Lexi Mazur is a depressed, alcoholic, pill-popper whose only joy has become her reality TV shows, often fantasizing that the people on TV are a part of her world. After her boyfriend Steve leaves her, she fixates on the show *Socialites* and its star Magnolia Artois, following every facet of the girl's life on social media in the hopes of befriending and becoming more like her. But stalking isn't new to Lexi. She ultimately won over her ex Steve by following and manipulating every minute detail about him so he'd fall for her. In fact, she landed her other ex-boyfriend Jeremy in the same way. Being a pharma rep, she's used to manipulation to get doctors to buy her drugs, along with the perk of saving pills for herself. But what happens when the stalker gets stalked? Recently, Lexi has felt someone watching her: in her apartment in Queens, at her job. At first, she thinks her

mind's playing tricks, but the watcher is behaving just like she would. And soon they begin leaving threatening clues like she starts to do to Magnolia once her obsession grows more dangerous. The reality star Magnolia trying to turn the tables? Or even someone she might not know? Lexi learns the only way to beat her stalker is to use her own stalking prowess to outsmart them at their own game. But has she finally met her match? Praise for *STALKER STALKED*: "An unputdownable read, complex and powerful. Goldberg's razor-sharp writing masterfully captures the protagonist's evaporating grip on reality." —Martin Bodenham, author of *Watch for Me*, *Crime and Justice*, and *The Geneva Connection* "The tables are turned in dramatic fashion when a pill popping, reality-television-addicted stalker suddenly finds herself the one being stalked. From page one, I was drawn into Lexi's dark, suspenseful world. Taking readers on an emotional and thrilling journey, *Stalker Stalked* is a riveting, unique concept that will keep you turning the pages all night long." —Nicole Mabry, Author of *Past This Point* "This mesmerizing thriller from Lee Matthew Goldberg stuck me in the protagonist's obsessive mind to the point that, toward the end, I found myself doubting the motives of my friends. Not that this will happen to other readers. It's probably all in my mind. Probably." —Rob Pierce, author of the *Uncle Dust* trilogy "A rare find. As entertaining as it is subversive, Lee Matthew Goldberg's razorblade prose and scathing wit lend an easy comparison to Bret Easton Ellis and Jay McInerney and with *Stalker Stalked*—a devilishly acerbic tale of a pill-popping, reality TV superfan in delirious freefall—he has not only created a work of fiction as vital to our right here and right now as *American Psycho* and *Bright Lights*, *Big City* were to theirs, he's issued a bold challenge to an entire generation of novelists: Catch me if you can!" —John Jantunen, author of *Savage Gerry* and *No Quarter* "You know it's a good thriller when you have to make sure no one is in your closet, and that your door is locked! This is an exciting and fascinating read." —*The Black List* "Goldberg turns the conventional stalker thriller on its head with a tale that is fresh, suspenseful and hugely entertaining. Lexi Mazur is every bit as awkward, relatable and dysfunctional as *Bridget Jones*. A tautly-written plot and smart characterization will keep readers on the edge of their seats until the very last paragraph." —*BestThrillers.com*

Over the last two decades, stalking has received increasingly widespread attention. The establishment of anti-stalking legislation has helped to spur interest in stalking research and the forensic assessment of stalkers. Popular representations of stalking have made the public more aware of this phenomenon. It has long been the responsibility of mental health professionals to provide assessments of and treatment for stalkers and their victims, and as criminal cases involving defendants charged with stalking become more common, it is now also the responsibility of legal professionals to be knowledgeable about psychiatric aspects of stalking behavior and the risks that so often must be minimized through legal action or a combination of clinical and legal interventions. This volume provides a thorough overview of current scientific and clinical research about stalking, along with practical guidance and original commentary from the Psychiatry and the Law Committee of the Group for the Advancement of Psychiatry, an organization recognized for its contributions to mental health literature. In addition to covering the most widely discussed scientific topics related to stalking, including classification of stalking behaviors, risk assessment and risk management of stalkers, and the stalking experience from the perspective of victims, this book examines celebrity and special target stalking, cyberstalking, forensic assessment, and juvenile and adolescent stalking. *Stalking: Psychiatric Perspectives and Practical Approaches* provides a novel and comprehensive contribution to a field in need of an up-to-date text, written from the vantage point of forensic psychiatrists who encounter stalkers and their victims in their distinct roles as treatment providers and forensic evaluators. The prism of stalking and the risks involved continue to fascinate and frighten. In pursuit of rounded coverage, the authors have incorporated findings from numerous studies and analyzed these findings from several theoretical perspectives. Every chapter has been written from the vantage point of a committee of nationally recognized forensic psychiatrists who offer their perspectives on this fascinating but complex topic. Mental health professionals, members of the judiciary, law enforcement professionals, media personnel, and the public will no doubt find this text to be an informative and useful resource.

Each year an estimated 3.4 million men and women become victims of stalking. While a man in a black coat following a girl in a dark alley is the media's stereotypical portrayal of stalking, there is actually a wide range of behavior that can be defined as such. Stalking—characterized by harassment, repeated calling, sending inappropriate letters or gifts, unsuitable use of social media, confrontation, and other unwanted behaviors—is a worldwide problem that is on the rise, especially the incidence and prevalence of cyberstalking. This book presents a collection of prominent articles published in the peer-reviewed journal *Violence and Victims*, written by experts on stalking from a variety of social science disciplines. Authors present research related to stalking victims and perpetrators, cyberstalking, how to identify stalking, and stalking in a variety of

settings with a focus on college campuses. College students, many of whom are relatively new to intimate relationships, are especially prone to becoming stalked or perpetrating stalking. Several articles in this collection address stalking within the college population, including an empirical study of stalking victimization in men and women and a discussion of coping strategies at a Finnish university. Authors examine varying perceptions and attitudes toward stalking on campus, and discuss how to draw the line between courtship behavior and stalking. Personality attributes of stalkers include, according to one study, less social competence and a greater tendency to display borderline behaviors. Studies also address the relationship between stalking and gender, the stalking experiences of battered women, and the growing incidence of cyberstalking. This book will provide a solid research foundation toward understanding and controlling stalking behaviors, which can potentially lead to more serious abuse. "Lars Kepler ... [has] a taste for the macabre and a surefire recipe for the lurid serial-killer thriller. ... This is not a book for anyone on heart medication. Kepler is a virtuoso at delivering scenes of suspense." --Marilyn Stasio, *The New York Times Book Review* The internationally bestselling authors of *The Sandman* and *The Hypnotist* return with a terrifying new thriller: Detective Joona Linna--recently returned from compassionate leave--reunites with hypnotist Erik Maria Bark in a search for a seemingly unassailable sadistic killer. With the arrival of the next, similar video, the police understand that the killer is toying with them, warning of a new victim, knowing there's nothing they can do. Detective Margot Silverman is put in charge of the investigation, and soon asks Detective Joona Linna for help. Linna, in turn, recruits Erik Maria Bark, the hypnotist and expert in trauma, with whom Linna's worked before. Bark is leery of forcing people to give up their secrets. But this time, Bark is the one hiding things. Years before, he had put a man away for an eerily similar crime, and now he's beginning to think that an innocent man may be behind bars--and a serial killer still on the loose. . .

Public figures require attention, whether from a constituency who votes them in or out of office, shareholders who decide their economic benefit to the corporation, or fans who judge their performances. However, on the periphery of this normal attention resides a very real risk; that of a much smaller group of individuals who lack the ability to discriminate between their own private fantasies and the figure's public behavior. They may be personally insulted by perceived betrayal, fanatically in love due to a perceived affectionate or sexual invitation, or simply preoccupied with the daily life of the public figure. Such individuals may fixate and do nothing more. Others communicate or approach in a disturbing way. A few will threaten. And on rare occasions, one will breach the public figure's security perimeter and attack. Stalking, Threatening, and Attacking Public Figures is a comprehensive survey of the current knowledge about stalking, violence risk, and threat management towards public figures. With contributions from forensic psychologists and psychiatrists, clinicians, researchers, attorneys, profilers, and current and former law enforcement professionals, this book is the first of its kind, international in scope, and rich in both depth and complexity. The book is divided into three sections which, in turn, focus upon defining, explaining, and risk managing this increasingly complex global

reality. Chapters include detailed case studies, analyses of quantitative data, reflections from attachment theory and psychoanalytic thought, descriptions of law enforcement and protective organization activities, mental health and psychiatric categorizations and understandings, consideration of risk assessment models and variables, victim perspectives, and others.

Stalking is not love is my account of what my family and I have gone through since I left my ex-husband. It details 3 years of us being stalked, from high speed chase to emails. I refuse to live a life of fear, a life that is non-functional. I will not feel guilty about not loving someone. A person has the right to end a relationship if they are not happy, the right not be harassed or stalked. Stalking is not love, it is a crime. It also is one of the hardest crimes to be convicted of. I know because I am currently experiencing this very situation. I receive emails, phone calls and have had the passwords on personal accounts changed because the stalker knows my SSN. The stalker parks his car down the street from my home and sits for hours. When he gets fed up he rings my doorbell angrily and leaves. These are just a few of the things I go through daily. I know there are others who are going through the same thing that I am currently experiencing. Some who are hurt or has lost their lives. Maybe our stories can come together and form a band of women, men, boys, girls, people or simply the stalked and be heard. We need help. Stalking is not love. I have a father that has loved me since birth. My father protected me and kept me safe. I have five brothers that love me dearly. I know what it is like to be truly loved by a man. I have a heavenly father tha tloves me unconditionally and protects me. God is my source and refuge. A person would not hurt what they love.
