Now more than ever, Subaru fanatics have a wealth of factory and aftermarket performance upgrades at their disposal. In High-Performance Subaru Builder's Guide, author Jeff Zurschmeide explains in detail the similarities and differences between the Subaru models, and describes how to modify each for performance on the street and at the track. He uses over 300 color photos to show you how to modify your Impreza, Legacy, WRX, or STI for improved acceleration, handling, braking, and style. The book provides detailed chapters explaining how to modify the intake, exhaust, turbocharger, and computer systems for more horsepower and torque--plus info on upgrading your drivetrain to handle all that power. If taking corners is your thing, you'll find chapters on the suspension, steering, chassis, brakes, and wheels and tires. A special chapter even shows you how to get started in your favorite type of racing, including examples of successful racers and their cars.

Road & motor vehicles: general interest.

A picture packed revisiting of British trucks and trucking in the 1950s.

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

How to modify and upgrade a retro or classic saloon or sports car for modern road or motorsport use, instruments, engine, gearbox, overdrive, wheels, tyres, supercharging and turbocharging, suspension, oil cooling and systems, clutch, cooling, brakes, back axle and drivetrain, exhaust, dyno tuning, carburation, preparation for motorsport.

This book describes the birth, development, and rallying career of the BMC Mini-Cooper/Mini-Cooper in the 1960s, providing a compact and authoritative history of where, when and how it became so important to the sport.

Britain's has a long, distinctive history producing farm model tractors for collectors, young and old, around the world. This book is the first comprehensive, fully illustrated guide for collectors of the model and toy tractors produced by Britain's in the ten years since it transferred all production to China. The book describes all the model tractors released in North America and Europe since 1998. As well as general releases it includes details and photographs of prototype and rare models. This is complemented by a catalogue describing the main features, differences, issue dates and codes of each model produced. Each is illustrated with six color photographs showing the model from different angles and the issue packaging.

There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.

Runways and Racers focuses on sports car races held at military installations throughout America in the early 1950s. It was a marriage of convenience for the Sports Car Club of America and the Strategic Air Command, with both parties gaining advantages from the arrangement. The thorn in the side turned out to be a Congressman whose own aspirations exceeded his standing, but who found himself in a position to be able to influence the outcome of events ...

This book details the origin and racing history of the Ferrari 333 SP. Uniquely, none of the 333 SP models were entered into races by Ferrari itself. The cars were built specifically for customer use; a purchase price of \$900,000 included two spare engines and race technical support supplied by Ferrari engineers. A total of 40 cars were built; the first four by Ferrari, the remainder manufactured by Dallara & Michellotto using Ferrari engines. All of the cars were sold to, and race entries made by, privateer teams. From 1994, the cars contested the IMSA World Sports Car Championship, the United States Road Racing Championship, and the American Le Mans Series, at circuits throughout North America. In 1997, the cars also featured in the Europe-based International Sports Racing Series, as well as the 24 Hours of Le Mans. Two years later, the Doran-Lista team installed a Judd V10 engine into its 333 SP, with the aim of increasing power and improving fuel efficiency. In all, from the 126 races entered, 47 victories were claimed by the 333 SP.

Perceived as a replacement for the long running Leone, the Impreza quickly gained a great reputation through Subaru's successful WRC program. This book covers the full story of the Impreza, from concept through to the current production car, looking at the rally machines along the way, and illustrated throughout with contemporary material. Now with over 400 mainly color pictures and significant additional text, this is a fantastic warts and all account of an amazing car.

The Subaru Impreza first appeared on the World Rally scene in 1993, taking a hat-trick of World Rally Manufacturers' Championships, in 1995, 1996 and 1997. The drivers the likes of Marku Alen, Ari Vatanen, and Colin McRae have competed in the World Rally Championship in Imprezas and all went on to winning the World Rally Drivers' Championship in Imprezas. These cars continued to compete on the World Rally stage until the end of 2008, when the Subaru World Rally Team unfortunately withdrew from rallying. This brand new Haynes Manual covers one of the most iconic rally cars in recent years, and does so in perfect detail. People that love the Impreza, really love the Impreza, so get the full facts and specs now!

This new book examines how Austin bounced back after WWII, and how, despite the severe materials shortage, it managed to develop the largest range of vehicles produced by any automaker in postwar Britain. It examines how these vehicles were received and used in these markets, and is illustrated with rare archive photography depicting the weird, wonderful and the downright imaginative.

Large format version of the definitive history of the most sought-after, fastest and elegant Bentleys in the era of British ownership: the Continentals. Includes Bentley Continental R and S-Types (from 1951), Bentley Corniche, Continental Convertible, Continental R/S/T and Azure.

Always produced in small numbers, the MV Agusta Fours are now considered amongst the most classic of motorcycles from the 1960s and 1970s. These were the first motorcycles that made Grand Prix technology available to the public, albeit at an almost prohibitive cost.

This detailed and beautifully illustrated book covers the Mercedes-Benz 107 series, which ran from 1971 to 1989. Written by a highly regarded motoring historian, with many years' ownership of the type in question, this is THE definitive study of the subject. All major world markets are looked at, along with competition history. Extensive appendices cover engine specifications, chassis numbers, build numbers, and so on.

This book is a trip down memory lane, recalling the days when Formula 5000 cars roared around the race tracks in Britain and Europe, creating a lot of noise and, occasionally, dust. The wail of a 5-litre engine was often more spine-tingling than ANY other racing car! Nowadays, many of the same cars show modern day spectators just what Formula 5000 was, back in the day. Few, if any, of the drivers are prima-donnas and many want to know what their car did before it came into their possession. This book answers those questions and many more.

A history of the British influence on the Indianapolis 500, including not only the drivers and cars, but the many others – mechanics, designers, and officials – who have been involved. The story is set out in a series of stand-alone chapters, with a wide variety of informative sidebars, and goes back 100 years to the early days of the race, through the British-led, rear-engined revolution of the 1960s to the present day.

Sleeping Beauties USA honours rusted and forgotten automotive treasures that have been found parked alongside the highways of America, waiting to be discovered again. Rather than showcasing typically brilliant, highly rebuilt show queens, the book instead explores the transience and inherent beauty of a car's life, captured through stunning and evocative photography.

With its stylish Bertone coachwork and race-bred 200bhp V8 engine, the Alfa Romeo Montreal is one of the most stunning series production automobiles of the twentieth century. Almost 4000 Montreals were built, and sound cars are readily available today at very affordable prices. This book is a comprehensive pictorial tribute to the Montreal. This is a visual testimonial to a powerful and beautiful coup_ that was born as a futuristic concept and transformed into a dream car that came true. In a portfolio of 575 illustrations, it paints a unique and detailed graphic portrait of all the facets of this elegant and powerful classic GT, revealing why it is immensely enjoyable to drive and turns heads wherever it appears.

The origin and subsequent history of the 3-litre Ferrari sports cars, which the famed Italian firm designed and built to contest the various versions of the World Sports Car Championship between 1969 and 1973. This series of cars started with the V12 engine and progressed to using the Flat 12 Ferrari engine from the then current Grand Prix car.

Toleman was the team that took Ayrton Senna into Formula 1, to which he responded by creating a masterpiece of movement at Monaco. This was the team that launched Derek Warwick. This was the team that brought Rory Byrne, Ferrari's design genius, to sudden prominence. This book presents the story of Toleman.

British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries. This book will rekindle many memories and serve as a reminder of the important role British commercial vehicles played during the 1960s.

By the Managing Director of the famous Workers' Co-op, this is the real story of the last bastion of British Motorcycle production following the collapse of the industry.

This beautifully illustrated book captures the entire history of the Argentine Grand Prix and the Argentina International Temporada Series, covering all the great races of the golden age of motor sport – when danger and passion defined racing.

This book covers British car electrical systems from 1950 to 1980. Particular emphasis is placed on the Lucas, Smith and SU components that were ubiquitous in British cars of the period. Each major system is given its own chapter, providing theory, component parts and full system operating explanations. Modifications are suggested for those wishing to bring performance and reliability up to more modern standards. Fault-finding charts, cross referenced to the appropriate pages in the book, are provided throughout.

It took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world. A veritable saga with a wealth of illustrations spanning almost a century of motor racing. Over forty unique portraits of daring, brave women who took part in speed records events, rallies and Grand Prix races.

The air-cooled boxer BMW twins were among the most significant motorcycles of the late 1970s and 1980s, providing an unparalleled combination of comfort, reliability, and performance. Written by a world-renowned motorcycle journalist and featuring 190 colour photographs, here is the authoritative work on these machines.

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, later the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

This book focuses solely on the cars derived from the classic Mini. Small GTs, sports cars, roadsters and fun cars: Mini-derivatives that changed the specialist motoring market completely in the early sixties, and new designs kept it busy for nearly four decades. From the well known Mini Marcos and Unipower GT that raced at Le Mans, to the very obscure but as exciting Coldwell GT or Sarcon Scarab, almost 60 cars are thoroughly researched, described and photographed in this book.

This book tells the amazing story of the Lamborghini Urraco. It describes the problems that beset this little supercar, and why it never got the chance it truly deserved. After its demise, the Urraco lived on in the form of the Silhouette and the Jalpa, and both these models are also covered in detail in the pages of this book. The unique Bravo and Athon concept cars are also described. Featuring detailed advice for potential buyers, as well as over 300 photos and illustrations, this is a fascinating and practical account of a future supercar classic.

Here is an introduction to the whole cult of the dune buggy, from its earliest beginnings as a crude off-road vehicle in the 1920s, to the explosion of glassfibre-bodied and VW-based fun cars that became the cult transport of teenagers everywhere in the 1960s and 1970s. With histories, production details, dates and identification tips for over 70 US and UK buggies, this book will help identify the many marques that have been produced over the years. Using period photographs and archive material, combined with amazing contemporary photography, the book is a visual feast, and also contains sections on buggies and celebrities for those that want to spot pop stars, TV hosts and racing drivers posing with period vehicles.

The most famous racing drivers drove it, and, for a long time, it was a guaranteed winner for Porsche: Now, finally, the first comprehensive work about the 908 has been published in the English language. The authors portray the fascinating history of the Porsche 908 racing car, and clearly explain its complex technology. Racing history is fully documented, and detailed statistics enable the reader to quickly look up all of the racing data. In addition, there are little-known anecdotes and contemporary reports from eye-witnesses and drivers. A wealth of contemporary, previously unreleased images evoke the fascinating atmosphere and excitement of the great seventies racing era.
