UNIT 1 - Introduction to Civil Engineering - UNIT 2 - Materials and Construction - UNIT 3 - Uses of MAPS and Field Surveys - UNIT 4 - Ecology and Eco System - UNIT 5 - Planning for the Built Environment - UNIT 6 - Energy and Environmental Pollution - Appendixes

This book contains algorithms and equivalent program and also calculate complexity of algorithms. After reading this book anybody can be in the position to find complexity.

'This is a competently edited, reader-friendly publication which fills a previously empty niche in the market. Every applied psychologist should have a copy well within arm's length' - British Journal of Educational Psychology Applied Psychology: Current Issues and New Directions is an exciting new textbook and a perfect resource for students taking either a focussed degree in applied psychology or a module as part of a wider psychology degree program. Given its breadth of coverage it should also be essential background reading on courses looking in depth at one of the many areas of professional psychological practice. The book is divided into two parts. In Part One, the book reviews the traditional branches of applied psychology (i.e. clinical, educational and occupational psychology); some relative newcomers (counselling psychology, forensic and health psychology); and some less obvious areas (careers guidance, counselling, academia) addressing such issues as training, future trends and developments within each field. Part Two offers discussion of more generic issues facing professional psychologists including the role of research and evidence-based practice in everyday work; trends in higher education; and continuing professional development. The book concludes with a 'Round-Table' discussion involving leading psychologists commenting on trends and new directions in their respective fields. Key features of this book: - Consistently pedagogical throughout - chapter summaries, questions for reflection and discussion and annotated further reading in every chapter - Comprehensive coverage - all areas of applied psychology included - Related to the 'real world' - by reviewing the issues and offering practical advice, this text should help prospective applied psychologists make informed decisions about their careers.

Modern Surveying is unimaginable without the use of electronic equipment and information technology. Surveying with conventional systems has been completely replaced with advanced automated systems. Total Station, Global Positioning System (GPS), Remote Sensing and Geographical Information System (GIS) have all become an inextricable part of surveying. Advanced Surveying: Total Station, GIS and Remote Sensing provides a thorough working knowledge of these technologies.

This book is designed as per the new Curriculum conceived for the students of B.Sc. (Physics). Although the approach is primarily qualitative, a reasonably large number of illustrative examples and segregated exercises are included, wherever possible, to ensure that the students develop a taste of real rigour of physics.

• Latest Examination Paper with Scheme of Valuation • Strictly as per the latest syllabus, blueprint & design of the question paper. • Board-specified typologies of

questions for exam success • Perfect answers with Board Scheme of Valuation • NCERT Textbook Questions fully solved • Solutions of PUE Textbook Questions • Previous Years' Board Examination Questions • Mind Maps for clarity of Concepts. The International Science Congress Association (ISCA) organized the 1st International Science Congress (ISC-2011) at Indore, M.P. India with Science and Technology for Sustainable Development as its focal theme. The congress was hosted by Maharaja Ranjit Singh College of Professional Sciences on 24th and 25th December 2011. It was distributed in 20 sections. A total 900 Research Papers and 1300 registrations all over the world were received. Delegates from Malaysia, Egypt, Bangladesh, Nigeria, Indonesia, Iran, South Africa, Iraq, Mexico, Japan, Uganda, Pakistan, Kingdom of Saudi Arabia, Russia, Latvia, Nepal, Lithuanian and from length and breadth of our nation participated in the ISC-2011.

As the global economy turns more and more service oriented, Information Technology-Enabled Services (ITeS) require greater understanding. Increasing numbers and varieties of services are provided through IT. Furthermore, IT enables the creation of new services in diverse fields previously untouched. Because of the catalyzing nature of internet technology, ITeS today has become more than "Outsourcing" of services. This book illustrates the enabling nature of ITeS with its entailment of IT, thus contributing to the betterment of humanity. The scope of this book is not only for academia but also for business persons, government practitioners and readers from daily lives. Authors from a variety of nations and regions with various backgrounds provide insightful theories, research, findings and practices in various fields such as commerce, finance, medical services, government and education. This book opens up a new horizon with the application of Internet-based practices in business, government and in daily lives. Information Technology-Enabled Services works as a navigator for those who sail to the new horizon of service oriented economies.

The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.

India has a strong and ancient tradition of astronomy, which seamlessly merges with the current activities in Astronomy and Astrophysics in the country. While the younger generation of astronomers and students are reasonably familiar with the current facilities and the astronomical research, they might not have an equally good knowledge of the rich history of Indian astronomy. This particular volume, brought out as a part of the Platinum Jubilee Celebrations of Indian National Science Academy, concentrates on selected aspects of historical development of Indian astronomy in the form of six invited chapters. Two of the chapters – by Balachandra Rao and M.S. Sriram – cover ancient astronomy and the development of calculus in the ancient Kerala text Yuktibhasa. The other four chapters by B.V. Sreekantan, Siraj Hasan, Govind Swarup and Jayant Narlikar

deal with the contemporary history of Indian astronomy covering space astronomy, optical astronomy, radio astronomy and developments in relativistic astrophysics. These chapters, written by experts in the field, provide an in-depth study of the subject and make this volume quite unique.

Slowly, silently, now the moon Walks the night in her silver shoon; This way, and that, she peers, and sees Silver fruit upon silver trees; One spring evening, the fairies gather in the woods. Two sleepy children join in the parade to a wonderful, dream-like fairy party. Illustrated by bright new talent, Carolina Rabei, this Walter de la Mare poem is brought to life with shimmering, ethereal illustrations, making it the perfect book for bedtime. One of four seasonal Walter de la Mare picture books that form a set, each with complementing colour palettes and illustrations by rising young star Carolina.

In this informative guide, Thomas Dixon argues that you do not have to be a genius to get a first at university. He sets out to de-mystify first-class degrees in the arts, humanities and social sciences, clearly articulating the difference between the excellent and the merely competent in undergraduate work. This concise, no-nonsense guidebook will give prospective and current students

advice on teaching and learning styles that prevail in university and on how to manage their two most important resources - their time and their lecturers. In an accessible and entertaining style, the author looks at subjects such as: making the transition from school to university developing transferable skills making use of lectures and seminars using libraries and the Internet note-taking, essays, seminars and presentations common mistakes to avoid writing with clarity and style revision and examinations. Illustrated with many examples from a range of academic disciplines, How to Get a First is an all-purpose guide to success in academic life. Visit the companion website www.getafirst.com
