#1 NEW YORK TIMES BESTSELLER • Discover the life-changing memoir that has inspired millions of readers through the Academy Award®-winning actor's unflinching honesty, unconventional wisdom, and lessons learned the hard way about living with greater satisfaction. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE GUARDIAN "McConaughey's book invites us to grapple with the lessons of his life as he did—and to see that the point was never to win, but to understand."—Mark Manson, author of *The Subtle Art of Not Giving a F\*ck* I've been in this life for fifty years, been trying to work out its riddle for forty-two, and been keeping diaries of clues to that riddle for the last thirty-five. Notes about successes and failures, joys and sorrows, things that made me marvel, and things that made me laugh out loud. How to be fair. How to have less stress. How to have fun. How to hurt people less. How to get hurt less. How to be a good man. How to have meaning in life. How to be more me. Recently, I worked up the courage to sit down with those diaries. I found stories I experienced, lessons I learned and forgot, poems, prayers, prescriptions, beliefs about what matters, some great photographs, and a whole bunch of bumper stickers. I found a reliable theme, an approach to living that gave me more satisfaction, at the time, and still: If you know how, and when, to deal with life's challenges—how to get relative with the inevitable—you can enjoy a state of success I call "catching greenlights." So I took a one-way ticket to the desert and wrote this book: an album, a record, a story of my life so far. This is fifty years of my sights and seens, felts and figured-outs, cools and shamefuls. Graces, truths, and beauties of brutality. Getting away withs, getting caughts, and getting wets while trying to dance between the raindrops. Hopefully, it's medicine that tastes good, a couple of aspirin instead of the infirmary, a spaceship to Mars without needing your pilot's license, going to church without having to be born again, and laughing through the tears. It's a love letter. To life. It's also a guide to catching more greenlights—and to realizing that the yellows and reds eventually turn green too. Good luck.

Encourages the reader to shake, tilt, and wiggle the book in an effort to launch the alien back into space, because aliens do not belong on Earth--or maybe they do.

George the giant, known for wearing his old patched clothes, finally buys new ones, but then gives them away to some needy animals.

Storytelling is one of the oldest and most essential skills known to humankind, a timeless parenting tool that helps families celebrate life's joys, navigate its challenges, and raise healthy, well-adjusted kids. Stories help children manage their emotions, empathize with others, and better understand the complex world we live in. More importantly, storytelling cultivates a rich and meaningful bond between storyteller and listener, building intimacy and trust between parent and child. In this delightful book, Silke Rose West and Joseph Sarosy—early childhood educators with thousands of storytelling hours between them—distill the key ingredients of storytelling into a surprisingly simple method that can make anyone an expert storyteller. Their intuitive technique uses events and objects from your child's daily life to make storytelling easy and accessible. By shifting the focus from crafting a narrative to strengthening your relationship with your child, this book will awaken skills you never knew you had. Complete with practical advice, helpful prompts, and a touch of science to explain how stories enrich our lives in so many ways, *How to Tell Stories to Children* is a must-read for parents, grandparents and educators.

Who do you think is stronger – the Sun or the North Wind? They both found themselves in a dispute because they both thought that they were strongest. They saw a traveler who was just passing by and they decided that whoever made the man remove his cloak would be proclaimed the strongest. A winner is declared. Who will it be and what is the moral of the story? Find out in Aesop's fable "The North Wind and the Sun". Aesop's fables feature animals, legendary creatures, plants, inanimate objects, or forces of nature that speak, solve problems, and generally have human characteristics. All the stories story lead to a particular moral lesson. Aesop (620–564 BCE) was a storyteller that was believed to have lived in Ancient Greece. He is celebrated for a number of fables now collectively known as Aesop's Fables. In the few scattered sources about his life, Aesop was described as a slave who by his cleverness acquires freedom and becomes an adviser to kings and city-states. Although Aesop's existence remains unclear, numerous tales

credited to him were gathered across the centuries and in many languages in a storytelling tradition that continues to this day.

Whether presenting their versions of real events or making up tales of adventure and discovery, children enchant us with their stories. But the value of those stories goes beyond their charm. Storytelling is an essential form through which children interpret their own experiences and communicate their view of the world. Each narrative presented by a child is a brushstroke on an evolving self-portrait - a self-portrait the child can reflect on, refer to, and revise. In *The Stories Children Tell*, developmental psychologist Susan Engels examines the methods and meanings of children's narratives. She offers a fascinating look at one of the most exciting areas in modern psychology and education. What is really going on when a child tells or writes a story? Engel's insights into this provocative question are drawn from the latest research findings and dozens of actual children's tales - compelling, funny, sometimes disturbing stories often of unexpected richness and beauty. In *The Stories Children Tell*, Susan Engel examines: - the different functions of storytelling - the way the storytelling process changes as children develop - the contributions of parents and peers to storytelling - the different types of stories children tell - the development of a child's narrative voice - the best way of nurturing a child's storytelling skills Throughout these discussions, Engel presents compelling evidence for what is perhaps her most intriguing idea: that in constructing stories, children are constructing themselves.
