Literary Nonfiction. Art. Introduced by Matthew Scott. *DIAGRAMS* is a book that collects 49 diagram drawings made between 2009 and 2014, and includes a conversation-based essay between the artists and the Canadian math scholar, Matthew Scott. These diagrams are an attempt at using the objective visual language of mathematical diagramming to illustrate some of the most important concepts we use to underpin our subjective understanding of the world. In what seems like a hopeless task, the central concern is not how these must inevitably fail to communicate in a truly objective way, but how they might actually succeed. This book constitutes the refereed proceedings of the 7th Pacific Rim Conference on Multimedia, PCM 2006, held in Hangzhou, China in November 2006. The 116 revised papers presented cover a wide range of topics, including all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues.

A sweeping survey of Karim Rashid's art and design innovations features unique lighting, tableware, manhole covers, and a Garbo trashcan, among other notable designs. Original.

Charlotte Perkins Gilman (1860-1935) penned this sardonic remark in her autobiography, encapsulating a lifetime of frustration with the gender-based double standard that prevailed in turn-of-the-century America. With her slyly humorous novel, *Herland* (1915), she created a fictional utopia where not only is face powder obsolete, but an all-female population has created a peaceful, progressive, environmentally-conscious country from which men have been absent for two thousand years. Gilman was enormously prolific, publishing five hundred poems, two hundred short stories, hundreds of essays, eight novels, and seven years' worth of her monthly magazine, *The Forerunner*. She emerged as one of the key figures in the women's movement of her day, advocating equality of the sexes, the right of women to work, and socialized child care, among other issues. Today Gilman is perhaps best known for the chilling depiction of a woman's mental breakdown in her unforgettable short story, "The Yellow Wall-Paper". This Penguin Twentieth-Century Classics edition includes both this landmark work and *Herland*, together with a selection of Gilman's major short stories and her poems.

Bond is back with a license to thrill. Forty-three years ago, Ian Fleming wrote his last great 007 adventure. Now, in Devil May Care, the world's most iconic spy returns in a Cold War story spanning the world's exotic locations. By invitation of the Fleming estate to mark the centenary of his birth, acclaimed novelist Sebastian Faulks picks up where Fleming left off, writing a tour de force that will electrify every James Bond fan. A fitting tribute to the Bond tradition, Devil May Care stands on its own as a triumph of witty prose and plenty of double-0 action. "In his house in Jamaica, Ian Fleming used to write a thousand words in the morning, then go snorkeling, have a cocktail, lunch on the terrace, more diving, another thousand words in the late afternoon, then more martinis and glamorous women. In my house in London, I followed this routine exactly, apart from the cocktails, the lunch, and the snorkeling." —Sebastian Faulks

Russian Society and the Orthodox Church examines the Russian Orthodox Church's social and political role and its relationship to civil society in post-Communist Russia. It shows how Orthodox prelates, clergy and laity have shaped Russians' attitudes towards religious and ideological pluralism, which in turn have influenced the ways in which Russians understand civil society, including those of its features - pluralism and freedom of conscience - that are essential for a functioning democracy. It shows how the official church, including the Moscow Patriarchate, has impeded the development of civil society, while on the other hand the non-official church, including nonconformist clergy and lay activists, has promoted concepts central to civil society.

Like many ideological dictatorships of the twentieth century, North Korea has always considered cinema an indispensable propaganda tool. No other medium penetrated the whole of the population so thoroughly, and no other medium remained so strictly and exclusively under state control. Through movies, the two successive leaders Kim Il Sung and Kim Jong Il propagandized their policies and sought to rally the masses behind them, with great success. This volume chronicles the history of North Korean cinema from its beginnings to today, examining the obstacles the film industry faced as well as the many social problems the films themselves reveal. It provides detailed analyses of major and minor films and explores important developments in the industry within the context of the concurrent social and political atmosphere. Through the lens of cinema emerges a fresh perspective on the history of North Korean politics, culture, and ideology.
