In the current era of cost awareness and the pressure to free hospital beds as rapidly as possible, coupled with the move towards community care, there is increasing emphasis on returning and maintaining disabled people in the community. Often, many health and welfare workers are involved in this process. Occupational therapists however have a particular role to play. Their training is such that they are able to assess and treat the physical, psychological and social aspects of a disabling condition. This enables them to help disabled people to achieve their maximum ability in the environment in which they live. Whether the occupational therapist is hospital or community based, employed by the health or social service department, her caseload is often vast. The occupational therapist may specialize in a particular age group or disability, but it is more likely that she will have to work with a wide age range from the very young to the very old. Assessment of needs and the subsequent provision of equipment and adaptations is the greater part of the OT's job. Other aspects include counselling the disabled person and his family and planning future intervention must often, however reluctantly, be given a low priority. In spite of staff shortages occupational therapists are frequently called on to provide the client and other groups of workers with advice and information on all aspects of living with any disability.

Leaving full-time employment to enter retirement often requires a 180-degree change—in mindset and behavior—from the way you managed your time and money previously. This is especially true for Baby Boomers who may have never experienced adult life without a full-time job and have been practicing the same habits since their 20s. These life transitions can be looked at as if they require “flipping a switch.” Some changes happen suddenly like an on/off switch, while others happen over time like a “dimmer switch”. Some “switches” are voluntary like spending accumulated savings, while some are mandatory like taking required minimum distributions starting at age 72. And to make matters more confusing, there are also lifestyle and social changes to consider as well. Flipping a Switch discusses 35 financial, lifestyle, and social transitions you’ll encounter upon entering retirement, including: • Full-time work to new pastimes • Saving money to spending money • Receiving a paycheck to creating a “paycheck” • Funding retirement savings plans to taking required minimum distribution withdrawals • Accumulating possessions to downsizing Everyone has unique “switches” to flip. Flipping a Switch: Your Guide to Happiness and Financial Security in Later Life offers important information and guidance new retirees need before undertaking their new life. Each chapter includes a “How to Flip This Switch” section with suggested action steps. Nationally known speaker, author, and Certified Financial Planner® Dr. Barbara O’Neill will help you develop a plan to become your best future self.
