World literature was long defined in North America as an established canon of European masterpieces, but an emerging global perspective has challenged both this European focus and the very category of "the masterpiece." The first book to look broadly at the contemporary scope and purposes of world literature, *What Is World Literature?* probes the uses and abuses of world literature in a rapidly changing world. In case studies ranging from the Sumerians to the Aztecs and from medieval mysticism to postmodern metafiction, David Damrosch looks at the ways works change as they move from national to global contexts. Presenting world literature not as a canon of texts but as a mode of circulation and of reading, Damrosch argues that world literature is work that gains in translation. When it is effectively presented, a work of world literature moves into an elliptical space created between the source and receiving cultures, shaped by both but circumscribed by neither alone. Established classics and new discoveries alike participate in this mode of circulation, but they can be seriously mishandled in the process. From the rediscovered Epic of Gilgamesh in the nineteenth century to Rigoberta Menchú's writing today, foreign works have often been distorted by the immediate needs of their own editors and translators. Eloquently written, argued largely by example, and replete with insightful close readings, this book is both an essay in definition and a series of cautionary tales.

In the future, the past will never be the same... By the end of the 25th Century few had as storied a career as Doctor J. Burke. An historian who used quantum superluminal teleportation to mingle among her forebears through twenty different decades making discoveries and recovering lost artifacts, she was the last of the Historical Archive Collection's 'big three' antiquinants. The physical effects of the profession had grounded jovial Ike Chernovich in old San Francisco, companion Braham Lilienthal had vanished without a trace three years before, and the indifference of the Minders from the future, who were best positioned to help, left Burke with a weary cynicism. Only the promise of a special mission, the brainchild of rookie archivist Nathan Rialto, brought her back again. It was Burke's specialty, the recovery of a glamorous old airliner from 1951 using a revolutionary new teleport, and in California as well. She would gather her trusty team of specialists, teach the rookie the ropes and perhaps contemplate a different kind of future afterward with Ike. From the moment it began it felt as if the whole mission had been created just for her...and that was only the beginning of her problems!

Safiro, the God of Death, and Sanguina, the Goddess of Life, created two heroes (Vytametas) -- mirror twins separated at birth yet destined to meet in a place where the future of their world will be decided by their powers. The only people who know not the ultimate purpose of the legendary Vytametas are the young heroes themselves. While the teenage Vytametas learn of their world and of their mission, they will be turned against each other by the two faiths they are meant to save: the demented Safiric Brotherhood and the shady Sanguinic Sisterhood.
