

## Standard Data Rate Analysis Morth

Drawing on wide range of legal documents from the seventeenth-century, this book contains quantitative and qualitative analyses of witchcraft trials in Scotland and Finnmark, Norway. Attention is drawn towards the voices of the accused persons, the witnesses, and the law.

This issue of *Veterinary Clinics: Equine Practice*, guest edited by Dr. Carrie Finno, focuses on Equine Genetic Diseases. Topics include: Genetics, Genomics, and Emergent Precision Medicine 12 years post Equine Reference Genome; Equine SNP Genotyping Arrays; Next-generation Sequencing; Genetic Testing in the Horse; Genetics of Cardiovascular Disease; Genetics of Respiratory Disease; Genetics of Neurological Disease; Genetics of Immune Disease; Genetics of Orthopedic Disease; Genetics of Ocular Disease; Genetics of Skin Disease; Genetics of Endocrine and Metabolic Disease; Genetics of Muscle Disease; Genetics of Laminitis; Genetics of Reproductive Diseases; and Genetics of Behavioral Traits.

This issue of *Emergency Medicine Clinics*, guest edited by Drs. Michael K. Abraham and Evie Marcolini, focuses on Neurologic Emergencies. This issue is one of four selected each year by series Consulting Editor, Dr. Amal Mattu. Topics include: Traumatic injuries of the nervous system; Modern

Neuroimaging Techniques in Diagnosing TIA and Acute Ischemic Stroke; Neurologic Emergencies at the Extremes of Age; Headache in the Emergency Department Avoiding Misdiagnosis of Dangerous Secondary Causes and Infections of the Central Nervous System.

With 26 entirely new and 5 extensively revised chapters out of the total of 39, the Mobile Communications Handbook, Third Edition presents an in-depth and up-to-date overview of the full range of wireless and mobile technologies that we rely on every day. This includes, but is not limited to, everything from digital cellular mobile radio and evolving personal communication systems to wireless data and wireless networks. Illustrating the extraordinary evolution of wireless communications and networks in the last 15 years, this book is divided into five sections: Basic Principles provides the essential underpinnings for the wide-ranging mobile communication technologies currently in use throughout the world. Wireless Standards contains technical details of the standards we use every day, as well as insights into their development. Source Compression and Quality Assessment covers the compression techniques used to represent voice and video for transmission over mobile communications systems as well as how the delivered voice and video quality are assessed. Wireless Networks examines the wide range of current and developing wireless networks and wireless methodologies. Emerging Applications explores newly developed areas of vehicular

communications and 60 GHz wireless communications. Written by experts from industry and academia, this book provides a succinct overview of each topic, quickly bringing the reader up to date, but with sufficient detail and references to enable deeper investigations. Providing much more than a "just the facts" presentation, contributors use their experience in the field to provide insights into how each topic has emerged and to point toward forthcoming developments in mobile communications.

The official organ of the North Central Association of Colleges and Schools (called earlier North Central Association of Colleges and Secondary Schools). This issue of Hematology/Oncology Clinics of North America, guest edited by Dr. Joaquin Bellmunt, is devoted to Bladder Cancer. Articles in this issue include: Diagnosis and Staging of Bladder Cancer; Epidemiology of Bladder Cancer; Molecular Biology of Bladder Cancer; Pharmacogenomics in Bladder Cancer; Management of Non-muscle Invasive Bladder Cancer; Non-urothelial Bladder Cancer and Rare Variant Histologies; Management of UUT; New Trends in Surgical Management of Bladder Cancer; Bladder Preservation Strategies; Perioperative Therapy of Bladder Cancer (Neoadjuvant and Adjuvant); First Line Treatment and Prognostic Factors of Metastatic Disease: Platinum Eligible Patients; First Line Treatment of Metastatic Disease: Platinum Ineligible Patients; Salvage Therapy in Metastatic Disease; and Future Directions and Targeted Therapies in Bladder Cancer.

The North American Industry Classification System

(NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. It is a joint work between the United States, Canada, and Mexico that allows a high level of comparability between the countries. The NAICS officially replaced the SIC (Standard Industrial Classification) system in 1997. The publisher has included the SBA Size Standards Table as an appendix at the back of this book to assist users of the data. Should you have suggestions or feedback on ways to improve this book please send email to [Books@OcotilloPress.com](mailto:Books@OcotilloPress.com) If you would like to order a copy of this book as a 3 ring punched looseleaf print please contact [Books@OcotilloPress.com](mailto:Books@OcotilloPress.com) Annual meeting for held jointly with the Minnesota Academy of Science.

This issue of Endocrinology and Metabolism Clinics of North America provides the endocrinologist with essential updates on treatment of type 1 diabetes, with an eye toward future trends and developments. The Guest Editors brought together a remarkable group of notable authors, such as Paul Robertson, President of the National Diabetes Association. Topics covered include epidemiology; economics; contemporary management; inpatient management; update on insulin pumps and continuous glucose monitoring systems; update on studies aimed at interdicting and preventing type 1 diabetes; advances in the prediction, natural history, and mechanisms leading to type 1 diabetes; complications; hypoglycemia in type 1 diabetes; new

lessons from animal models; the role of the gut in the genesis of type 1 diabetes and other autoimmune diseases; and an update on transplantation for reversing type 1 diabetes.

This issue of Surgical Oncology Clinics of North America is devoted to "Breast Cancer" and is edited by Lisa Newman, MD, of the University of Michigan. Expert authors in this issue review this topic in articles such as: Applications for Breast MRI; Lobular Neoplasia; Epidemiology of Breast Cancer; Percutaneous Ablation of Breast Tumors; Triple Negative Breast Cancer and the Basal Breast Cancer Subtype; Molecular Profiling of Breast Cancer; Surgical Leadership and Standardization of Multidisciplinary Breast Cancer Care; Neoadjuvant/Primary Systemic Therapy for Breast Cancer; Management of the Clinically Node-Negative Axilla in Patients with Primary and Locally-Recurrent Breast Cancer; Management of the Axilla in Patients with Node-Positive Breast Cancer; Prophylactic Bilateral Mastectomy and Contralateral Prophylactic Mastectomy; Advances in Reconstruction of Mastectomy and Lumpectomy Defects; Nipple-Sparing Mastectomy; and Breast Cancer Disparities.

1. Introduction -- 2. Macroeconomics of NAFTA -- 3. Individual industries -- 4. Agriculture -- 5. Workers displaced by NAFTA -- 6. Environment -- Appendix A. Investment provisions of NAFTA -- Appendix B. Macroeconomic simulations of NAFTA.

Your timely source for more cost-effective and less disruptive solutions to your underground infrastructure needs. The North American Tunneling Conference is the

premier biennial tunneling event for North America, bringing together the brightest, most resourceful, and innovative minds in the tunneling industry. It underscores the important role that the industry plays in the development of underground spaces, transportation and conveyance systems, and other forms of sustainable underground infrastructure. With every conference, the number of attendees and breadth of topics grow. The authors—experts and leaders in the industry—share the latest case histories, expertise, lessons learned, and real-world applications from around the globe. Crafted from a collection of 126 papers presented at the conference, this book takes you deep inside the projects. It includes challenging design issues, fresh approaches on performance, future projects, and industry trends as well as ground movement and support, structure analysis, risk and cost management, rock tunnels, caverns and shafts, TBM technology, and water and wastewater conveyance.

This issue of Neuroimaging Clinics of North America focuses on Functional Connectivity, and is edited by Dr. Jay Pillai. Articles will include: Applications of rs-fMRI to presurgical mapping: sensorimotor mapping; Dynamic functional connectivity methods; Machine learning applications to rs-fMRI analysis; Frequency domain analysis of rs-fMRI; Applications of rs-fMRI to epilepsy; Data-driven analysis methods for rs-fMRI; Applications of rs-fMRI to presurgical mapping: language mapping; Limitations of rs-fMRI in the setting of focal brain lesions; Applications of rs-fMRI

to neuropsychiatric disease; Applications of rs-fMRI to Traumatic Brain Injury; Applications of rs-fMRI to neurodegenerative disease; Graph theoretic analysis of rs-fMRI; and more!
