The Leningrad System is one of the sharpest and most interesting replies to 1 d4, and since this typical set-up is also playable against the flank openings 1 c4 and 1 f3, it provides the Black player with a genuine universal weapon. A repertoire for Black based on 7... Ee8 in the main line of the Leningrad System is presented here, but since the typical motifs and ideas for both sides are fully explained. White players too will benefit from a study of the book.

The Dutch chess opening is renowned as a fighting weapon against 1.d4, as 1...f5 immediately sets up an unbalanced struggle. Then Black's kingside fianchetto, which defines the Leningrad Dutch, allows pawn-storming play in similar style to the King's Indian Defense. Mihail Marin is the ideal author to explain both the strategic ideas and the latest theory. Leningrad Dutch covers lines where White also fianchettoes the king's bishop - these lines are the critical test of the Leningrad. The companion volume, Dutch Sidelines, completes Black's Dutch repertoire.

The Grunfeld is an energetic and popular defense to queen's pawn openings and is a favorite of the world number one Garry Kasparov. From the start of the game Black allows White to build an apparently strong centre but then attacks it with all

his forces. Play can become extremely sharp and theoretical and this opening very much appeals to dynamic players. In this book, International Master Jacob Aagaard revisits the fundamental principles of the Grunfeld and its numerous variations. Throughout the book there are an abundance of notes, tips and warnings to guide the improving player, while important strategies, ideas and tactics for both sides are clearly illustrated. User-friendly design to help readers absorb ideas Concentrates on the main ideas of the Grunfeld Ideal for the improving player"

An experienced chess trainer's guide to a dynamic opening system.

The Dutch Defence is one of Black's most combative responses to 1.d4, and the Stonewall is the boldest version of this opening. Black immediately seizes space in the centre and clamps down on the e4-square, laying the foundations for a complicated strategic battle. Many players believe the Stonewall to be a substandard opening, naively assuming that the e5-outpost and bad light-squared bishop must give White the advantage. GM Nikola Sedlak disagrees, and in *Playing the Stonewall Dutch* he shares the insights that have helped him to rack up a healthy plus score from Black's side. In addition to providing a complete repertoire in the main lines of the Stonewall, this book also offers useful guidance on dealing with Anti-Dutch variations and various move-order subtleties.

A guide to chess strategy uses examples from such players as Nimzowitsch and Kramnik to illustrate developments in chess strategy.

The very closely linked Slav and Semi-Slav Defences are two of the most popular and combative openings that Black can play against the Queen's Gambit. They have provided the battleground for thousands of exciting encounters between the world's chess elite, including Garry Kasparov, Vishy Anand, Vladimir Kramnik, Alexei Shirov, and Alexander Morozevich.

tactical players and solid, positional players alike. It will be useful for those wanting to understand the basics of Benoni Systems.

The Reti Opening has been the most common choice of the most recent years. It is a sound and easy to learn opening repertoire with many important nuances and move orders. Magnus Carlsen, the current World Champion, made this opening becoming very trendy and popular. The young French Grandmaster Adrien Demuth provides a full positional and dynamic opening repertoire for White, with explanations of the most important thematic ideas, making this book ideal for any club or tournament player.

The Classical Dutch is an ambitious and underrated defence to queen's pawn openings. With his first few moves Black creates an asymmetrical pawn structure which unbalances the position from a very early stage, allowing both white and black players to fight for the initiative. Now, for the first time in recent history, International Master Jan Pinski delves into the secrets of the Classical Dutch, studying both the positional motives and tactical nuances for both sides. He deals with the theoretical main lines as well as the crafty side variations, updating the reader on all the new important wrinkles.

Alekhine's Defence is a sharp and controversial opening in which Black attacks from the very first move, provoking White into lunging forward in the center. White is often able to construct an impressively large central pawn formation, but Black's hope is that

this becomes over-stretched and disintegrates in the face of a vicious counterattack. Unsurprisingly, Alekhine's Defence has always been a favorite amongst uncompromising players such as Fischer and Alekhine himself, while more recently it's been utilized by the likes of Ivanchuk and Short. In this easy-to-read guide, openings expert John Cox goes back to basics, studying the essential principles of Alekhine's Defence and its numerous variations. Throughout the book there are an abundance of notes, tips and warnings to guide the improving player, while key strategies, ideas and tactics for both sides are clearly illustrated. *User-friendly lay out to help readers absorb ideas *Concentrates on the key principles of Alekhine's Defence *Ideal for the improving player

The Sicilian Defence is by far the most popular chess opening. If you play 1 e4 as White, on average you are likely to meet the Sicilian in virtually every other game! You need to be prepared to face the Sicilian at all times, and a ready-to-use repertoire against it is an indispensable weapon. In this book, Gawain Jones confronts the challenge of meeting the Sicilian head on. He has constructed a comprehensive Anti-Sicilian repertoire for White, which is based on lines he has successfully employed at grandmaster level. These are sound, reliable options for White, but don't be fooled – they also contain more than a drop of poison. Variations covered include the popular King's Indian Attack, various Bb5 systems and weapons against Black's offbeat tries. A chess book on the openings, aimed at a club audience.

Dutch Defense players often have the smug satisfaction of knowing their opening better than their opponents. But if you play the Dangerfield Attack, the joke will be on Black!

Like the American comic icon Rodney Dangerfield, those who use an early Bf4 against the Dutch "get no respect." Dutch Defense manuals frequently dismiss it, but then they ignore White's best continuation, often assuming the first player will follow up with a meek London System setup. Rudel presents an entirely new way to play Bf4 against the Dutch. This attack is a plug-and-play solution for those opening 1.d4. All standard Dutch Defense formations are covered, including Q-side fianchetto defenses and the deferred Leningrad. NOTE: This book is essentially the anti-Dutch segment from Rudel's much larger book, Fight the King's Indian, Grunfeld, and Dutch Defenses with Zuka. This smaller book has been released concurrently specifically (and solely!) for those who are satisfied with their lines against ...g6 and only want a new response to the Dutch.

This is an updated and largely expanded edition of the highly acclaimed Starting Out: The Sicilian. John Emms goes back to basics, studying the fundamental principles of the Sicilian and its many variations.

Jovanka Houska reveals everything you need to know about the Scandinavian, whether you are playing it as Black or facing it with White.

Building and maintaining an opening repertoire can be a demanding task -- for a start there are an enormous number of different lines to choose from. There's a strong temptation amongst beginners and improving players to opt solely for tricky lines in order to snare unsuspecting opponents, but this approach has only short-term value. As players improve and their opponents become stronger, very often these crafty lines don't stand up to close scrutiny, and suddenly they back to square one with no suitable opening weapons. In Starting Out with 1 e4! and Starting Out with 1 d4! Neil McDonald
