ORIGINAL DESCRIPTION (1958): " For the fifth straight
year, this Trend Book presents an authoritative
description of all of the passenger cars produced in the
world today. Extreme precautions were taken to give you
accurate, up-to-the-minute information on each of the
automobiles presented. The volume is therefore an
essential reference for your automotive library. Complete
specifications of each make and model are compiled in
an easy-to-read table at the back of the book."
This is an essential guide for doctors wishing to
maximise the potential of their PDA or smartphones and
is the only book available to address the specific needs
of doctors in relation to PDAs and smartphones.
Handheld computers, or PDAs, are computers small
enough to hold in your hand or fit into your pocket.
Smartphones are PDAs which also allow the user to
make and receive phone calls. For doctors, PDAs are

possibly the most clinically appropriate of all the computer devices created. The Doctor's PDA and Smartphone Handbook aims to introduce readers to the basics of PDAs. Comprehensive in its approach and easily accessible to those with no technical knowledge, the first few chapters demonstrate how the devices are used and how effective they can be in day-to-day clinical care and in training activities. Communication and sharing data and clinical information is enhanced if the full team is equipped with PDAs, and later chapters discuss more advanced uses and issues that should be considered if planning to equip the whole team. The text is accompanied by invaluable teaching videos and vignettes illustrating how teaching points covered in each chapter can be applied to realistic scenarios. Written by one of the world's leading experts on the clinical uses of mobile computing, Dr Mohammad Al-Ubaydli is now a researcher in the USA. The online videos are by Dr Chris Paton, Director of New Media New Medicine and creator of some of the world's leading websites for clinical education. Together, they have combined their expertise and have created a highly informative and effective text. Today, opportunities and challenges of available technology can be utilized as strategic and tactical resources for your organization. Conversely, failure to be current on the latest trends and issues of IT can lead to ineffective and inefficient management of IT resources. Managing Information Technology in a Global Economy is a valuable collection of papers that presents IT management perspectives from professionals around the world. The papers introduce new ideas, refine old ones

and possess interesting scenarios to help the reader develop company-sensitive management strategies. The ABA Journal serves the legal profession. Qualified recipients are lawyers and judges, law students, law librarians and associate members of the American Bar Association.
