When the author's mother died he discovered over 200 letters in a shoe box that his father had written to her during their separation during World War II. Captain Lashley was stationed first at a hospital in England as a supply officer and then as the commander of a prisoner of war camp in France. During those months his letters tell of the events of his life. Some are boring and seem to be of little consequence, others are filled with emotional turmoil. Rene Lashley, his wife, has his fourth child while he is away, moves in with her mother and sister and raises her other three children. Kirk, the second son, is puzzled by what is happening, but continues doing those things a normal child does. The book is an effort to show the common, everyday concerns of all the family members in what is an unprecedented time in the life of the family and the world. The story is told through the voices of the soldier, the mom, and the child.

Contract and procurement fraud, collusion, and corruption are worldwide problems. Such wrongdoing causes federal, state, and local governments, as well as private-sector corporations and businesses, to lose funds and profits, while the wrongdoers unjustly benefit. Bid riggers conspire to eliminate fair and open competition and unjustly increase prices, allowing some to monopolize industries. Too often, contracting officials and others responsible for placing orders or awarding contracts compromise their integrity and eliminate fair and open competition to favor vendors offering bribes or gifts. This results in unfair playing fields for vendors and causes financial losses for businesses, government agencies, and taxpayers. Charles Piper's Contract

and Procurement Fraud and Corruption Investigation Guidebook educates readers on fraud and corruption schemes that occur before, during, and after contracts are awarded. This book teaches not only how to identify such wrongdoing, but also how to investigate it and prevent reoccurrence. Piper shares the Piper Method of Conducting Thorough and Complete Investigations, his innovative and proven method of investigating contract and procurement fraud, and demonstrates its principles with personal, on-the-job examples (which he calls "War Stories") woven throughout the text. Intended for criminal justice students, as well as investigators, auditors, examiners, business owners, policy-makers, and other professionals potentially affected by fraud, this book is a must-read guide to effective procurement and contract fraud investigations from inception to testimony.

The book's unique organization presents the auditing process in twelve concise chapters, with eight flexible, independent modules designed to be integrated into the course entirely at the instructor's discretion. Perhaps most importantly, this title is the only book on the market to fully integrate the Codification of the New Clarity Standards (including new section #'s) issued by the Auditing Standards Board. As these standards will be effective for year-end audits after December 15, 2012, they will be covered on the CPA exam beginning in July 2013, when many current students will be taking the CPA exam after completing 150 hours of coursework. In addition, the Louwers book also brings the real world into the classroom through the addition of extensive Auditing Insights involving real issues facing today's professionals as well as the updated Apollo Shoes Casebook, the only stand-alone fraud audit case on the market (available on the book's website, www.mhhe.com/louwers5e). Throughout the revised text, the Louwers author team has updated each chapter to include the latest pronouncements, technology and case material for your auditing classes: This edition has fully integrated the eight new standards adopted by the PCAOB. And, most importantly, the risk assessment chapter was restructured to incorporate the exacting risk assessment process as outlined in the new PCAOB risk standards. The book has fully integrated the latest updates from the International Standards of Auditing (ISAs) and the Auditing Standards Board (ASB). Each chapter now begins with a list of the AU/ISA Sections that are covered from the Codification of Statements on Auditing Standards published by the AICPA and the list of PCAOB Auditing Standards covered in that chapter. This edition incorporates the major changes to the structure and the content of the auditing section of the CPA examination for 2011 and has been designed to provide multiple opportunities for students to practice questions that they will encounter on the CPA exam. Each chapter has an abundance of multiple choice questions. In addition, to provide experience with the task-based exam approach, Kaplan CPA Simulations are included in the text problem material and are also accessible at www.mhhe.com/louwers5e. These multiple choice questions and simulations allow the student to gain skills and pick up additional knowledge for success on the CPA Examination. This book examines internal fraud investigations in public and private organizations. It provides a theoretical framework of white-collar crime and convenience theory, to examine a number of case studies, including some cases brought to light by the Panama Papers. Investigating white-collar crime is distinguished from other types of crime by: concealment of the crime rather than the criminal, victims who may be unaware of the crime and not directly visible to the criminal, and the resources available to suspects. It requires a unique strategy and a unique set of tools. This work provides insight into a number of internal investigation reports that are normally not publicly available. It will be of interest to researchers in criminology and criminal justice, particularly with an interest in white collar crime and corruption, as well as related fields such as business, management, economics, and public administration.

Accountants have historically had an important role in the detection and deterrence of fraud. As Joe Wells' Principles of Fraud Examination 4th edition illustrates, fraud is much more than numbers; books and records don't commit fraud – people do. Widely embraced by fraud examination instructors across the country, Principles of Fraud Examination, 4th Edition, by Joseph Wells, is written to provide a broad understanding of fraud to today's accounting students – what it is and how it is committed, prevented, detected, and resolved. This 4th edition of the text includes a chapter on frauds perpetrated against organizations by individuals outside their staff—a growing threat for many entities as commerce increasingly crosses technological and geographical borders.
