Smashing SBM is based around the same approach as our successful and best-selling Cracking Case book: practical, student-focused and simple advice on what to do to pass an unusual examination in which time management and examination technique are the key to success. This new 2018 edition has been fully updated for the new syllabus and the learning points raised by the 2017 examinations. Given the relatively low number of questions in each SBM examination (just 2) and the very open nature of the requirements, it is vital that

you have a way of determining which areas are important and which issues are going to attract fewer marks. Smashing SBM sets out an effective planning methodology (which we call MAPs) that helps you predict the mark allocation of sub-parts of a question and allocate your time effectively. Our MAPs give direction to your answer by providing reminders on how to assess the likely mark allocation whilst also reminding you of key things to do in Q1 and Q2, based on our review of examiner comments. Smashing SBM also contains detailed reviews of the 8 real examination papers set to date with a view to understanding patterns in the question format and content, as well as the mark allocation. Smashing SBM includes detailed revision of key financial management and business strategy topics, as assessed in the real examination papers and ICAEW SBM mock exams. We have also included selected questions from our Business Strategy and Financial Management Q&A books to help you revise these areas very quickly. The book also contains detailed notes on the Specialist Audit & Assurance topics which are examinable at the Advanced Level. Our revision notes focus on areas other than statutory audit as we know that around 10% of the marks will be for these specialised areas such as internal audit, Agreed Upon Procedures, review of prospective information and so on. Smashing SBM contains detailed revision of ethics, including various ethical frameworks, to help you achieve the 5-10% of marks available for ethics in SBM. Smashing SBM is designed to pair up with its sister publication, SBM Exam Room Notes 2018, which provides clear, alphabetically-referenced sets of notes on all key SBM topics to provide exam room reminders of mark-scoring points - perfect for avoiding exam room panic! CIMA offers a business qualification with a finance focus, aiming to produce members with accounting prowess who are skilled in strategic decision-making. 98% of its members work in business, the highest proportion of any worldwide accountancy body. Paper E3 'Enterprise Strategy' is a wide-ranging exam that includes aspects of strategic analysis, choice and implementation. To pass, candidates need both technical knowledge and the ability to apply their knowledge to specific scenarios. The syllabus is split into four areas: \* Interacting with the Competitive Environment (20%) \* Change Management (20%) \* Evaluation of Strategic Options (30%) \* Implementation of Strategic Plans (30%) The first section explores the impact and influence of an organisation's environment on its strategy. An organisation needs to take account of its environmental context as well as its own internal capabilities when assessing the strategic options available to it. Having identified these options, it then has to evaluate them to decide which is the most appropriate to pursue. The E3 syllabus recognises that implementing strategic plans involves managing change, and 20% of the syllabus is now devoted to issues involved in managing the change process. Change Management has not previously been examined at Strategic Level in the CIMA exams. The final section of the syllabus looks at the ways organisations control and measure the performance of the strategies they have implemented. The E3 Study Text provides you with comprehensive coverage of the principles of business strategy and how they can be applied to design and implement enterprise strategies. The Text also offers a range of short case studies which illustrate how business strategy ideas are applied in the real world. In the E3 exam, your ability to apply knowledge to a scenario is as important as pure knowledge, but it is still crucial to have a sound understanding of the key terms and ideas. The 'key terms' feature in the text will help you identify these key terms, while the 'section summaries' provide a convenient overview of each section of the text.

Current modern companies, which are also the key factors of a global economy, are subject to increasing pressures to conduct their business in an environmentally responsible manner, due to social and environmental problems. Improving long-term environmental performance can bring economic benefits to those companies that are innovative and environmentally sensitive, especially by integrating environmental information into their business strategies. Considering all the changes, sustainability reporting, management, and financial accounting becomes a powerful information tool for executives, managers, and employee teams to gain insights and make better decisions. Along with concepts such as ethical, controlling, auditing, management, and financial accounting, reporting provides value with the decision-making process. All these debates underline the major responsibility of users when configuring accounting and finance models

and thereby in modelling business information. Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations proposes an interdisciplinary perspective and explores various theoretical and practical approaches of ethical standards, management accounting, and their impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage for decision making. In addition, the book examines the role of management accounting and sustainability reporting from other points of view such as ethical standards, corporate social responsibility, creative accounting, green accounting, environmental indicators, e-accounting, KPI, lean accounting, controlling, auditing, reporting, etc., offering a number of new insights into management accounting. It is intended for chief financial officers, financial controllers, business analysts, financial planners, financial analysts, budgeting managers, executives, managers, academicians, researchers, and students.
