Radwa Ashour skillfully weaves a history of Granadan rule and an Arabic world into a novel that evokes cultural loss and the disappearance of a vanquished population. The novel follows the family of Abu Jaafar, the bookbinderhis wife, widowed daughter-in-law, her two children, and his two apprenticesas they witness Christopher Columbus and his entourage in a triumphant parade featuring exotic plants and animals and human captives from the New World. Embedded in the narrative is the preparation for the marriage of Saad, one of the apprentices, and Saleema, Abu Jaafar's granddaughtera scenario that is elegantly revealed in a number of parallel scenes. As the new rulers of Granada confiscate books and officials burn the collected volumes, Abu Jaafur quietly moves his rich library out of town. Persecuted Muslims fight to form an independent government, but increasing economic and cultural pressures on the Arabs of Spain and Christian rulers culminate in Christian conversions and Muslim uprisings. A tale that is both vigorous and heartbreaking, this novel will appeal to general readers of Spanish and Arabic literature as well as anyone interested in Christian-Muslim relations.

Modern Spanish Grammar: A Practical Guide is an innovative reference guide to Spanish, combining traditional and function-based grammar in a single volume. The Grammar is divided into two parts. The shorter section covers traditional grammatical categories such as word order, nouns, verbs and adjectives. The larger section is carefully organized around language functions and notions such as: giving and seeking information putting actions into context \* expressing likes, dislikes and preferences comparing objects and actions. All grammar points and functions are richly illustrated and information is provided on register and relevant cultural background. Written by experienced teachers and academics, the Grammar has a strong emphasis on contemporary usage. Particular attention is paid to indexing and cross-referencing across the two sections. This is the ideal reference grammar for learners of Spanish at all levels, from elementary to advanced. It will prove invaluable to those with little experience of formal grammar, as no prior knowledge of grammatical terminology is assumed and a glossary of terms is provided. The book will also be useful to teachers seeking back-up to functional syllabuses, and to designers of Spanish courses.

After creating a grammar, there's the 800-pound gorilla of the lexicon to deal with. This book gives you everything you need to know to create words. The first stop is etymology: it contains thousands of etymologies from a wide variety of languages. Borrow them or let them spark your own ideas! It's easy to let the lexicon be a coded version of your native language. The book contains tips on how to avoid this, including plenty of fascinating examples from non-English languages. You want to know which words to create first. It includes the 1500 words most commonly found in fantasy and science fiction, sorted by frequency. Many parts of the lexicon require real-world knowledge to handle. The Lexipedia contains just enough information on biology, physics, and human cultures to help you out. Plus, there's a discussion of the basic tools of the word creator: categories, metaphors, and derivation. Though aimed at conlangers, this book will be instructive and entertaining for anyone who's interested in words.

On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

"In *Mulatto · Outlaw · Pilgrim · Priest*, John K. Moore, Jr. presents the first in-depth study, critical edition, and scholarly translation of His Majesty's Representative v. José Soller, Mulatto Pilgrim, for Impersonating a Priest and Other Crimes. This legal case dates to the waning days of the Hapsburg Spanish empire and illuminates the discrimination those of black-African ancestry could face that Soller did face while attempting to pass freely on his pilgrimage from Lisbon to Santiago de Compostela and beyond. This bilingual edition and study of the criminal trial against Soller is important for reconstructing his journey and for revealing at least in part the de facto and de jure treatment of mulattos in the early-modern Iberian Atlantic World"-- This custom edition is published for Monash University.

A year-long study of the writing development of 27 first through third graders in an English/Spanish bilingual program was conducted during the 1980-81 school year. Samples of the children's writing were collected at four intervals, coded for computer tallying, and analyzed in terms of code-switching, spelling, punctuation and segmentation, structural features, stylistic devices, and content. Additionally, the context in which the writing developed was evaluated by classroom observations, teacher interviews, review of familial backgrounds, and a survey of the community language situation. Myths about bilingual language proficiency, biliteracy, bilingual education, teaching writing, and learning to write are all countered by evidence presented in this study. In a discussion of implications, the concept of a whole language approach to writing instruction is supported, in which authentic and functional texts are offered to and produced by children. Examples of the children's writing with appropriate translations are given along with various tables. Informal follow-up information is presented in three epilogues dealing with changes in the researcher's commitment to the study's original writing theories, the writing of some students a year after the study; and a chronological outline of the demise of the bilingual program used in the study. Appendices list interview questions used for teachers and aides and categories for coding the writing data. This book contains 134 references. (ALL)

The Brule Dwellers of Ascension Parish are descendants of Canary Island immigrants who came to Louisiana in the late 1700s. A few residents in and around the Ascension Parish area still speak an archaic dialect of Spanish which is at the brink of linguistic extinction. Because the Brule dialect is in the final stages of what is commonly known as “language death”, the case of Brule Spanish presents an exciting opportunity to investigate commonly held assumptions regarding the structural changes often associated with vestigial languages. Its relative isolation from other dialects of Spanish for over two hundred years serves as a sort of linguistic “time capsule” which provides information that is relevant to critical outstanding issues in Hispanic dialectology and historical linguistics. In addition to examining these issues, documenting the specific characteristics of Brule Spanish, and comparing Brule Spanish with other modern Spanish dialects, this book presents a very accessible introduction to the field of language death.
