Presenting the history of relations between the European Union and Japan, this book explains the origins and significance of the momentous 2018 Economic Partnership Agreement and its parallel Strategic Partnership Agreement. Set within the historical context of the 1991 Hague Declaration and Action Plan of 2001, this book analyses the impact of recent background changes to the liberal trading order, the proliferation of free trade agreements, and uncertainty about role of the United States in the world on relations between Japan and the EU. Adopting a path-dependent approach, it illustrates how these agreements were reached as a result of growing patterns of cooperative behaviour between the EU and Japan, and the imprint of shared past

experiences in areas from trade to security. In so doing, this book also raises important questions about the future of multilateral cooperation, exploring the potential for bilateral agreements to undermine the possibility of finding international solutions to increasingly international problems. EU–Japan Relations and the Crisis of Multilateralism will appeal to students and scholars of European and Japanese politics and international relations, as well as policymakers internationally with an interest in these significant agreements.

The world is in a mess – but the United Nations has a plan to fix things. The Sustainable Development Goals (SDGs) are little talked about but they are ambitious, utopian and cover a vast range of seemingly intractable issues. What is more, this book argues, they will probably work. Gary Rynhart has worked within the UN system for two decades, wrestling with difficult problems in many different countries around the world. He is optimistic that a combination of the SDGs and the fresh perspective of the young can deliver the massive changes that the world so badly needs. The book begins by providing an insider's insight into how big global deals like the SDGs are negotiated behind the scenes. It continues by looking in turn at critical issues and showing how UN agencies have tackled them in the past and plan to do so in future in the arenas of human rights, decent work, democracy, conflicts and disasters. It concludes by examining the political context: a world dogged by populism and fake news but in which the engagement of Generations Y and Z promises to ride to the rescue.

Monsters explores questions about the central concept of the monstrous: Why do we create monsters? Are they animal, human, both, or neither? Which of our fears and desires do monsters embody? What can monsters tell us about our cultural and historical moments? How do we cope with the monsters that haunt our imaginations--and our societies? Readings by classic poets, contemporary fiction writers, pop culture critics, philosophers, psychologists, occultists, veterinarians, ethicists, historians, and others take up these questions and more. Questions and assignments for each selection provide a range of activities for students to write about vampires, werewolves, zombies, mermaids, serial killers, classic horror movie monsters, and more strange things that go bump in the night. Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, *Canadian Society in the Twenty-First Century* examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. Exploring the unique character of Canada today, this text is a vibrant resource for sociology courses on Canadian society as well as courses in Canadian studies and Canadian history.
