Get Rolling on Your Most Inventive Artwork Ever! What lurks in the shadows of your imagination? This book takes you deep into the dusty corners and dark recesses where your most original ideas lie in wait, showing you how to lure them out into daylight, and shape them into fantastic yet believable concept art. Experimentation is the cornerstone of Fantasy Genesis. A series of dice rolls and corresponding word lists present you with an infinite variety of jumping-off points and visual problems to solve. The challenge (and the fun) is to meld seemingly unrelated and everyday elements such as a caterpillar, seashells, fire or a hammer into exceptionally curious, grotesque, oddly beautiful and totally unexpected creations. • 40+ step-by-step mini-demonstrations illustrate basic techniques for drawing a wide range of fantasy elements and forms • 3 game variations (complete with game sheets) lead you to create fiercely imaginative objects, creatures and humanoids • 3 full-length demonstrations show how to play the game from your first rolls of the die to finished concept drawings Use this art-game as a warm-up, a bulldozer for creative-block or a daily sketching exercise to generate a stockpile of inspired beasties, heroes, costumes, weapons and other never-before-dreamt creations. It all starts with a roll, a word and your imagination.

Altro che gli umani. Sono gli animali che riescono a essere felici. Sono loro che non hanno il dopo. Invece noi abbiamo le conseguenze, abbiamo il futuro che ci tormenta. Parigi. Dominic Robert sta per compiere diciannove anni e, tra qualche mese, dovrà anche affrontare l'Esame di Maturità. Figlio di genitori separati, non vive la sua condizione come un problema, anzi, con il padre ha un ottimo rapporto, complice, profondo. Ciò che invece rischia di minare il fragile equilibrio della sua età è la matematica e, soprattutto, chi la insegna. Si tratta di un giovane professore che, per i modi particolarmente feroci con cui si relaziona alla classe, viene da tutti soprannominato Pugnale. Dominic ha sempre evitato di cedere alle provocazioni di questo demone vestito di nero, ma una tragica circostanza lo obbliga a un cambiamento. Con la mente affollata di nuove e urgenti domande capisce che una, su tutte, s'impone e pretende una risposta. Caduta nel piatto della sua esistenza comincia a scavare dentro di lui e ad agire sulla sua parte oscura. "Sapevo che sarebbero arrivati i dubbi. Arrivano sempre quando stai per chiudere la porta."

The MicroStrategy Report Services: Documents and Dashboards course provides an overview of Dynamic Enterprise Dashboards™ built in MicroStrategy Report Services™ in MicroStrategy Web™. The course introduces the many features that enable you to create sophisticated, boardroom-quality documents and the various types of documents. In this course, you will learn about panel stacks, selectors, dashboard templates, and analyses. Additionally, you will learn about graph formatting features, best uses for certain graph types, and best practices in dashboard design. The course also covers Flash-specific features, as well as document performance topics. You will be introduced to Visual Insight™ features and capabilities.

Anita Lahey's second collection, *Spinning Side Kick*, is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan

or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is slangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In *Spinning Side Kick*, a talented poet returns with sharper aim. This outstanding and highly original study examines the history of collecting in early modern Europe, and describes the myriad treasures, from paintings and antiques to religious relics, that found their way into the private collections and public museums of the time. The author looks at the types of people who formed collections, from the harmless eccentrics to the wily speculators, and examines what they collected and why. He develops a historical anthropology of collecting and sheds new light upon the genesis of the modern museum. Pomian charts the changes in fashion which characterised the world of collecting, arguing that such shifts can be seen as a sign of wider and more profound changes in mentality and can be analysed in terms of a conflict between aesthetic and historical sensibilities.

'This book is a major contribution to culture and to the psychoanalytic literature. The authors explore how animals, both wild and domesticated, have powerful symbolic meanings in our psyches, mythology, religion, literature, art, music, and popular culture. From the prehistoric art of Lascaux to Picasso, from *The Fly* to the American eagle, the psychoanalytic perceptions are subtle and suggestive, the aesthetic, film, and national insights are a delight.'—Peter Loewenberg, Dean, Southern California Psychoanalytic Institute, Professor of History and Political Psychology, UCLA 'Our cousins - the animals - swarm, creep, fly, swim, and crawl all about us, even sharing our houses and infesting our bodies. We hunt them, breed them, clothe ourselves with them, and eat them for dinner (as they sometimes do to us). They populate our literature, myths, religions, arts, our language and its metaphors, and they haunt our unconscious fantasies and our dreams.

*Cucina Piemontese* includes recipes for more than 95 Piemontese dishes, many of them from the author's family in Piedmont. These classic recipes, accompanied by historical and cultural information, as well as a chapter on regional wines, provide an opportunity to explore this fascinating and increasingly renowned cuisine from an insider's perspective. The simple recipes made with readily available ingredients bring the cucina piemontese home.

A broad survey of the West's extraordinary love affair with Japan. From the moment of the very first contact in the sixteenth century, Japan has always possessed an irresistible fascination for the West. The fascination was if anything increased when Japan closed its borders in 1638, and for over 200 years the only contact was through a small colony of Dutch traders who were permitted to live on the tiny island of Deshima in Nagasaki Bay. After 1858, full trade was resumed, and a wave of 'Japanomania' swept across Europe and America. The 1862 Great Exhibition in London was the first to display a wide range of Japanese goods in the west. Visited by hundreds of thousands of people, the prints, ceramics and lacquer work became the height of fashion.

Christopher Dresser travelled to Japan in 1876 as an agent for Tiffany & Co. He visited 64 potteries and dozens of other manufacturers. Not only did he take photographs home to spread the word there, but he also advised the Japanese how best to export their trade. This two way dialogue offers a rich synthesis of fine art and the decorative arts, as well as popular culture. Lionel Lambourne tells this remarkable story in a fluent

and engaging narrative that focuses on the human drama - often amusing but sometimes tragic - of the individual personalities involved in the two-way dialogue between cultures.

Loie Fuller was the most famous American in Europe throughout the late nineteenth and early twentieth centuries. Rising from a small-time vaudeville career in the States, she attained international celebrity as a dancer, inventor, impresario, and one of the first women filmmakers in the world. Fuller befriended royalty and inspired artists such as Mallarmé, Toulouse-Lautrec, Rodin, Sarah Bernhardt, and Isadora Duncan. Today, though, she is remembered mainly as an untutored "pioneer" of modern dance and stage technology, the "electricity fairy" who created a sensation onstage whirling under colored spotlights. But in Rhonda Garelick's *Electric Salome*, Fuller finally receives her due as a major artist whose work helped lay a foundation for all modernist performance to come. The book demonstrates that Fuller was not a mere entertainer or precursor, but an artist of great psychological, emotional, and sexual expressiveness whose work illuminates the centrality of dance to modernism. *Electric Salome* places Fuller in the context of classical and modern ballet, Art Nouveau, Orientalism, surrealism, the birth of cinema, American modern dance, and European drama. It offers detailed close readings of texts and performances, situated within broader historical, cultural, and theoretical frameworks. Accessibly written, the book also recounts the human story of how an obscure, uneducated woman from the dustbowl of the American Midwest moved to Paris, became a star, and lived openly for decades as a lesbian.

Analyses the impact of television on daily life, focusing on both the concepts and theories of the medium. This book also analyzes the way in which televised entertainment has radically altered human perceptions of place and time, multiplied opportunities for indirect social experience, and fueled the collective imagination.

One of the first books published to deal with the phenomenon of residential schools in Canada, *Resistance and Renewal* is a disturbing collection of Native perspectives on the Kamloops Indian Residential School (KIRS) in the British Columbia interior.

Interviews with thirteen Natives, all former residents of KIRS, form the nucleus of the book, a frank depiction of school life, and a telling account of the system's oppressive environment which sought to stifle Native culture.

The craft of Italian salumi, now accessible to the American cook, from the authors of the best-selling *Charcuterie*. Michael Ruhlman and Brian Polcyn inspired a revival of artisanal sausage making and bacon curing with their surprise hit, *Charcuterie*. Now they delve deep into the Italian side of the craft with *Salumi*, a book that explores and simplifies the recipes and techniques of dry curing meats. As the sources and methods of making our food have become a national discussion, an increasing number of cooks and professional chefs long to learn fundamental methods of preparing meats in the traditional way. Ruhlman and Polcyn give recipes for the eight basic products in Italy's pork salumi repertoire: guanciale, coppa, spalla, lardo, lonza, pancetta, prosciutto, and salami, and they

even show us how to butcher a hog in the Italian and American ways. This book provides a thorough understanding of salumi, with 100 recipes and illustrations of the art of ancient methods made modern and new.

Shows and describes different kinds of racecars, including a formula one, a dragster, and a sprint car

Acclaimed film scholar Francesco Casetti situates the cinematic experience within discourses of 20th century modernity. He suggests that film defined a unique gaze not only because it recorded many of the centuries most important events, but also because it determined the manner in which they were received. This is an investigation of Western cultural identity. It shows how people's images of themselves and others reflect the power that different groups in a society have to shape these images. The contributors describe these images in Western academic writing, popular Western culture, and societies outside the West, in this counterpart to Edward Said's Orientalism. - ;Occidentalism is an investigation of images of Western cultural identity. Edward Said's Orientalism revolutionized Western understanding of non-Western cultures by showing how Western projected images shaped the Occidental of the Orient, but those who follow Said have not until now reflected that understanding back onto Western societies. Occidentalism shows how images of the West shape people's conceptions of themselves and others, and how these images are in turn shaped by members of Western and non-Western societies alike. The contributors describe and explicate these images in a variety of areas, from Western academic writing to popular Western culture, from societies within and outside the West, to show how power and conflict shape such conceptions. -

First published in 1930, amidst the collapse of socialist ideals and the onset of fascism throughout parts of Europe, Liberal Socialism is a powerful and timely document on the ethics of political action. During his confinement for his anti-fascist beliefs, the Italian political philosopher Carlo Rosselli (1899-1937) wrote this work not only as a critique of fascism, but also as an investigation into the history of Marxism and the need for a liberal reformulation of socialism. In this first English- language edition, Nadia Urbinati highlights both the historical and theoretical importance of Liberal Socialism, which continued to inspire the anti-fascist movement "Giustizia e Liberta." long after Rosselli's assassination by Mussolini's agents, and which outlines a possible rebirth of the socialist and democratic movements. Rosselli's analysis provides an illuminating interpretation of the ideological crisis of Marxism, in its positivistic version, during the late nineteenth century and exposes the intellectual weakness of revisionist efforts to delineate new versions of Marx's doctrine. He encourages readers to view socialism as an ethical ideal and to consider whether Marxist or liberal methods

combine better with socialism to achieve that ideal. Rosselli opts for a liberal socialism that avoids the shortcomings of uncontrolled laissez-faire but favors state intervention to secure public services and social rights. Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems for class discussion. Cases and Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law.

Twenty years ago, noted film scholars Tom Gunning and André Gaudreault introduced the phrase “cinema of attractions” to describe the essential qualities of films made in the medium’s earliest days, those produced between 1895 and 1906. Now, *The Cinema of Attractions Reloaded* critically examines the term and its subsequent wide-ranging use in film studies. The collection opens with a history of the term, tracing the collaboration between Gaudreault and Gunning, the genesis of the term in their attempts to explain the spectacular effects of motion that lay at the heart of early cinema, and the pair’s debts to Sergei Eisenstein and others. This reconstruction is followed by a look at applications of the term to more recent film productions, from the works of the Wachowski brothers to virtual reality and video games. With essays by an impressive collection of international film scholars—and featuring contributions by Gunning and Gaudreault as well—*The Cinema of Attractions Reloaded* will be necessary reading for all scholars of early film and its continuing influence.

A detailed understanding of anatomy and physiology is needed to code ICD-10 appropriately. This illustrated resource reviews all body systems while providing information on how ICD-10 is used to identify the appropriate diagnostic or procedural code. Chapters contain quizzes to test your understanding.

Algorithms are at the heart of every nontrivial computer application, and algorithmics is a modern and active area of computer science. Every computer scientist and every professional programmer should know about the basic algorithmic toolbox: structures that allow efficient organization and retrieval of data, frequently used algorithms, and basic techniques for modeling, understanding and solving algorithmic problems. This book is a concise introduction addressed to students and professionals familiar with programming and basic mathematical language. Individual chapters cover arrays and linked lists, hash tables and associative arrays, sorting and selection, priority queues, sorted sequences, graph representation, graph traversal, shortest paths, minimum spanning trees, and optimization. The algorithms are presented in a modern way, with explicitly formulated invariants, and comment on recent trends such as algorithm engineering, memory hierarchies, algorithm libraries and certifying algorithms. The authors use pictures, words and high-level pseudocode to explain the algorithms, and then

they present more detail on efficient implementations using real programming languages like C++ and Java. The authors have extensive experience teaching these subjects to undergraduates and graduates, and they offer a clear presentation, with examples, pictures, informal explanations, exercises, and some linkage to the real world. Most chapters have the same basic structure: a motivation for the problem, comments on the most important applications, and then simple solutions presented as informally as possible and as formally as necessary. For the more advanced issues, this approach leads to a more mathematical treatment, including some theorems and proofs. Finally, each chapter concludes with a section on further findings, providing views on the state of research, generalizations and advanced solutions.

Dancefilm: Choreography and the Moving Image examines the choreographic in cinema - the way choreographic elements inform cinematic operations in dancefilm. It traces the history of the form from some of its earliest manifestations in the silent film era, through the historic avant-garde, musicals and music videos to contemporary experimental short dancefilms. In so doing it also examines some of the most significant collaborations between dancers, choreographers, and filmmakers. The book also sets out to examine and rethink the parameters of dancefilm and thereby re-conceive the relations between dance and cinema. Dancefilm is understood as a modality that challenges familiar models of cinematic motion through its relation to the body, movement and time, instigating new categories of filmic performance and creating spectatorial experiences that are grounded in the somatic. Drawing on debates in both film theory (in particular ideas of gesture, the close up, and affect) and dance theory (concepts such as radical phrasing, the gestural anacrusis and somatic intelligence) and bringing these two fields into dialogue, the book argues that the combination of dance and film produces cine-choreographic practices that are specific to the dancefilm form. The book thus presents new models of cinematic movement that are both historically informed and thoroughly interdisciplinary.

Essays on orientalism in American and European cinema

Forty-six. That's how many hybrids survived the Hunter attack in the woods after I revived them with an injection of my blood. That's how many followed me home to Frederick Falls. And that's how many were now mentally linked to me through a blood bond. Two days. Three valium. Fourteen hours of sleep. That's what it took to realize I wasn't losing my mind as a result of the noise in my own head. Sixteen. That's how many days have passed since I almost killed Alex. That's how many days I've sat by his bedside, waiting for him to wake up. To ease the guilt, to understand his betrayal, to remember the exact shade of brown in his eyes. Zero. That's my chances of skating by with Gordon Steppe and the Hunter Council. They want me for questioning. I'm afraid what'll happen if I give them answers.

When monsters appear on Earth, Maggie MacKay is on the job. No one is better at hauling the creepy crawlies back where they belong. No one, that is, except Maggie's dad, who vanished in the middle of an assignment. Now, an elf named Killian has shown up with a gig. Seems Maggie's uncle teamed up with the forces of dark to turn Earth into a vampire convenience store, serving bottomless refills on humans. Ah, family... The only hope for survival lies in tracking down two magical artifacts and a secret that disappeared with Maggie's dad. **WARNING:** This book contains cussing, brawling, and unladylike behavior. Proceed with caution.

Kate decides to be a cowgirl and has some interesting experiences. Author Ann Cooper Albright places Fuller in the context of fin-de-siecle culture and offers a compelling analysis of Fuller's innovations in lighting and movement that includes full-color reproductions of original posters, archival photos, and magazine and newspaper clippings. *Traces of Light* adds significantly to the literature on twentieth century dance, illuminating a pioneer who helped to shape modern performance and stagecraft."--BOOK JACKET.

The missing dead call to Violet. They want to be found. Violet can sense the echoes of those who've been murdered—and the matching imprint that clings to their killers. Only those closest to her know what she is capable of, but when she discovers the body of a young boy she also draws the attention of the FBI, threatening her entire way of life. As Violet works to keep her morbid ability a secret, she unwittingly becomes the object of a dangerous obsession. Normally she'd turn to her best friend, Jay, except now that they are officially a couple, the rules of their relationship seem to have changed. And with Jay spending more and more time with his new friend Mike, Violet is left with too much time on her hands as she wonders where things went wrong. But when she fills the void by digging into Mike's tragic family history, she stumbles upon a dark truth that could put everyone in danger.
