Being partnered with a narcissist or borderline personality can be hard enough, but learning how to shield children from the fallout is paramount. Here, the authors show readers how to manage parenting when a narcissistic or borderline partner is part of the equation. Life in a narcissistic family system is at best challenging, and too often filled with chaos, isolation, emotional outbursts, and rigid controlling behaviors. It is too often devoid of peace and emotional safety. In the worst outcomes, children in these families grow up with low self-worth, issues with trust and belonging, and a lack of self-compassion. They are at significant risk of carrying the cycle forward and having poor adult relationships. This book offers a way to intervene and disrupt the cycle of negative outcomes for children. Written by two family therapists who bring a combined total of sixty years of clinical practice with individuals and families, the book pulls no punches, giving clear-headed advice, easy to follow actions to help children, and an abundance of teaching examples. Instead of the doom and gloom scenarios often presented about life with a narcissist or borderline, this book provides a much more positive outlook, and most importantly, it offers hope and a path to an entirely different outcome for the family members. Supported by current research in neuroscience, mindfulness and parenting information, the book focuses on teaching resilience and self-compassion to raise emotionally healthy children, even in a narcissistic family system. It starts by helping parents get a clear understanding of what they face with a narcissistic or borderline partner. There is no room here for denial, but there are also many options to explore. It explains how and why the narcissistic family system functions so poorly for raising healthy children, and pinpoints the deficits while providing information on how to intervene more effectively for the benefit of the children. Using their years of experience, the authors present ideas for staying together as well as knowing when to leave the relationship and how

best to do that. Emphasis throughout the book is on supporting and strengthening the reader with encouragement, concrete ideas, skills and compassionate understanding.

Damian Janus draws on his clinical experience to address the relationship between psychopathology and religion. Using clinical vignettes and religious concepts, Janus questions common understandings of mental disorders. Are you trapped in a toxic relationship? Have you been led to believe that it's you who's always wrong? Are uncontrolled emotions isolating you and destroying everything they touch? Are you afraid of what will happen if you decide to break out of your relationship? Being in a relationship with a person who has a borderline personality means living a love-hate relationship that's obsessive, complicated and unstable. Unfortunately, these kinds of relationships can be particularly difficult to escape from. However long the relationship has lasted, a relationship with a person who has BPD typically creates a destabilizing impact on the psyche of those who live with it, and leaves emotional wounds that are very difficult to heal. Sadly, sometimes, these relationships produce more than just psychological wounds. Stalking, threats and physical violence are all possibilities when a person breaks up with someone who has a serious borderline personality disorder. Threats of suicide, self-harm or even revenge attempts are all common issues in such situations. Sufferers of BPD live at the limit, they are acrobats in a precarious balance on a razor's edge. This book is essential reading if, in the last three months, a person that you are close to has been overwhelmed by: Anxiety, depression and anger, often for reasons that others find difficult to understand or that they consider inconsequential. Intense or uncontrollable emotional explosions. Instability in interpersonal relationships and self-esteem. Concerns about abandonment. Desperate feelings of being misunderstood. Feelings of powerlessness and despair. Ideas about self-harm and/or suicide. Doubts about themselves and their sanity. DO THE FOLLOWING SYMPTOMS PLAY FAMILIARLY? A person who comes into close contact with a sufferer of BPD will, over time, be exposed to a variety of manipulative behaviours. Normally the BPD sufferer will use sophisticated manipulation techniques in order to decline even the most minor of life's responsibilities. To put it briefly, as suggested by one of my readers, "BPD people put their entire lives in your hands and then blame you and punish you if something goes wrong." BPD

is a black hole of attention and affection. Nothing can fill this void. The person closest to the BPD victim can experience the following feelings that prevent that person from moving away from their BPD: They will feel used and manipulated. They will be forced to sacrifice their personal needs in a dedicated existence, devoted to the sufferer of BPD. Concern about what will happen to the BPD sufferer if I leave. How will the BPD sufferer react to a break up? Will they try to self-harm or commit suicide? If I abandon the BPD sufferer, then 'I am the bad person' who has been selfish, and disregarded him, so what he says is true. There are many other situations that are listed within this book. Knowing the right information allows you to limit the damage and avoid unnecessary suffering. This book is not the solution to all your problems, but I GUARANTEE that if you read and carefully review all the chapters of this book, ABSORB all the tips and finally APPLY the techniques provided by this manual, you will immediately feel a feeling of relief and you will have all the tools you need to rebuild a relaxed and peaceful life. If you've been manipulated, then odds are you are having a hard time figuring out who has the problem, what is normal compared to what is problematic, and if your wants, needs, and feelings are valid. This confusion is often caused by what is known as the "FOG." The disastrous effects of being lost in the FOG are confusion, crazymaking, people pleasing, an erosion of boundaries, and the ultimate loss of self. The FOG is an acronym that stands for "Fear, Obligation, and Guilt." These three emotions are often at the core of manipulation and are often how narcissists, sociopaths, and other types of emotional manipulators go about controlling their targets. However, this type of destructive manipulation isn't just limited to narcissists and sociopaths. What makes this well-intended bad advice so damaging is that, on the surface, it seems like good advice--especially if it's coming from people who seem to have our best interests in mind, such as friends, family, church members, support group members, spiritual advisors, or therapists. Some of the concepts covered are: Who are You to Judge vs. Being Discerning No One is Perfect vs. Tolerating Abuse Commitment vs.

Codependency Self-love vs. Selfishness A Person Acting the Part vs. A Person Actually Changing A Friend vs. Someone Being Friendly Being in Love With Them vs. Being in Love With Who They Pretended to Be Workable Behavior vs. Deal Breakers Acceptance vs. Allowance Going Through So Much Together vs. Being Put Through So Much By Them Sincerity vs. Intensity Healthy Bonding vs. Trauma Bonding Insincere Remorse vs. Sincere Remorse ...and many more.

Shari Schreiber learned about healing people by having to surmount her own painful life experiences. She imparted these tools and methods to her clients for eighteen

of the twenty-five years she was passionately dedicated to helping others repair themselves. Returning to school at forty-one, she'd hoped to legitimize the talents she'd always had, but found that experience lacking. Ms. Schreiber has not worked as a state-licensed professional, because in her view, "psychotherapy" or mind work never seemed to resolve or remedy human pain. Her own approach was extremely unconventional, unique and effective in contrast to other forms of intervention, even within the realm of addiction recovery. Having retired from her wellness practice in late 2017, she hopes to publish many more books that might help you gain clarity, wholeness, contentment, inner peace and joy.

An honest and compelling memoir, *Girl in Need of a Tourniquet* is Merri Lisa Johnson's account of her borderline personality disorder and how it has affected her life and relationships. Johnson describes the feeling of "bleeding out" — unable to tell where she stopped and where her partner began. A self-confessed "psycho girlfriend," she was influenced by many emotional factors from her past. She recalls her path through a dysfunctional, destructive relationship, while recounting the experiences that brought her to her breaking point. In recognizing her struggle with borderline personality disorder, Johnson is ultimately able to seek help, embarking on a soul-searching healing process. It's a path that is painful, difficult, and at times heart-wrenching, but ultimately makes her more able to love and coexist in healthy relationships.

The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a "make-believe" mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to attend to the hermit without feeding her fear, to love the queen without becoming her subject, and to live with the witch without becoming her victim. A Jason Aronson Book

*Logged In and Stressed Out* teaches readers to feel happier and more confident by examining the ways in which social media is negatively affecting their lives and determining how they can develop healthier online habits.

Exploring how individuals come to have this shortcoming, why you get drawn into their perilous orbit, and what you can do to break free, Hotchkiss describes the "Seven Deadly Sins of Narcissism" and their origins. You will learn to recognize these hallmarks of unhealthy narcissism -- Shamelessness, Magical Thinking, Arrogance, Envy, Entitlement, Exploitation, Bad Boundaries -- and to understand the roles that parenting and culture play in their creation. Whether the narcissist in question is a coworker, spouse, parent, or child, *Why Is It Always About You?* provides abundant practical advice for anyone struggling to break narcissism's insidious spread to the next generation, and for anyone who encounters narcissists in everyday life.

*Borderline, Narcissistic, and Schizoid Adaptations* demystifies the diagnosis and treatment of personality disorders. Elinor Greenberg begins with an overview of the topic of personality disorders, reframes these disorders as adaptations, and then explains the treatment interventions that work best for each type of adaptation. Later chapters describe how to do specific interventions that deal with commonly encountered treatment issues such as: such as: "How to undo a Narcissistic shame-based self-hating depression," "How to judge a Schizoid client's sense of interpersonal safety from their dreams," and "How to help Borderline clients reach their goals." Each type of intervention is explained in detail, ample clinical examples are given, as is how and when to utilize the method in the client's treatment. Both beginning therapists and experienced clinicians alike will find this book a useful resource that will expand their understanding and effectiveness with this often challenging group of clients.

The tough chick loner act of self-reliance was a complete facade."
