of future cars will be marked by diversity – from compact electric city cars and range extender vehicles for suburban and rural areas up to hybrid or plug in SUV ?s, Pick up ?s and luxury class automobiles.

This enthralling WWII biography combines a downed B-17 bombardier’s unfinished memoir with letters from the French girl who saved his life. Susan Tate Ankeny’s father was a World War II veteran bombardier who had bailed from a burning B-17 over Nazi-occupied France in 1944. After he died, she found his unfinished memoir, stacks of envelopes, black-and-white photographs, mission reports, dog tags, and the fake identity cards he used in his escape. Ankeny spent more than a decade tracking down letter writers, their loved ones, and anyone who had played a role in her father's story, culminating in a trip to France where she retraced his path with the same people who had guided him more than sixty years ago. While piecing together her father’s wartime experience, Ankeny discovered a remarkable hero. Godelieve Van Laere was just a teenaged girl when she saved the fallen Lieutenant Dean Tate, risking her life and forging a friendship that would last into a new century. The result is a fascinating and dramatic World War II tale enhanced by personal interviews with participants. It traces the transformation of a small-town American boy into a bombardier, the thrill and chaos of aerial warfare, and the horror of bailing from a flaming aircraft over enemy territory. It distinguishes the actions of a little-known French resistance network for Allied airmen known as Shelburne. And it shines a light on the courage and cunning of a young woman who risked her life to save another.

Mark Jones, a twenty-three-year-old supermarket worker in Herne Bay, doesn't have a lot going for him. He's earning the minimum wage, is still living with his parents, and his favourite hobby is PlayStation. But one evening after work, he eats a packet of crisps on the cliff top and watches the sun go down over the Thames estuary. When he throws the empty packet into a litter bin, a gust of wind suddenly blows the packet away. He has no idea how completely this chance event will change his life. The Crisp Packet is one of the most original novels you'll ever read. It tells the story of Mark's odyssey into life and the accidental mayhem he causes before he finally finds true love with a woman who's even more unusual than he is. The Crisp Packet is bizarre, funny, disturbing, thought-provoking, and highly entertaining. Meet Mark Jones, a hero of our times!

Now 60 years old, your Slant Six could probably use some freshening up. Slant Six engine expert Doug Dutra has produced this volume to walk you through every aspect of disassembly, evaluation, rebuild, and reassembly in an easy-to-read, step-by-step format. The book also covers modifications, showing how to squeeze the most out of your engine. The year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. With its legacy intact, Chrysler's Slant Six powered Mopar automobiles for decades to come in three displacement offerings (170, 198, 225). With millions of Slant Six engines built over the 30-plus years that the engine was produced, it's always a good idea to have this book handy, as you never know when the next "leaning tower of power" will find its way into your garage! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}
