Ways of the World, Value Edition is an affordable world history textbook that offers a truly global approach that explores broad patterns and nurtures students' skill development.

"A World in the Making is a kind of anthropological journey taken by four historians that assumes all societies are "hot," and all people make history and always have. We argue in our emphasis on lives and livelihoods for a world constructed, altered, renovated, remade by ordinary people even as we acknowledge the genius of individual innovators, disruptors who broke the mold or struck out in some new direction."--Provided by publisher.

startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of Books and applications to teach this "Insider's Language" to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study. "The epic story of the rise and fall of the empire of cotton, its centrality in the world economy, and its making and remaking of global capitalism. Sven Beckert's rich, fascinating book tells the story of how, in a remarkably brief period, European entrepreneurs and powerful statesmen recast the world's most significant manufacturing industry combining imperial expansion and slave labor with new machines and wage workers to change the world. Here is the story of how, beginning well before the advent of machine production in 1780, these men created a potent innovation (Beckert calls it war capitalism, capitalism based on unrestrained actions of private individuals; the domination of masters over slaves, of colonial capitalists over indigenous inhabitants), and crucially affected the disparate realms of cotton that had existed for millennia. We see how this thing called war capitalism shaped the rise of cotton, and then was used as a lever to transform the world. The empire of cotton was, from the beginning, a fulcrum of constant global struggle between slaves and planters, merchants and statesmen, farmers and merchants, workers and factory owners. In this as in so many other ways, Beckert makes clear how these forces ushered in the modern world. The result is a book as unsettling and disturbing as it is enlightening: a book that brilliantly weaves together the story of cotton with how the present global world came to exist"--Résumé de l'éditeur.

"This work of Dr. Aziza Braithwaite Bey is evidence of her life long insistence that the contributions of ancient and global cultures be represented in every possible discourse where issues of human development and human contribution are discussed. First, as an internationally trained fashion designer; second, as a master of museology and costume curating and; third as a doctor of diversity in cultural education teaching in the Graduate School of Arts and Social Sciences at Lesley University, Dr. Bey's work now gives instructors a manual that introduces a plethora of comparative cultural material and evidence into the classroom-and into our thinking. Through well researched examples, her book carefully insists that both instructor and student begin to think of humanity outside of their own parochial setting. Through lessons on food, clothing and ritual, this manual purposefully underscores a deep appreciation of world-wide culture. In this era of globalization, it becomes particularly important that we manage to identify distinctions, still, in ethnic form and culture-so that no modern effort toward homogeneity obscures those particular ways and means that varieties of cultures have solved similar problems. This manual gently helps the user to create an understanding that the diverse range of human genius is the greatest contribution to civilization, world-wide. In this manual Bey celebrates that genius...of humanity to demonstrate how similar problems can be solved in acutely distinct ways while maintaining similarities of import across of the range of possibility. To this end Dr. Bey's work and her insistence on cultural inclusion demand both our respect and applause." Renee Kemp-Rotan Contributing Editor with Paul Oliver in The International Encyclopedia of World Vernacular Architecture Cambridge University Press, 1997

An introduction to the study of the ways the church has evolved in its corporate life since its birth in the first century. Special attention is given to studying its changing relationship and interaction with the surrounding societies in which it has existed. The intended readership will be those training for ministry in English speaking churches, so the studyguide will concentrate on those aspects of this subject of most relevance to this group. This means there will be greater attention to developments in the West than in the East, especially in later centuries, and to topics such as the nature of ministry, the sacraments, places of worship, authority in the church and mission. These will be examined at each period of church history, in each chapter, to provide reference points of comparison throughout the book. Each chapter will also contain a specific case study, presenting extracts of some key documents with notes, commentary and questions for discussion, to allow readers to develop skills in historical research. General discussion questions and reading lists will be provided at the end of each chapter. The final chapter will provide guidance for the study of the history of the student's own church and community.
