It comprises a series of self-teaching lessons in rapid, plain, unshaded, coarse-pen, muscular movement writing for use in all schools, public or private, where an easy and legible handwriting is the object sought. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions,

Written by leading theorists and empirical researchers, this book presents new ways of addressing the old question: Why did religion first emerge and then continue to evolve in all human societies? The authors of the book—each with a different background across the social sciences and humanities—assimilate conceptual leads and empirical findings from anthropology, evolutionary biology, evolutionary sociology, neurology, primate behavioral studies, explanations of human interaction and group dynamics, and a wide range of religious scholarship to construct a deeper and more powerful explanation of the origins and subsequent evolutionary development of religions than can currently be found in what is now vast literature. While explaining religion has been a central question in many disciplines for a long time, this book draws upon a much wider array of literature to develop a robust and cross-disciplinary analysis of religion. The book remains true to its subtitle by emphasizing an array of both biological and sociocultural forms of selection dynamics that are fundamental to explaining religion as a universal institution in human societies. In addition to Darwinian selection, which can explain the biology and neurology of religion, the book outlines a set of four additional types of sociocultural natural selection that can fill out the explanation of why religion

first emerged as an institutional system in human societies, and why it has continued to evolve over the last 300,000 years of societal evolution. These sociocultural forms of natural selection are labeled by the names of the early sociologists who first emphasized them, and they can be seen as a necessary supplement to the type of natural selection theorized by Charles Darwin. Explanations of religion that remain in the shadow cast by Darwin's great insights will, it is argued, remain narrow and incomplete when explaining a robust sociocultural phenomenon like religion.

Eclipses have long been seen as important celestial phenomena, whether as omens affecting the future of kingdoms, or as useful astronomical events to help in deriving essential parameters for theories of the motion of the moon and sun. This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope. In addition to cataloguing and assessing the accuracy of the various records, which come from regions as diverse as Ancient Mesopotamia, China, and Europe, the sources in which they are found are described in detail. Related questions such as what type of clocks

were used to time the observations, how the eclipse predictions were made, and how these prediction schemes were derived from the available observations are also considered. The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures, and will be of interest to historians of science, astronomers, and ancient and medieval historians.

Bringing the World Home sheds new light on China's vibrant cultural life between 1895 and 1919—a crucial period that marks a watershed between the conservative old regime and the ostensibly iconoclastic New Culture of the 1920s. Although generally overlooked in the effort to understand modern Chinese history, the era has much to teach us about cultural accommodation and is characterized by its own unique intellectual life. This original and probing work traces the most significant strands of the new post-1895 discourse, concentrating on the anxieties inherent in a complicated process of cultural transformation. It focuses principally on how the need to accommodate the West was reflected in such landmark novels of the period as Wu Jianren's *Strange Events Eyewitnessed in the Past Twenty Years* and Zhu Shouju's *Tides of the Huangpu*, which began serial publication in Shanghai in 1916. The

negative tone of these narratives contrasts sharply with the facile optimism that characterizes the many essays on the "New Novel" appearing in the popular press of the time. Neither iconoclasm nor the wholesale embrace of the new could square the contradicting intellectual demands imposed by the momentous alternatives presenting themselves. Book Abstract : Since the publication of Le Bon's book, *The Crowd*, little has been added to our knowledge of the mechanisms of crowd-behavior. As a practical problem, the habit of crowd-making is daily becoming a more serious menace to civilization. Events are making it more and more clear that, pressing as are certain economic questions, the forces which threaten society are really psychological. The current author's thesis is that there is a necessary connection between crowd-thinking and the various traditional systems of intellectualist, absolutist, and rationalist philosophy. He concludes the way out must be through the formation of some such habits of thinking.

The author argues that the humanist way of thinking may provide an educational method which will break up the logical forms in which the crowd-mind entrenches itself. (PsycINFO Database Record (c) 2006 APA, all rights reserved).

Practice makes perfect! It's no secret that improving your Spencerian penmanship requires practice. Unfortunately, Platt Rogers Spencer published less than 30 Spencerian practice sentences. That's why this helpful workbook offers over 180 pages of all-new phrases and sentences for you to refine your lettering. Across the top of each page is carefully composed Spencerian lettering by penman Schin Loong. Below the sample sentence is line after line of practice space where you can master your letter height, width, spacing, stroke weight and more. The pages are even perforated so it is easy for you to tear them out and practice on a perfectly flat surface. But this book contains no ordinary words—they are the immortal phrases from the Declaration of Independence that define freedom and liberty, such as “We hold these truths to be self evident that all men

Democratic Vernaculars is a comprehensive, culturally inclusive, and thematically unified history of the communicative, audience-centered rhetorical vernacular that occupies the “middle range” of English, bounded on the one side by expressive structure (grammar and linguistics) and on the other by aesthetics (literature).

Broadening the history of rhetoric by considering a vast collection of vernacular resources such as elementary grammars and readers, popular guidebooks, textbooks, and rhetorical treatises, this book advances the history of the rhetorical theory and pedagogy since the 17th century by examining ways in which diverse vectors of the rhetorical vernacular coalesced to produce an English language sufficiently idiomatic for practical social exchange while being, at the same time, suitable for higher literary, scholarly, and cultural pursuits.

Democratic Vernaculars is essential reading for scholars in rhetoric and the histories of language and education, and can serve as a text for upper-division undergraduate and graduate courses in rhetoric.

Bronislaw Malinowski had a talent for bringing together in single comprehension the warm reality of human living with the cool abstractions of science. His pages have become an almost indispensable link between the knowing of exotic and remote people and theoretical knowledge about humankind. This classic volume originally published in 1922 can be considered the founding document of economic anthropology, and remains the best one to read. It emphasizes the great significance of primitive economics by singling out the notable exchange system of the Trobriand Islands for special consideration. Although the main theme is economic, constant reference is made to social organization, life and meaning, the power of magic, and mythology and folklore. Following Malinowski, we are soon paddling on the lagoon, watching the natives under the blazing sun at their garden work, following them through the patches of jungle. And on the winding beaches and reefs, we shall learn about their life. The life we learn about is both Trobriand life in New Guinea as well as life of common humanity. For nearly thirty years, Waveland Press has made Malinowski's most famous ethnography available for modern-day students and readers at a reasonable price. Both the current print version and the ebook have been greatly enriched by 80 digitally enhanced historic photographs and maps.

In addition, guide sheets and instructions for individual letters and numbers offer aspiring calligraphers a practical approach to this enduring art form.
