This volume covers Chapters 1--20 of the main text. The Student's Solutions Manual provides detailed, step-by-step solutions to more than half of the odd-numbered end-of-chapter problems from the text. All solutions follow the same four-step problem-solving framework used in the textbook.

General Chemistry: Understanding Moles, Bonds, and Equilibria Student Solution Manual, Volume 1 is a companion solution manual to General Chemistry: Understanding Moles, Bonds, and Equilibria, Volume 1. Original problems from the textbook are included alongside detailed explanations and useful base knowledge required to successfully solve each problem. The material in this manual implements the innovative presentation of the material given in the companion textbook. Unlike nearly all chemistry solution manuals on the market, this volume is written by one of the textbook authors. This solutions manual can also be used as a source of additional problems to supplement any foundational chemistry text or course, including AP chemistry. It provides students with ample opportunity to build knowledge and mastery of basic chemistry concepts.

The manual, prepared by David Mills, professor emeritus at the College of the Redwoods in California, provides solutions for selected odd-numbered end-of-chapter problems in the textbook and uses the same side-by-side format and level of detail as the Examples in the text.
